Subject: PLEASE SAVE WETLANDS
Date: Sunday, August 27, 2017 6:52:40 PM

California wetlands play a crucial role in preserving the Pacific flyway which is used by several million migrating birds annually. In addition, these wetlands offer areas where thousands of California residents can experience the beauty of nature firsthand.

PLEASE SAVE the California wetlands, so that our current and future generations of residents can enjoy a fundamental part of our heritage.

Please also consider that this is essential to the survival of millions of birds.

Thank you for your support of this crucial measure.

Susan Flaming, PhD
