

You are invited to a Panel Discussion on
A Pathway to a Sustainable Water Supply

Invited Speakers –

State Senator Robert Hetzberg ♦ Padre Dam Municipal Water District ♦ City of San Diego Public Utilities Department ♦ County Water Authority ♦ South Orange County Wastewater Authority ♦ Dr. Shane Trussell, P.E.- Trussell Technologies

San Vicente Reservoir

Padre Dam MWD [Advanced Water Purification](#)

Vision –

Working together to achieve an ample, diverse, and sustainable local water supply for the San Diego Region through conservation and water reuse that minimizes dependence on imported water while maintaining and improving water quality.

Critical Issues –

- ♦ How much wastewater can be recycled?
- ♦ What hurdles exist to increasing uses of recycled water and storm water capture?
- ♦ How do we address these hurdles?
- ♦ How much imported water can be saved, if all available recycled water is reused; and how realistic is this goal?
- ♦ What does a sustainable water supply portfolio look like for our future?

Santee Lakes

San Diego Water Board Meeting on
Wednesday, December 16, 2015 at 1:00 p.m. (the [AGENDA](#))
At [Padre Dam Municipal Water District](#)
