Dear Ms. Jeanine Townsend,

This board has been investigating this since 2002 – 10 long years without a resolution. Who knows where this stuff has migrated to? I think this is an outrage to the residents of the State of California to have allowed this to not have been taken care of, the responsible parties fined and made to clean up the mess posthaste. How long before someone will cut through the red tape and get the parties to pay the cost of 10 years of fooling around to delay action? The state cannot let this go on forever. The attorney fees are way too high already!

Jim
