

February 27, 2016

Dear Members of the Board;

From the information that has been provided, 1,2,3 TCP has contaminated a vast number of drinking water sources. Many communities have been affected by the contamination of the chemical and we wish to ask you to set the TCP drinking water standard to 5 ppt, for the detection limit. This is to protect the health of the public.

Sincerely,

A handwritten signature in blue ink, appearing to read "Debra J. Smith".

519 B street, Apt 5.
