

**CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SAN DIEGO REGION**

TENTATIVE ORDER NO. R9-2026-0107

**AN ORDER TERMINATING ORDER NO. 98-84, WASTE DISCHARGE
REQUIREMENTS FOR KAMP ANZA LLC, KAMP ANZA RV RESORT, RIVERSIDE
COUNTY**

The California Regional Water Quality Control Board, San Diego Region (San Diego Water Board), finds that:

1. Kamp Anza LLC owns and operates Kamp Anza RV Resort (Facility), located at 41560 Terwilliger Road, Anza, Riverside County.
2. The San Diego Water Board adopted Order No. 98-84, *Waste Discharge Requirements for Kamp Anza LLC, Kamp Anza RV Resort, Riverside County* on October 14, 1998. Order No. 98-84 established requirements for the discharge of domestic wastewater from an onsite wastewater treatment system (OWTS) serving the Facility. The Facility's OWTS consists of 10 septic tanks and nine leach fields, and receives domestic wastewater from 80 recreational vehicle (RV) spaces, an office and camp store, a restroom, a laundry facility, a house, and an RV dump station. The RV dump station serves 52 unsewered RV spaces and discharges to one of the OWTS leach fields.
3. The San Diego Water Board adopted Addendum No. 1 to Order No. 98-84 (Addendum) on March 11, 2009. The Addendum transferred responsibility for compliance with Order No. 98-84 from Vince Reynolds, John E. and Sandra J. Grant, and Gordon and Katrin Utt to Terry and Marilyn Grant, the new owners of Kamp Anza LLC. Ownership of Kamp Anza LLC was then transferred to Gregory S. Reden on January 5, 2011.
4. Order No. 98-84 must be replaced to ensure that the discharge is regulated consistently with current state policies and requirements. Discharges from small OWTS such as this one have certain common characteristics, such as similar constituents, concentrations of constituents, disposal techniques, and flow ranges; and they require the same or similar treatment standards. The State Water Resources Control Board issued Order WQ 2014-0153-DWQ, *General Waste Discharge Requirements for Small Domestic Wastewater Treatment Systems* (General Order), to regulate these types of discharges consistently throughout the state. Enrollment of the Facility's OWTS in the General Order will provide a level of water quality protection equal to or greater than that provided in Order No. 98-84.
5. The discharge from the Facility's OWTS is less than 100,000 gallons per day and is eligible for enrollment in the General Order based on an inspection by San Diego Water Board staff (staff) on January 14, 2026. Staff determined that the Facility's

OWTS is more appropriately regulated under the General Order, rather than under individual waste discharge requirements.

6. Staff issued a Notice of Applicability (NOA) to the Discharger for enrollment of the Facility's OWTS in the General Order prior to the board meeting on December 9, 2026. The NOA stipulates the Facility's enrollment will become effective upon adoption of this termination order.
7. Adoption of Order No. R9-2026-0107 is not subject to the California Environmental Quality Act (CEQA, Public Resources Code, section 21000 et seq.). Pursuant to California Code of Regulations, title 14, sections 15060(c)(2) and 15061(b)(3), the action to terminate Order No. 98-84 will not have potentially significant adverse effects on the environment because the discharge that was regulated by Order No. 98-84 is now regulated under the General Order. In addition, adoption of Order No. R9-2026-0107 is exempt from CEQA pursuant to categorical exemptions listed in title 14, section 15301 (ongoing or existing projects).
8. The San Diego Water Board heard and considered all comments pertaining to the adoption of Order No. R9-2026-0107 in a public meeting on December 9, 2026.

IT IS HEREBY ORDERED that Order No. 98-84 is terminated.

I, David W. Gibson, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, San Diego Region, on December 9, 2026.

Tentative

David W. Gibson, Executive Officer
