ACKNOWLEDGEMENTS

The State Water Resources Control Board thanks the many program managers and staff in Federal, State, and local government agencies who freely shared their time and knowledge with us. This includes the individuals named as contacts for the individual ground water activities and databases described in this catalog, as well as many others who supplied supplemental information.

A number of State Board staff and student assistants took part in the four-year project which led to the publication of this document. Program management oversight was provided by: Jeff Barnickol, Dean Schnaible, Dave Carlson, John Ladd, and Ron Duff. John Sarna and Ralph Finch alternately provided coordination, supervision of the students, and computer programming support. Under a contract with the University of California, Davis Campus, a number of student interns interviewed the many knowledgeable parties in public agencies and summarized their responses into a database; they include: Christina Chan, Kathryn Crepeau, Craig Fletcher, Les Grober, Rebecca Henry, Don Jones, Anne-Marie Langewiesche, Samuel Manu, Amir Mansoubi, Cynthia Marvin, Eric Miller, Chris Parent, Kathryn Perry, Rima Reshwan, Jesse Stimson, and Amy Terell. The final task of developing the database into a catalog was done by John Sarna under the editorial guidance of Ron Duff and Dean Schnaible.

Funds for this effort were provided, in part, by the United States Environmental Protection Agency as part of the development and implementation of California's Ground Water Quality Protection Strategy under a Federal Clean Water Act Section 106 Grant.

EXECUTIVE SUMMARY

This document was compiled as part of California's Ground Water Quality Protection Strategy under Section 106 of the Federal Clean Water Act. It is the result of a four-year effort proposed and approved in annual workplans submitted to the United States Environmental Protection Agency by the State Water Resources Control Board.

The catalog can serve as a useful tool for locating information pertinent to ground water in California. It addresses a recognized need for better access to ground water knowledge and data among government staff, researchers, consultants, regulatees, and interested members of the public. The approach is to provide summary information on efforts to resolve ground water related concerns, along with directory information on who can provide details or access to desired information.

Summary information is cataloged on many individual ground water *activities* and *collections of information* (databases). Examples of relevant activities are ground water monitoring, solid waste management, and water well permitting. Included are activity-specific local databases as well as large Federal and State databases, covering pollutant sources, hydrogeology, water extraction/use, and other ground water resource considerations. Federal, State, and local government agencies generally sponsor the activities and databases represented here.

The catalog is organized into three parts, an index and two inventory lists:

A. Index of Public Agencies

A by-county tabulation of public agencies with ground water related responsibilities in California, indicating level and type of involvement.

B. Inventory of Activities

A brief characterization of 1,436 individual ground water activities (programs, projects, and studies) conducted by public agencies in California.

C. Inventory of Databases

A brief characterization of 1,037 individual databases that contain information on ground water in California, including how the information is stored and how it may be accessed.

Substantial efforts were made to make the catalog comprehensive and to ensure the accuracy of collected information. However, some relevant activities may have been omitted, and some items may be out-of-date. To avoid misinformation, follow-up contact with the listed knowledgeable parties is recommended.

No conclusions are drawn from the information in this catalog. Descriptive information is presented merely as solicited from and verified by knowledgeable parties.

Chapter I - INTRODUCTION

BACKGROUND

This catalog is an outgrowth of the California Ground Water Information Directory (CGWID), a prototype computerized repository of information pertinent to ground water in California. The CGWID project was initiated in 1985 as part of a larger effort to develop a comprehensive ground water quality protection strategy for California. A number of agencies overseeing the development of the strategy supported the need for the project. The concern was that the effectiveness of many ground water activities is limited by the lack of available ground water information. Those working on ground water issues needed a means of identifying who is involved in related ground water activities, in addition to a means of finding and accessing pertinent ground water data.

An inventory of summary information on ground water activities and databases was initiated as the first phase of the CGWID project. The procedure used to obtain the inventory information follows:

- Identify program managers and knowledgeable parties.
- Contact individuals, explain the purpose of CGWID, and set up interviews on pertinent activities.
- Conduct each interview separately, recording all responses on prepared forms.
- Enter relevant responses into a personal computer and print a synopsis on each activity and database, which are then mailed to each interviewee for their review.
- Periodically reverify all on-going activities and databases.

The inventory of Federal and State government activities was virtually complete in 1987, whereupon efforts were focused on a more extensive inventory of local government activities, county-by-county.

The project plan called for completing the inventory, resurveying the State for any ground water activities or databases that were overlooked or recently initiated, reverifying old records, developing the administrative capability to quickly and conveniently filter through the inventory to provide customized reports on specific ground water concerns, and finally, notifying potentially interested parties that CGWID was available for public access. Unfortunately, funding constraints precluded completion of these tasks. The inventory itself is almost but not quite complete, since about 50 local agencies, only in Los Angeles County, were never surveyed to ascertain if they conduct relevant activities. Moreover, the State as a whole has not been resurveyed for ground water activities that were overlooked or initiated after the initial survey.

Unable to complete the directory as originally envisioned, the CGWID project plan was amended to simply incorporate the summary information already collected into this catalog, and if warranted, consider further work on the project at a later date. The almost complete inventory of activities and databases was thus developed into an index and two lists, comprising parts A, B and C of this catalog. The inventory itself is archived on a personal computer as six interrelated dBASE III files, requiring about five megabytes of data storage.

THE INVENTORY OF GROUND WATER ACTIVITIES

The summary information on individual ground water activities in part B of this catalog falls into three categories:

- Programs:* are activities that continue indefinitely; they may support projects and studies.
- Projects:* are activities of limited duration and scope that result in the development and implementation of solutions to specific problems.
- Studies:* are activities of limited duration and scope that are research oriented, involving collection/analysis of data, evaluation of alternatives, etc.

Activities are represented as individual entries in part B under the name and address of the sponsoring agency. Each of the 1,436 entries includes the following:

- A descriptive title for the activity.
- A narrative description of the activity.
- The geographic coverage of the activity.
- The duration of the activity.
- Keywords (ground water cleanup, monitoring, enforcement, etc.).
- The name and phone number of a reference contact.
- The date a knowledgeable party last verified the summary information.

THE INVENTORY OF GROUND WATER INFORMATION

Collections of information are represented as individual entries in part C under the name and address of the sponsoring agency. Each of the 1,037 entries include:

- A descriptive title for the collection of information.
- A narrative description of the information.
- The geographic coverage of the information.
- The form of the stored information (computer, hardcopy, etc.).
- A common name for the information storage and retrieval system (if any).
- Arrangements for accessing the information (if any).
- The duration of data coverage.
- Keywords (ground water usage, hydrogeology, pesticides, etc.).
- The name and phone number of a reference contact.
- The date a knowledgeable party last verified the summary information.

The inventory acts like a card catalog in a library; it does not contain any data itself, but simply guides one to where it is located.

THE ACCURACY AND COMPLETENESS OF THE INVENTORY

Any sizable collection of information will include some errors and omissions. In addition, descriptive information is subject to interpretation and presents special data handling problems as it is collected, stored, and retrieved for printing.

Substantial efforts were undertaken to make this catalog comprehensive and to ensure the accuracy of collected information. To maintain accuracy, all summary information was printed *after* it was stored on computer and sent back to the original contact for verification. To foster a comprehensive inventory, each contact was requested to provide referrals on related ground water activities; resurveying the State would have been more effective, but was not possible within the scope of this project.

Recognition of the following limitations will assist in making reasonable judgments based on the summary information in this catalog.

Limits on accuracy:

- Summary information is only as accurate as the knowledge and communication abilities of the person supplying it.
- Ground water activities change over time, and it can be up to two years since some items of information in this catalog were last verified by a knowledgeable party. The timeliness of the information can be ascertained by checking the "Last Verified On" date listed under each activity and database in parts B and C.
- Errors can be made during data entry and retrieval. However, these are seldom critical due to the redundant nature of descriptive information.

Limits on completeness:

- The inventory is *almost* complete. About 50 local agencies in Los Angeles County were not surveyed. Other agencies may have been missed by oversight during the initial survey. This catalog currently includes an inventory of 1,436 different activities and 1,037 different collections of information.
- Only a cursory effort was made to include pertinent activities and databases which were initiated *after* an agency was surveyed, up to four years ago.
- The inventory cannot include activities and databases which were not identified by interviewees. In particular, many pertinent *projects* and *studies* are omitted because, during interviews, the priority was on identifying programs and other ongoing activities, deferring inquiries on terminated activities for later discussion.

In cases where these limits may result in misinformation, follow-up contact with the listed knowledgeable parties is recommended.

Chapter II - CATALOG

This chapter is made up of an index and two inventory lists:

A. Index of Public Agencies

A by-county tabulation of public agencies with ground water related responsibilities in California, indicating level and type of involvement.

B. Inventory of Activities

A brief characterization of 1,436 individual ground water activities (programs, projects, and studies) conducted by public agencies in California.

C. Inventory of Databases

A brief characterization of 1,037 individual databases that contain information on ground water in California, including how the information is stored and how it may be accessed.

The "Index of Public Agencies" is on pages A1 to A95, the "Inventory of Activities" on pages B1 to B413, and the "Inventory of Databases" on pages C1 to C335.

PART A

**INDEX OF AGENCIES SPONSORING
GROUND WATER ACTIVITIES
AND COLLECTIONS OF INFORMATION**

STATE WATER RESOURCES CONTROL BOARD MEETING AGENDA

Thursday
July 18, 1991 - 9:00 a.m.
First-Floor Hearing Room
Paul R. Bonderson Building
901 P Street, Sacramento

Questions regarding this agenda - call Maureen Marché (916) 445-5240

**Please note time limitations on presentations may be imposed.
The State Board requests that oral testimony be summarized to
the degree possible. Submittal of written comments is
encouraged to ensure that all comments will be included in the
record before the Board.**

Declaration of Quorum

MINUTES

1. Consideration of the Minutes of the June 20, 1991 Board Meeting.

PUBLIC FORUM

2. **Public Forum.** (Any member of the public may address and ask questions of the Board relating to any matter within the Board's jurisdiction. This need not be related to any item on the agenda.)

UNCONTESTED ITEMS

3-11. **The Board will be asked to approve items 3-11 at one time.** (See below for description of items.)

CLEAN WATER PROGRAMS

12. **Consideration of a Review of Enforcement at Twenty-Seven Toxic Pits Cleanup Act (TPCA) Sites.** (The Board will be asked whether to adopt the proposed resolution concurring with the findings and recommendations identified in the staff report.)
Note: For copies of the staff report contact: James Giannopoulos at (916) 739-4318

13. **Consideration of the Proposed Addition of Article 11, Corrective Action Requirements, to the Underground Storage Tank (UST) Regulations (Emergency Regulations).** (The Board will be asked whether to adopt the proposed addition to the regulations.)

14. **Consideration of a Resolution Approving an Update to the Small Communities Grant Program Priority List.** (The Board will be asked whether to adopt the resolution approving the updated priority list.)

WATER QUALITY

15. **Consideration of Approval of Dairy Waste Task Force Guidance Documents for Use by the California Regional Water Quality Control Boards in Regulating Dairies and Confined Animal Feed Lots.** (The Board will be asked whether to approve a guidance document for use by the Regional Boards in regulating dairies and confined animal feed lots.)

16. **Consideration of Resolution Approving an Agricultural Drainage Water Management Loan for the City of Sanger, Santa Ana Watershed Project Authority, and Eastern Municipal Water District.** (The Board will be asked whether to adopt the proposed resolution approving the ADLP loan.)

SWRCB DROUGHT ACTIVITIES UPDATE

17. **Drought Information Item.** (Staff will advise the Board regarding the substance of any drought-related water right petitions or applications and any delegated action regarding such petitions or applications. There will be no Board action on this item.)

UNCONTESTED ITEMS CALENDAR

Uncontested items are expected to be routine and non-controversial. They will be acted upon by the Board, at one time, without discussion. If any Board Member, staff, or interested person requests that an item be removed from the Uncontested Items Calendar, it will be taken up in the regular agenda order.

WATER RIGHTS

3. Consideration of an Order on the Petition for Reconsideration of the Board Order Amending Terms of Approval of a Temporary Transfer of Water From Yuba County Water Agency for Use in Napa County. (The Board will be asked whether to adopt the proposed order denying the petition.)

WATER QUALITY

4. Consideration of a Resolution Approving a State Revolving Fund (SRF) Loan to the Firebaugh Canal Water District. (The Board will be asked whether to adopt the proposed resolution approving the SRF loan.)

5. Consideration of a Resolution Approving a State Revolving Fund (SRF) Loan for the City of Davis. (The Board will be asked whether to adopt the proposed resolution approving the SRF loan.)

CLEAN WATER PROGRAMS

6. Consideration of Approval of a State Revolving Fund (SRF) Loan for the City of Richmond Wastewater Treatment Facility Improvements (C-06-4039-120). (The Board will be asked whether to adopt the resolution approving the loan.)

7. Consideration of Operator Certification and Training Advisory Committee Appointments. (The Board will be asked whether to adopt the proposed resolution appointing the nominated candidates to the Advisory Committee.)

8. Consideration of Revision to the Federal Fiscal Year (FFY) 1991 UST Grant Workplan and Acceptance of Carryover of FFY 1990 Grant Funds into FFY 1991. (The Board will be asked whether to adopt the proposed resolution approving the addition of carryover funds.)

WATER QUALITY PETITION

9. In the Matter of the Petition of the City of San Bernardino for Review of Cease and Desist Order No. 90-55 of the California Regional Water Quality Control Board, Santa Ana Region. NPDES Permit No. CA105392. Our File No. A-683. (The Board will be asked to adopt an order denying a petition by the City of San Bernardino for review of Cease and Desist Order No. 90-55.)

ADMINISTRATION

10. Proposed Interagency Agreement Between the State Water Resources Control Board and the Stephen P. Teale Consolidated Data Center for Electronic Data Processing Services to Support the Board's Data Management Systems. (The Board will be asked whether to adopt a resolution authorizing the Executive Director to negotiate and execute an Interagency Agreement with the Teale Data Center for data processing services in the amount not to exceed \$247,210.)

11. Ratification of Resolutions 91-40, 91-41, and 91-42 Expressing Appreciation to Lillian Hall, Laurie G. Warnshuis and Frank E. Peters.

Following the meeting on July 18, 1991 the Board may meet to discuss budget matters. There will be no voting.

On July 18, 1991, the Board will be meeting in closed session to discuss the appointment, employment, or dismissal of a public employee. (Authorized under Government Code Section 11126(a).) Please note, closed sessions are not open to the public.

This index summarizes the ground water related responsibilities of public agencies in California. Identified are those agencies which conduct ground water activities or maintain collections of associated information. Significant attributes of the activities and information are tabulated next to the agency name so interested parties can locate summary information relevant to their concerns in "Part B" and "Part C" of this Catalog.

Order of Listing - Agencies are listed first by geographic coverage and next by level of government:

(1) Agencies with Statewide Responsibilities	(a) Federal	(b) State	(c) Local
(2) Agencies with Responsibilities in ALAMEDA COUNTY	(a) Federal	(b) State	(c) Local
... ..			
(59) Agencies with Responsibilities in YUBA COUNTY	(a) Federal	(b) State	(c) Local

then alphabetically within these 59 groups and 3 subgroups.

Column Headings, Explanation

Activities in this Inventory	The word: <u>Program</u> , <u>Project</u> , and/or <u>Study</u> will appear in this column if such ground water activities are conducted by the agency.
Collections of Information in this Inventory	The word: <u>Computer</u> , <u>Hardcopy</u> (paper-based files, maps, or reports), and/or <u>other</u> (microfiche, microfilm, or compact disk) will appear in this column if such ground water information is maintained by the agency.
Pertinent Reports Kept	An "X" in this column implies the agency creates reports on ground water related topics which could be of substantial interest to others in California.
Details on Page	The reader is directed to detailed summary information in Part B and/or Part C.

KEYWORDS for Activities - An "X" in this column implies:

Enforcement	The agency has a role in the enforcement of regulations or laws.
Ground Water Cleanup	The agency has a role in (investigating) the removal of pollutants from ground water or any place with the potential to contaminate ground water.
Ground Water Modelling	Ground water movement or pollutant transport are simulated or studied.
Ground Water Monitoring	Parameters indicative of ground water quantity (for example, depth) or quality (for example, BOD, TDS) are observed or measured.
Permitting	The agency has a role in issuing permits for ground water activities (for example, installation of septic systems, water well drilling).
Planning Activities	The agency develops plans for future ground water related activities.
Site Inspection & Investigation	The agency inspects or investigates specific sites (facilities) for the presence of ground water pollution.

KEYWORDS for Collections of Information - An "X" (or underlined word) in this column implies:

Monitoring (Data type)	The word: <u>Biological</u> , <u>Chemical</u> , <u>Physical</u> , and/or <u>Radiochemical</u> will appear in the column if that type of observation or measurement is stored.
Hydrogeology	Information is stored on hydraulic and geologic parameters that do not change appreciably with time (for example, permeability, soil structure).
Sources of Pollution	Information is stored on natural or manmade sources of pollution.
Waste Disposal	Information is stored on types of waste affecting ground water, disposal methods, or ground water pollution caused by waste.
Well Construction	Information is stored on the construction of water wells.
