Feb 18, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

I stand behind you on your correct decision to reject the Tesoro tollroad.

San Onofre State Beach is a State Park belonging to the citizens. The proposed tollroad would damage the Park and undermine State Park designations. Furthermore, the tollroad will go on to threaten some of the last remaining natural landscapes in San Diego and Orange Counties.

The TCA has no business strong arming the Board into a poor environmental decision. Please reject their request and let this be the end of it.

Thank you very much.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Liz Cook

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

Wisdom has already spoken - The California Coastal Commission and the U.S. Department Commerce turned it down this Foothill Tollroad project.

It has taken millions of years to create our beautiful California Coastline. Mother Nature has given us this precious gift, like Life itself. It is our responsibility to protect our Beaches, Mountains, Rivers, and all living eco-systems!

Remember Dana Point? Once a beautiful surf break and visitor destination, now a marina, such a shame - do you have a boat there, I bet not and now you can no longer visit Tide Pools and teach your children about the wonderful marine life in those Tide Pools once available to everyone.

San Onofre State Beach is a jewel and precious to surfers and beach visitors. It must stay unmolested and not destroyed by the greed of developers and special interest groups.

As you already know: Foothill Tollroad = Ugly Greed and pristine California Coastline destruction!

Your vote must be a continued NO, it is the right and responsible course of action.

STOP THE TOLL ROAD MADNESS!!!

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Scott Hunter

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

It's the undead of highway projects - it just won't go away.

It is unnecessary and would destroy valuable habitat which is uniquely near the coast and in the state park system. This particular state park does an excellent job of balancing preservation and user recreation and its loss cannot be mitigated with land elsewhere.

Thank you for considering my views.

Sincerely,

--Russell Boggs, Ph.D., J.D.

Feb 18, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Frances Emanuel
5706 Cherokee Cir
Simi Valley, CA 93063-5782

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

As a homeowner near the proposed Tesoro Extension, I am very fearful of the Toll Road extension. The extension would run right through the most beautiful valley in the county, my opinion. This valley would best be preserved for future generations, wildlife habitat, and hopefully someday, the most wonderful park system connected with Wagon Wheel Park.

No matter what the proposed Toll Road extension would do to my property value (it may even increase it), that does not matter to me. I bought my home out there because of the beautiful views I see when I drove home everyday after work. To think an asphalt highway would run through that green valley is not approachable or fathomable as a good thing. Please keep that corridor precious.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Garrett Broughton

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Garrett Broughton

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

There is only one reason why I come to the southern part of California is the gorgeous habitat still intact. Only the incredible landscape compels me to come down there - all the cars! The pollution! Why else would I continue making my way down there? Please don't continue the tollroad - or expect even more tourists to avoid SoCal.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

The Tesoro Extension is a deception. After significant public opposition to the Foothill tollroad in the past, I urge you to deny the Tesoro Extension. The pressures of new development should no longer force the county to destroy what little natural habitat and open space is left. Destroying our natural environment to service a new development is horrible planning and costs us all. Please adopt your staff recommendations and deny the Tesoro Extension.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Stefanie Sekich-Quinn

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

For years this project has been turned down by concerned California citizens and forward thinking organizations. This idea is still a mistake and should not be allowed to be completed. Our State Parks are treasures for everyone, not open land to use for a highway.

Do the right thing and help us preserve our State Parks.

Sincerely

Ruby Herrick

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Ruby Herrick

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. michael hardy

Feb 17, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Miss Kyri Freeman

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

It would clearly be a bad decision, and an irrevocable one, to allow construction of the Tesoro Extension. This road would not be a "treasure" but rather, a blight. The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

An alternative routing for this road (if such a connection is important) must be found that avoids such serious impacts on the environment. I am reminded of the situation regarding Highway 1 in the "Devil's Slide" area just south of San Francisco, where an alternative route that badly impacted a small State Park area was finally rejected in favor of a tunnel alternative that soled the road failure issues with minimal impact on the adjacent park and open space areas.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

As a concerned citizen, I am asking you to deny the Tesoro Extension.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach.

The California Coastal Commission and the U.S. Department of Commerce turned it down.

Relocation of the riparian habitat is unacceptable. And it would take more than 10 years for the habitat to grow back!!

This is one of the last natural watersheds on the west coast. There are other alternatives for this road.

This is the 4th time they have attempted to overthrow the denial for this pay highway which will destroy this State Park and it's natural watershed!

Please deny this extension like all the boards before you did.

Thank you for preserving our public lands and natural habitats for future generations.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Caroline Payne

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Dea Maurizi
1821 Fenwick Pl
Santa Rosa, CA 95401-8410

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

As I cannot seem to change the above message, this part of it is to say that I thoroughly approve of the extension. We live here and are thoroughly fed up with the bottleneck created by the I5. If you cannot come up with a viable alternative, shut up.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Andre Lotz

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Miss Mariah Smethwyck

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion. This is not only detrimental to protected wildlife but also to tourism, the surfing community, and the military community. San Onofre Beach is famous for the surfing community. Adding more traffic would adversely affect the security of the military base and harm the beach in which military families enjoy, and tourism would also be adversely affected for the State Beach which is a protected state park. A toll road in this area is a horrible idea and would not benefit anyone.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Lisa McGinn

The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

More roads that destroy plant and animal habitat only make life in Southern California worse. Not only do the additional roads not make a long-term difference in traffic, they destroy one of the major reasons living here is so pleasant, native California plants and animals.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Stand firm against Transportation Corridor Agency! They are only interested in this project for the mighty dollar. The TCA is NOT interested in saving or protecting Southern California's intact habitat lands. This proposed tollroad isn't needed.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

We are currently enjoying our retirement by spending much of our time RVing along the Southern California coast. We recently spent a week visiting San Onofre State Beach where we found out about the plan to run a road thru this special area.

"The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach".

Please do not cave to pressure and please do not let this road be built!

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Miss Anne Schellman
2949 Portage Bay W
Davis, CA 95616-2855

Feb 16, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

In my short fifty years here in Southern California, I have witnessed unbridled urban sprawl, unprecedented demand on resources, significant issues of water availability, bursting landfills, depletion of police and fire availability, and the list goes on.

Though some would disagree, it is clear Southern California is "full". I'm reminded of the old joke, "I still have checks, how can I be out of money?" When it comes to Southern California, that's absolutely true. There's simply no more room to cram more and more and more people, houses, cars, trucks, SUVs into this already over-burdened system. As a result, we have systematically destroyed anything that resembled what Southern California was once known for with houses, roads, stores, over-crowding, over-use, and a general disregard for the future.

To prove my point, here stands another opportunity for us to either cut away at what is left, or hold strong and do what must be done to preserve the little that remains of the true Southern California. The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. And for what? The convenience of those who chose to be where they are and now want to sacrifice the legacy of all Southern Californians? To open development to even more and more and more buildings, roads, cars, trucks and SUVs and less and less natural, diverse, endangered and necessary habitat? A living example is the tollroad that cuts through O'Niell regional park in Trabuco Canyon.

A once pristine escape from urban sprawl and habitat to many wonderful and diverse creatures, it has now become nothing more than a city park with the 24-hour a day drone of cars, trucks, SUVs and obtrusive lighting. In fact, part of this park has actually been closed because it was bothering residents whose houses were built long after the park came into existence.

The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

We the people who have spend a lifetime working hard to keep Southern California a place of wonder and beauty, a home for many and a gem for all, need to recognize that enough truly is enough.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Adam Smith

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

NO TOLL ROAD STOP THE SPREADING OF URBAN RUNOFF, SMOG AN ROAD KILL.

MICHAEL L HOAG
415 LOMA TERRACE
LAGUNA BEACH

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. MICHAEL L HOAG

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Although I am not a resident of San Diego, I have made several trips to the area in the last two years. I have enjoyed the Tijuana Estuary, Torrey Pines, La Jolla Beach, and Imperial Beach. I make frequent use of State parks in the San Francisco Bay area, and feel very strongly that our parks enhance our lives in numerous ways. Please do not allow disruption of this very important habitat.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Seana Reilly

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Development of suburban sprawl has destroyed far too much sensitive and beautiful habitat. In my own neck of the woods (chaparral) I have watched with dismay as lax permitting has allowed developers and the Veterans Administration to destroy vernal pool areas with endangered species here in San Diego (Regents Rd., and the 52 and 805 Freeways).

And evidence of obvious Indian habitation labeled detritus by politicians so as not to delay construction of the 56 Freeway and its over-sized overpriced and thirsty suburbs.

In Orange County, the Route 73 Toll Road is an outright environmental disaster and failed venture.

Development of open space is low-hanging fruit. The easiest money for a few, but with the greatest destruction to habitat and quality of life for all residents.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Max Dunseath

Feb 16, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Janice O'Connor

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Elfi Gilford
107 Edith St
Petaluma, CA 94952-3221

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. The Transportation Corridor Agency then came up with a strategy to first construct the northern segment of the Foothill tollroad, called the Tesoro Extension, thus creating pressure for completion. The Transportation Corridor Agency's strategy disregards the strong evidence that the entire project, including the Tesoro Extension, adversely and irreversibly affects the lands, watersheds, wildlife and recreational values of San Onofre State Beach, San Mateo Creek Campground, and especially, the water quality which depends on the resources contained within and surrounding these parks. This project should be stopped, because it destroys what is irreplaceable. In an era of extreme drought in California, water is far more precious than a project which is designed for the convenience of a privileged subset of the population. We all depend on water for our lives. Please adopt the staff-recommended findings which originally led to denying the Tesoro Extension.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. William Miller

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion. Orange county always makes surrounding counties pay for their infrastructure. This is just another example. And by cost I mean using surrounding counties land to support infrastructure. They did this to Riverside county to expand the Prado Flood control basin. Riverside lost property taxable land while Orange county gained property taxable land. It is time to tell Orange county enough is enough.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

So much of California's natural wild areas have been destroyed so it is important to protect what is left. We already have a State park that is protecting a wonderful wild area so we should continue to protect it. A road through the area does not belong there.

Sincerely,
Jeanie Scott

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

Although I live a bit further North, I am frequently in the area where there could be a toll road. That would be a huge error.

Please do not approve this toll road. Thank you.

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Once the first piece of earth is moved, you have begun the destruction of habitat lands. You cannot reconstruct the environment once you destroy it. Developers cannot trade this piece of land here for another piece someplace else and call it even. This area is unique.

It is California.

Deny the Tesoro Extension.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Joseph McCabe

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The proposed construction of the Tesoro Extension is transparently a ploy to create pressure to overturn the established, correct, denials of permits to build the Foothill tollroad through San Onofre State Park. Neither the tollroad nor the extension is beneficial to San Diego water quality, the local environment, or to the general welfare of San Diego County. Please respect the careful work of your staff and adopt the staff's findings.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

I have lived in California all my life and whenever I visit a beach I value it free of roads that cut it in half. If this tollroad is built, it will cut San Onofre State Beach in half. It will destroy valuable habitat lands in two counties. Already, the U.S. Department of Commerce and California Coastal Commission have denied it being built. So please do not allow the Transportation Corridor Agency to build the Tesoro Extension. Instead, please respect the ecology of the beach and all the people like myself who want San Onofre State Beach to remain clean toll road free for generations to come.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Evan Rosenbaum

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Gail Ryland

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

This misguided proposal won't seem to go away! Tollroads are not the future (see the 125 as an example) and this Tesoro Extension is a step in that direction. Add the likely affect on water quality specifically and the environment in general, and the Foothill tollroad is a nonstarter at best. Please do not let the Transportation Corridor Agency continue with this boondoggle--at some point, local citizens, the Coastal Commission, and the federal Commerce Department must be heeded. It is the law and commonsense.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Feb 15, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Darius Fattahipour

San Diego, CA 92108
RB9_DredgeFill@waterboards.ca.gov

Dear Chair and Members of the Board:

For over 30 years I have worked with water agencies in Southern California, the Mojave Basin, and the San Joaquin Basin. The agencies I've worked with have always stressed the need to protect water quality in all types of development. We have always sited facilities to minimize overall effects to surface water and groundwater. This is even more critical in a period when water resources are increasingly under stress.

I am thus concerned about the Tesoro Extension. Please adopt the staff-recommended findings for denial of the Tesoro Extension. The expansion will fragment some of the most important habitats in Southern California, and will affect water quality in drainages throughout the area. Staff findings reflect this and reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality.

What was once a complex and functional ecosystem is already damaged substantially. There are options and opportunities to this transportation project, and the overall effects of the proposed project need to be addressed comprehensively. In this case, it is critical that the least damaging alternative be identified and selected.

Sincerely,

Jud Monroe, Ph.D.

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion. The San Mateo Watershed is a biological hot spot, it is the last free flowing creek from its point source to the ocean unobstructed. The pristine water quality would be destroyed, and many endangered species with it. The tollroad will not alleviate traffic but will only further open up the area it serves to housing development. Please do not approve this flawed project.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Lisa Kerr

Feb 15, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Dr. Victoria Foley
2540 Iris Way

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

If the proposed route was followed this toll road would ruin some of the most pristine and intact habitat lands in Orange and San Diego Counties and it would slice up San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down.

It is time to refuse permission for this Toll Road. We cannot keep putting human interests before those of the environment and the animals who live in those intact habitats.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Eleanor Thomas

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Completion of this toll road would be a tragedy. It would be harmful to the habitat it would bisect, and it would have a terrible visual impact for all. My husband and I travel along this corridor and go to this State beach on a regular basis. We would be horrified if the Coastal Commission and the US Department of Commerce were to reverse their already informed and correct decision to turn down the TCA's crazy desire to destroy this CA resource.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Mary Haller

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The "project" is NOT just this short extension proposal, but the entire remaining length of the toll road. For the Transportation Agency to think they can break the project into smaller and smaller pieces in some attempt to circumvent the law is not only against the intent, but also the letter of the law. They should be ashamed!

When they are willing to spend the money, not on lawyers supporting a doomed plan, but on coming up with an environmentally sound alignment plan which avoids impacts to the state park and Trestles, then we know they have at last gotten the message: WE DO NOT SUPPORT THEIR PLAN.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Feb 15, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Gilda Garcia
5625 Rose Mist Ct
Elk Grove, CA 95757-8316

California does not need to destroy a wildlife habitat for a toll road.

This state is in a severe drought caused partly by our use of fossil fuels. Scientist predict a mega drought in the future that will last

50 years if we don't cut back on fossil fuels and other factors causing global warming. What do we do? Cement wild habitat for cars and put our state at greater risk for a mega drought and disaster.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

This road has already been rejected by the California Coastal Commission and the U.S. Department of Commerce because of the damage it would do to sensitive habitat and Trestles/San Onofre State Beach. Why is this road project by the Transportation Corridor Agency trying to sneak through again, pretending that building the northern part of the road, the Tesoro Extension is somehow Ok and would never necessitate building out the road to the south.

The people of Southern CA have already strongly voiced their opinion that this road should not be allowed, so it is time to listen, once again, to the people and various organizations that have fought against this road. Southern CA has fast disappearing natural habitat; this area has been recognized as sensitive and worthy of protection.

Please deny the Tesoro Extension. Thank you.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Feb 15, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Colleen Matarico
1954 Cheremoya Ave
Apt 5
Los Angeles, CA 90068-3544

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

Dear San Diego Regional Water Board,

Stop the Foothill Tollroad!

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

This tollroad is so wrong! Stop this and keep our habitat lands intact.

Sincerely,

Penny A. Braund

My family and I surf this beach area. The destruction of more California rare beach side habitat for the creation of ANOTHER road is intolerable. Most of the coast's wetlands and sagebrush habitat has been converted to human uses already. Protect what is left of our ecological patrimony for the next generations.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. don green

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

Disruption of our established State Parks should be based on extraordinary needs, and I do not think the toll road rises to that level. This construction would create unacceptable adverse effects on the Park's natural state.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Feb 14, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I LOVE SURFING IN THAT AREA AND CAMPING AT SAN MATEO AND DO NOT WANT THE THE PRISTINE BEAUTY DESTROYED.
STOP F***ING WITH THIS TOLL ROAD BS !!!!!!!

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. STEPHEN BOVA

The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

It is a violation of CEQA to cut a project in half in order to have it accepted. This is clearly their tactic in this case. It is illegal to avoid considering the full impacts of a project by breaking it into parts; the courts have ruled on this time and again. I applaud the Regional Board for holding the line on the law.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Feb 14, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

California has a need to repair and recondition old freeways. I urge you to deny the Transportation Corridor Agency constructing any partial work on this tollroad. The destruction to this important habitat and the dividing the State Park is criminal in my eyes. Above all water quality is of utmost importance.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Betty Normand

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

This plan is destructive to intact habitat lands in two counties, Orange and San Diego.

Abandon the completion of the Foothill toll road now. It is quite clear the strategy of constructing the northern segment to put pressure on completion is purely political ! !

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Lisa Nettleton

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

To whom it may concern:

I have had personal experience in the past of trying to drive a road that has migrating wildlife crossing it, following ancient migratory routes engraved within their very genes. It is sorrowful to lose any life, but especially in an area that is large enough to provide habitat and sbreeding space for endangered species.

This does not even count the risk of people trying to cross the road.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Please consider carefully the choices before you. They will reflect where your hearts and community concern really are.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion - a very obvious ploy.

State park lands must be protected keeping outside agencies from using these lands in a willy-nilly fashion for non-park purposes. Many organizations have been working hard to prevent the toll road from destroying San Onofre State Beach for many years. Please protect the state parks lands for future generations to enjoy.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Mary Burwell

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion. This strategy is an affront to the people of California and would have the potential to destroy a beautiful area of California's few remaining open coastal areas.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Raymond Santana

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion - a very obvious ploy.

State park lands must be protected keeping outside agencies from using these lands in a willy-nilly fashion for non-park purposes. Many organizations have been working hard to prevent the toll road from destroying San Onofre State Beach for many years. Please protect the state parks lands for future generations to enjoy.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Feb 14, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Kathy Wallington
13792 Highway 8 Business Spc 24

San Diego CA 92108

Dear Chair and Members of the Board,

The California Coastal Commission and the U.S. Department of Commerce denied permission to construct the Foothill Tollroad because it would literally bisect San Onofre State Beach, and other alternatives exist. Please adopt the staff recommendation and deny any permits for the Tesoro Extension. The Tesoro Extension is just an end-run around considering the totality of the Foothill Tollroad's impact upon water quality. Thank you for the opportunity to comment.

Respectfully,

Mary Lou Rosczyk

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. H Schwartzman
Chula Vista
Dana point, CA 92629

Feb 14, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Brenda Travis
4317 W 153rd St
Lawndale, CA 90260-2118

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

There must be a complete; I don't mean "mostly" complete, I mean 100% complete set of all the studies done, even if there needs to be further 'studies' done if or when there becomes something that was previously unexpected comes up that warrants another 'study'.

Example: The Willits Bypass will in all likelihood destroy or at least it will undoubtedly cause irreparable damage to the wetlands it goes through (The latter being the best case scenario environmentally speaking).

There was a viable alternative to the Willits Bypass but there were political interests in "getting it done" within a predetermined time-frame (CALTRANS had it's collective mind made-up) so the viable alternative/s was/were not sufficiently studied because it was not even honestly or seriously considered in the original 'study' that was done, nor were Native American historic Cultural, rights by national or international treaty and US law regarding 'sacred places that have significant 'historic value and artifacts that should have been known about before approving such a project as the The proposed Foothill toll-road project is.

Also, if the cost of thorough and 'complete' studies are claimed to be "too costly" or too time-consuming, than the The "Foothill toll-road" project as it is should be 100% scrapped.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Relocation of the riparian habitat is unacceptable and that's what they said they said they wanted to do at the last meeting. It would take 10 years for the habitat to grow back!! What will the wild life do in the meantime? This is one of the last natural watersheds on the west coast.

Unacceptable! Also taking over State Park public lands that were established in perpetuity (which means forever) by President Regan himself is unacceptable. There are other alternatives for this road and they won't consider them. This is the 4th time they have attempted to overthrow the denial for this pay highway that will cost \$15 one way to travel on while destroying this State Park and this natural watershed!

They just keep trying to sneak in and take over the route that will ultimately destroy and take over 60% of a state park. If they succeed it would set a precedent an ultimately developers could do this in any other state park or in natural habitats all over the country! They have not indicated where this road would hook up with the 5 freeway and think that building in segments (which is illegal) they will get this destructive road through! Please deny this extension like all the boards before you did.

Thank you for preserving our public lands and natural habitats for future generations.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Subject: Support 241 Toll Road's Waste Discharge Requirement Permit

I support the Waste Discharge Requirement (WDR) permit submitted by the Foothill/Eastern Transportation Corridor Agency (TCA) for the Tesoro Extension project in Orange County.

Well-planned transportation and infrastructure projects like the Tesoro Extension build prosperous communities. With the large-scale residential/commercial construction underway at Rancho Mission Viejo, it's vital that I-5 have an alternative route - that route needs to be the 241 Toll Road's Tesoro Extension.

TCA will create, restore and/or enhance 34.82 acres of habitat for .4 acre of impact the extension will have. TCA will utilize best management practices to maintain existing drainage flow patterns and treat all road runoff to the maximum extent before discharging to receiving waters to maintain existing beneficial uses and meet water quality objectives established by the Regional Board and the Water Quality Control Plan for the San Diego Basin.

Join me and support TCA's WDR application.

Sincerely,

Harriett

Subject: Support 241 Toll Road's Waste Discharge Requirement Permit

I support the Waste Discharge Requirement (WDR) permit submitted by the Foothill/Eastern Transportation Corridor Agency (TCA) for the Tesoro Extension project in Orange County.

Well-planned transportation and infrastructure projects like the Tesoro Extension build prosperous communities. With the large-scale residential/commercial construction underway at Rancho Mission Viejo, it's vital that I-5 have an alternative route - that route needs to be the 241 Toll Road's Tesoro Extension.

TCA will create, restore and/or enhance 34.82 acres of habitat for .4 acre of impact the extension will have. TCA will utilize best management practices to maintain existing drainage flow patterns and treat all road runoff to the maximum extent before discharging to receiving waters to maintain existing beneficial uses and meet water quality objectives established by the Regional Board and the Water Quality Control Plan for the San Diego Basin.

Join me and support TCA's WDR application.

Sincerely,

Sam

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Raymond Bailey

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

State parks are, by definition, protected lands and therefore outside agencies may not make use of these lands for non-park purposes. State parks should be protected.

There is an alternative to this tollroad, the purpose of which is to relieve congestion on the San Diego Freeway. A better alternative would be to make the existing freeway double-deck, with the lower deck for southbound traffic and the upper level for northbound traffic. In doing so, no additional land is required to be taken. This practice is common in many places around the world.

It is imperative that we preserve natural open space, as once it is developed, it is no longer natural for our own enjoyment and that of future generations. Please protect these lands and deny the extension of the tollroad.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Daniel Gribble

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

Dear SDR Water Board,

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach.

Please save the beach and ocean front. We need less cars and more natural habitats in this world. Haven't you been watching the news?

People should take their time to drive around to their destination knowing the beaches are preserved.

Please vote NO on this toll road.

Sincerely,
Eileen Roberson
PO Box 703
Arnold, CA 95223

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Eileen Roberson
PO Box 703
Arnold, CA 95223-0703

I grew up down in this area and the thought of a toll road running through this land so that a bunch of rich people can drive a little faster is ludicrous. The rich Newport people got their toll road through the Laguna Hills and it sits empty a lot of the time.

Widen the existing freeway - it can be done. Yes, it will cost money.
Raise gas taxes on all of us - do it.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Relocation of the riparian habitat is unacceptable and that's what they said they said they wanted to do at the last meeting. It would take 10 years for the habitat to grow back!! What will the wild life do in the meantime? This is one of the last natural watersheds on the west coast.

Unacceptable! Also taking over State Park public lands that were established in perpetuity (which means forever) by President Regan himself is unacceptable. There are other alternatives for this road and they won't consider them. This is the 4th time they have attempted to overthrow the denial for this pay highway that will cost \$15 one way to travel on while destroying this State Park and this natural watershed!

They just keep trying to sneak in and take over the route that will ultimately destroy and take over 60% of a state park. If they succeed it would set a precedent an ultimately developers could do this in any other state park or in natural habitats all over the country! They have not indicated where this road would hook up with the 5 freeway and think that building in segments (which is illegal) they will get this destructive road through! Please deny this extension like all the boards before you did.

Thank you for preserving our public lands and natural habitats for future generations.

Sincerely

Julianne Bradford
1510 Rolling Hills Dr.
Oceanside, Ca. 92056

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. JOHN VALLE

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. pamela hamilton

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. William Starmer
1101 Park St
Alameda, CA 94501-5229

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

I grew up in SoCal and spent almost every weekend surfing in Leucadia, Encinitas, & San Diego. Bad enough that the coastal cliffs, fields and tomato patches were covered with houses but now the last of coastal California's wetlands and wildlife struggling to live on these tiny islands we've created for them, are threatened to extinction from this area. We have enough roads.

The California Coastal Commission and the U.S. Department Commerce have turned this project down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Please do the right thing and vote against this project.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Wynne Benti

Feb 14, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Shelly Skoog-Smith

Feb 14, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Tia Ja
14938 Camden Ave

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Marion Klein

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would bisect some of Southern California's most intact habitat lands in Orange and San Diego Counties. Because it would literally cut in half the beautiful San Onofre State Beach, both the California Coastal Commission and the U.S. Dept of Commerce rightly turned it down.

Despite this, the Transportation Corridor Agency came up with the transparent "strategy" of first constructing the northern segment, called the "Tesoro Extension" to create pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Carol Lonergan

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Jon Anderholm

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I have seen first hand what the increase in traffic due to the widening of Ortega Highway and the residential build up of Rancho Mission Viejo has done: the plentiful wildlife that used to roam near Ladera Ranch has nearly disappeared. The current roads are sufficient for the current population. This additional road will create a market for developers that will build more houses. More people will stretch the already thin water resources and damage the beautiful natural resources of the area.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Feb 14, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Kathryn Butterfield
67345 Oris Dr
Desert Hot Springs, CA 92240-6274

I do not want a road bisecting the beautiful San Onofre Beach habitat area!!!!

Please don't let this happen.

Although I live in Northern California we vacation a lot in Southern California. Development of homes and roads have ruined so many natural areas. We have a special affection for San Onofre because my husband was stationed there for basic training in the Marines.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Julie Williams

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. DAVID MACTAGGART

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Janis Wilson-Pavlik
11 Jet Ln
Carmel Valley, CA 93924-9528

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

I can't believe this is rearing its ugly head again. In 2008 I attended the largest public hearing ever held by the Coastal Commission which after a 12 hour session voted against this toll road. Then the Bush administration-appointed Commerce Department officials upheld that decision, and some years later I was pleased when the Water Quality Control Board at a standing-room only meeting in San Diego turned down the toll road proposal. When are its proponents getting the message!?

It's not our problem that Orange County overbuilt and now wants to tear up the landscape to accommodate its residents and cater to the Chamber of Commerce.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. It also would impact a sacred surfing spot, Trestles. Building the Tesoro extension is just to get the foot in the door and then demand the completion of 241 through San Onofre and other habitats.

Please tell the Transportation Corridor Agency once and for all that you will not let them go ahead with this road. Thank you.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. penny good
1406 W 37th St

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Joel Cruzada
34726 Boros Blvd
Beaumont, CA 92223-7467

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

As someone who grew up in Southern California, I know all too well the fascination we have with building more roads. I left Southern California because the quality of life brought on by auto dependence was just too poor. I know that Southern California is filled with beautiful beaches and mountains, and yet we have not given them the due protection they deserve.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Protected park lands must remain protected, especially when the project plan calls for bisecting essentially the entire length of the park habitat. No part of this toll road should be allowed to destroy significant public park lands.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. marc Cooper

STOP THE TOLLROAD!!!!!!!!!!!!

The tollroad is NOT needed and ENVIRONMENTALLY DESTRUCTIVE!

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

DENY any "get around" from responsible decisions.

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

I do not understand why projects such as this should be built through State Park Land!!!! Aren't the parks set aside for the people of California? Shouldn't the parks be there for our children? Often mitigation is proposed, but that is also taking away the reality of the nature and history that our parks protect. I urge you to follow the precedent already set to turn down this application, and stop the proponents from wasting my money with their insidious proposal.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Arlene Halligan
359 El Faisan Dr
San Rafael, CA 94903-4515

in 1972 President Nixon tried to get some(6 miles of the coast line) of Camp Pendleton released to sell to BeBe Rebozo. Congress reacted making the President the commander-in-chief of every armed force base EXCEPT Camp Pendleton. . .savings over 35 miles of the pristine California Coastline. . .NOW you need to stop this Toll road as th "People" of California deserve better. Please act using your conscience!!!!!!

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The lands, and resources of the PEOPLE of the State of California are Senior to the Profits of a few. The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Scott Peden

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Richard Jacobel
PO Box 781
Oakhurst, CA 93644-0781

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I understand well the impact of toll roads on the environment. Some of the most beautiful preserved wilderness space surrounding the town of Laguna Beach is intersected by the 73 freeway. The sounds of cars in constant motion from the traffic follows one on the trail. What a shame that there is no escape from the noise pollution, from the confinement to one's freedom of movement while hiking this land, and from the endurance of other environmental effects of freeways and cars while seeking the solitude and peace that nature provides. Restoring ones sense of balance in this fast paced world is essential to good health.

The last vestiges of unspoiled land and open space should be safe guarded and protected at all costs. Transecting the land and beach areas with roadways is an assault on these values. Keeping San Onofre State Beach whole and pristine for the current generation and for the generations to follow should be a sacred goal of anyone in the position of leadership promoting the public welfare. PLEASE, act responsibly and with true vision. Do not place a freeway in the location of San Onofre State Park or promote a segment of toll road that would encourage an extension into adjacent park land.

Sincerely,
Pamela Horowitz

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

I am a driver and understand the need to ease congestion on our roads.

The Foothill tollroad as currently planned, however, would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion. I strongly disagree with such a strategy. Piecemeal should no longer be a viable way to get around careful, thorough examination of effects.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Judith E Kahle
343 Wyoming St
Fairfield, CA 94533-5146

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Patricia Arakaki
21884 Monte Ct
Cupertino, CA 95014-1144

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

To enable construction a road through sensitive wetlands & habitat, and damage a unique and popular State Beach, would be irresponsible and disrespectful of the many Californians who value and use that beach.

The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the sneaky strategy of first constructing the northern segment in an attempt to create pressure for completion through these precious habitat and State Park lands.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Joan Forman
1743 Axenty Way

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

As a scientist and California citizen I find the Foothill Tollroad a terrible project. The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

It makes no sense to allow this project to move forward until we see the scope of the project in its entirety. An environmental impact study for the entire project needs to be submitted BEFORE ANY Permits are even given consideration!

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Rick Nevitt-LaMantia

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego rCounties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I grew up in PA where road building always took precedence over what we the public might want. We couldn't stop roads to save any precious areas. CA is better than that! Here we the people ARE heard and WE oppose building of this toll road through precious coastal lands. Please continue to oppose building of this toll road.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Hilda Leefeldt
14 Gomez Way Apt 16

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Let the Tesoro Extension be the road to nowhere....

I don't even believe in toll roads. They put a chill on ordinary Americans being able to go from one place to another, with no alternatives but to drive a car. We still have no decent rail system in our backward country. It is a denial of the right to move around Southern California freely in this modern age. Increase the gas tax and stop toll roads.

We've been battling for a clean, safe, environment since at least 1970, when we had the first Earth Day. Enough intrusions!

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Jane Woehl

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. nancy szymczak
3647 Adams St
Carlsbad, CA 92008-2508

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Ethan Lewis
433 Kate Hayes St
Grass Valley, CA 95945-7312

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

Less nostalgia than commitment to Californians is the definition of protected lands comprising our state parks. With your decision, you can affirm the unwavering assurance that these lands remain unmolested by transportation development or any other non-park structures, for our own and many future generations. Any decision to the contrary would be a breach of public trust, setting an incautious precedent.

Within the narrower purview of the Regional Water Board, staff has done its job and its recommendation for denial, based upon water quality concerns, is commendable.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Don Spano

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Kathy Govreau
9853 Lanning Ln
Morongo Valley, CA 92256-9419

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Brett Dennison
12622 Haster St
Garden Grove, CA 92840-6041

Tell the Toll Road planners to take "NO" for an answer. We've fought this battle once at Trestles.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

This toll road is a bad idea on nearly every level!

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Freda Hofland
27070 Sherlock Rd
Los Altos Hills, CA 94022-4239

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

The egregious act by the TCA was folly and should not be regarded as precedent-setting for a southern Tollroad segment. It is far more important that the California Coastal Commission and the US Department of Commerce have turned down the Tollroad as well as the extremely destructive precedent it would set for all of California's State Parks.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Patricia Matejcek

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

The addition of a new road would in the future provide reason for building housing and industrial complexes that would require services including water that are currently short of required demand, causing further damage to habitat and increase pollution.

Please reject the request for a part or all of the Foothill Tollroad that you will be considering during your 16 March 2015 meeting.

Sincerely,

Peter E. Davis
22639 Iris Avenue,

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. James R Moser
325 Mangels Ave
San Francisco, CA 94127-2409

Dear Chair and Members of the Board:

As a concerned citizen of San Diego County, I implore you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

Thank you for considering my views and the views of many other citizens concerned about the precious natural resources of Southern California.

Sincerely,

Stephanie Hines

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Dr. ronald green

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

This land was set aside as a park for a reason: because it is special.

Its beauty, and the extent to which its natural, original condition has been preserved, make it too important a site to despoil with road construction and the grime that permeates all roads. This land is much too special to sacrifice for just another road.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Marilyn Regan
9559 Manzanita Ave
Ben Lomond, CA 95005-9425

Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

The transportation corridor agency should not be rewarded for arrogant and intimidating acts. Maybe they should be fined for attempting to manipulate the US dept of commerce and the california coastal commission So what if they constructed the north segment? Enough habitat has been destroyed or compromised in this country/world.

Do the right thing for our planet, people and animals.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. lorraine leonelli

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

There has to be a limit to the insatiable demands of "traffic." We want to see fewer cars on the road, and increased protection for the environment. This toll road must be stopped. It is not worth the irreparable damage to the environment..

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Cristina Smith

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Kristen Robins

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Geraldine Donigan

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Craig Guenther

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

This cannot be allowed to happen. They have no right to 'force' us into anything! Too much of our land is being torn apart for various reasons as it is and we are all paying for it one way or the other. All beaches, state parks and wildlife habitat that is left here needs to be protected in they're entirety forever. If you let one project go, then everybody wants to jump on board with more projects for these sacred parts of our country.

We have to start making a stand against these greedy companies who think it's okay to violate any property they choose for their own purposes. Too many have already taken advantage of this state and country and it has to stop. It's getting out of control.

If climate change continues, this area will one day be submerged under the ocean and it would be a waste of time and money anyway.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Annette Howell

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion. This is would be very destructive to our precious environment and wildlife in Southern California. Please to not do this!

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Julie Sanford

I am fed up with the efforts to nibble away at the integrity of our State Parks!

Please (finally) take NO! for an answer rather than adopting the transparent play of building the "northern extension" and thereby create greater pressure for construction of the whole road.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Bruce Reinik
4747 Montgomery Dr
Santa Rosa, CA 95409-4252

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Percy Severn

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

It is very bad public policy to allow roads through state parks and other protected lands! Don't allow this precedent setting plan to happen.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Jennifer Gardelle
21372 Brookhurst St Unit 611
Huntington Beach, CA 92646-7311

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

This stealthy tactic shows the ruthlessness of the backers of this toll road. Many earlier tactics have been soundly defeated but they keep trying again. We can only hope that they are exposed as not valuing the sanctity of our parks nor the wisdom of the many agencies who have already spoken against this toll road. Please do whatever and everything you can to stop this toll road which threatens a wild and diverse ecosystem whose beauty must and should be preserved.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Evelyn Kirby

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

Please STOP and consider the consequences of allowing more roads in sensitive land. This extension and following Tollroad will destroy precious resources far more valuable than saving a few minutes or miles for the cars and trucks commuting on a path through now rare intact space. Time is out for thousands of acres of relatively safe environment for the birds, plants and animals of the coast. The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I urge the Regional Board to finalize the decision, to adopt the decision on March 16, 2015 to deny further construction and to refuse the Tesoro Extension for now and forever.

Sincerely,

Beth Wakelee

1479 Bloomfield Road

Sebastopol, CA 95472

Submitted by a concerned taxpayer and

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Beth Wakelee

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Kelcey Jacobsen

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I have family in both Orange and San Diego Counties, and visit the area very often.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Susan Trivisonno
2810 Oak Estates Ct
San Jose, CA 95135-1213

I formerly lived in Northern California, and it is much more protective of the coastal areas...It is time that Southern California realizes that destroying the natural beauty of the coast is destroying the beauty of Southern California!! And also contributing to the environmental crisis which faces our children and grandchildren.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

This proposed toll road cannot be completed without serious environmental impact on State protected parkland. You are a public agency charged with PROTECTING the PUBLIC INTEREST. The general public is not well served when a toll road, which, by definition, excludes the general public who can ill afford to pay the toll, threatens to destroy land which has been specifically set aside for ALL to enjoy. This Parkland was meant for the preservation of nature and the enjoyment of the uncivilized natural habitat that exists there. A road through this area would significantly disrupt this landscape!

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. David Gaines

The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. David Osterhoudt

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Yvette Doublet-Weislak

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

This Foothill Tesoro Extension tollroad has been denied and they should not keep bringing it back, hoping to wear everyone down to then allow it.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Please deny it once again and somehow put a stop to continual renewal requests for it. NO means NO!

Thank you.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. anthony montapert
1375 Ficus Way
Ventura, CA 93004-4867

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I am against toll roads in California. As tax payers we already "donate" for our good roads. Why should we then PAY to use them? I'm also a old time natural lover. Heavy toll highways can be built inland, but leave the coastal regions preserved

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Jean Anderson

Our park lands are precious - certainly for the creatures who live there - and by the now and future generations that should be able to

enjoy the sights, the sounds, and the presence of wildlife. The intrusion of a toll road is unacceptable!!!!

It is totally out of the question and the plan should immediately be abandoned.

Respectfully,

John & Arvie Degenfelder

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The proposed Foothill tollroad would run through some of our most intact habitat lands in Orange and San Diego Counties and would literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. The Transportation Corridor Agency first constructed the northern segment, "the Tesoro Extension" to try to force the Coastal Commission and Department of Commerce to allow the completion of their desired route.

I do not believe that bullies deserve to win. If the Transportation Corridor Agency chose to construct one half of a project knowing that the second half was not approved, they should have to come up with a different plan for the completion of their project.

Please protect our parks, protected habitat and water quality.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

As a person who understands the value of park lands to protect endangered habitat and species and respects the great traditions of protecting public lands for the health of the people, I say no to destroying San Onofre State Beach with this ill-considered action.

Michael Rodriques

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Michael Rodriques

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion. Why is this even an issue? This was decided by the people a long time ago, Just goes to show you, what money from greedy private enterprise can do, when they know that going broke will mean a tax payer buyout at a handsome profit. I can't believe the people in California, and Southern California in particular, can be so ignorant! We must fight to stop this now.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. JAMES HOLLIDAY

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion. This is precisely the same strategy which Canadian oil companies, owned by the Koch brothers, have used to drive an ideological wedge into Congress in order to create debate about the construction of the controversial Keystone XL pipeline.

Please bear in mind that this move is a copy of the "divide and conquer" strategy which was previously done by the Koch enterprises, Tesoro is a Texas based oil company which has historically demonstrated disregard for California's environment; and during previous elections has spent obscene amounts of money in unsuccessful attempts to enforce their deceptive special interest schemes; which were crafted to subvert the will and choices of California's voters. Their self-centered schemes do not fit into our environment or our value system; and thus do not deserve our serious consideration.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Joel Hill

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Ron Sundergill

I have lived in California most of my life and spent many years residing in Southern California. Our California Parks are our treasure and special legacy to future generations. Constructing any part of this Toll-road, or any other road through this priceless coastal area would be a tragedy Please vote to follow the staff-recommended findings and deny this project!!

Sincerely,

Kathleen Thompson

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Linda Shadle
2449 W Ball Rd
Apt 1
Anaheim, CA 92804-5257

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Carolyn Watkinson
1760 Liberty St
Atwater, CA 95301-3224

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Dr. Jeffrey Muss
4975 F St
Sacramento, CA 95819-3110

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Miss Heather Nicaise
453 N Olive St

Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

As a third generation native Californian and one deeply connected to the environment, I am appalled that you would deign to go through with this awful plan. We don't need any toll roads, we need to protect our lands and habitat. The San Onofre State Beach should never be split by a road.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

During this time of drought, there should not be anything being passed that would negatively impact our water. Please be aware that CA is a major tourist state, particularly Orange County with Disney and San Diego County with some fabulous National and State Parks as well as the famed zoo. Think about how much water was needed for the fires in So. Cal. and probably more to come.

We have traveled to most of the parks and spent quite a bit of time at San Onofre Beach and it would be a real shame to split this beautiful tourist attraction.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Ellen Dollar

The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

There should be no question about this except NO!!

State Parks are to be protected. Every time someone takes a part out of the system it leaves that many fewer places for the citizens of California to recreate or just be able to enjoy the outdoors. Do you understand that it has been proved that people need this type of contact to help release the stresses of life?

Just say NO!!!

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Nancy DeBusman

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Kevin Barrack
48 E 40th Ave Apt C

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Christine Anderson

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I understand the need to respond to increasing traffic and provide more efficient transportation corridors. At the same time I can see that more traffic creates more pollution. We need to look into ways to minimize traffic and therefore reduce pollution. Destroying our planet while encouraging more traffic is not a thoughtful view to the future our children face. Please do not allow this tollroad to be completed.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Ron VanAbrahams

The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Please do NOT construction this extension to the Toll Road. There are many existing highways, with lots of congestion, that need first priority attention, to accommodate the growing population.

I've lived in South Orange County for 12 years, & the big draw for most people living here, is the open space and natural beauty of the area. Building more highways, & tollroads robs the residents and visitors of some of the best open space we have in the County.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. David Comfort

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. vicki h

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

As you know, the Foothill toll road would run through some of Southern California's most intact habitat in Orange and San Diego Counties, literally bisecting San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

What is motivating you to push this unacceptable plan?

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Mr. Sidney J.P. Hollister

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

No Foothill tollroad! We must continue to provide safe and secure natural habitat for native species. We are trustees for the care of the land, the water, the air, the flora and fauna. San Onofre State Beach was set aside as a state beach because it is special.

Humans can't always have everything they would like in order to make profits or exploit natural resources. This tollway would affect water quality in the area, and water quality (water--a life necessity) is more important than whether or not people can get from here to there faster. That beach belongs to ALL Californians, and I don't want my beach ruined just because someone wants to speed on a road.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Helene Whitson

This tollroad has been blocked by California residents numerous times already!!!

Please do not allow the tollroad to destroy a precious resource and state beach!!!

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Gerald McKelvey

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Michelle Nance
PO Box 1344
Atwater, CA 95301-1344

The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

We've enough roads in California. Institute inexpensive public transportation and encourage ride-sharing instead. These habitats must be maintained for their inhabitants.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Suzanne Sutton

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

State parks are protected lands, and it is incumbent on the Regional Water Board to support and uphold that directive. Outside agencies should have no special authority or coercion in representing a proposed use of the land. Please continue to reject the foothill toll road project through open lands.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. John McKee
1917 Villines Ave
San Jacinto, CA 92583-6033

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

California is experiencing severe drought at this time. This could be year three of a ten-year drought, some are predicting.

This is not the time or the place to be causing detrimental impacts to any watersheds.

My family and I hope you will do what is right, and deny the Tesoro Extension.

Thank you for your consideration of our comments herein.

Sincerely,

The Kelly Family (five of us):

Lisa Ann

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Dale Evilsizer

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion. Don't destroy the beauty of this area. Put the toll road further east into the military base if necessary but not thru the beach area.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Dorothy Missler

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Dorothy Missler

We do not need to tear up more land to make more freeways. We perhaps need to build a second deck that could be toll only atop the existing I-5. If you are absolutely bent on giving money to a few people instead of serving the public, then make better use of existing facilities.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Californians do need nor want another toll road especially within one of the last wildlife corridors along the coast. This is just another money grab and will not enhance the area and will only destroy important habitat.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Dr. Dar Bertsch
134 Cayuga St
Santa Cruz, CA 95062-3618

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

I am a California native and treasure the remaining open space and wildlife habitat that remains in coastal southern CA. I am a resident of San Diego County and a surfer and a mother of two young children. I hope that I can count on the San Diego Regional Water Board to uphold the findings of the California Coastal Commission and the U.S. Department Commerce to deny the TCA any further permits and to preserve San Onofre State Park and the San Mateo Creek watershed for my children and grandchildren to enjoy. Thank you.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Chandra Tobey

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Lloyd Pieratt

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Prof. John Delevoryas
1668 Jacob Ave
San Jose, CA 95124-3813

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Tim Guisinger
2548 Leafwood Dr
Camarillo, CA 93010-2220

Does everything in California have to be threatened with damage or destruction due to development? Any state park should be protected from this, at the very least.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Interstate 5, Amtrak's well traveled Pacific Surfliner and commuter rail already cover this route and another road through this unique area would be a travesty. You need to be forward thinking on this and get more people on the trains and out of their cars. Building more roads in sensitive areas is not the answer.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Felicia Chase
16027 Ventura Blvd
Encino, CA 91436-2728

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

Please stand strong against the sneak attack on a precious part of our coast by the proponents of the Foothill tollroad. We count on you.
Thanks.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Rasa Moss

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Mary Gregory

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Judith Armstrong
10346 Jeffery Pine Rd # 1
Truckee, CA 96161-2183

The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

In my opinion, ALL Tollroads are illegal and should become reinstated as public roads...the whole basis for taxes duly paid by the public...we just need to repair billion corp tax loopholes not the potholes on the road which are in disrepair FIRST! OMG!!

NO MORE TOLLROADS AND DEFINATELY NOT THROUGH PROTECTED PARK AREAS!!

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Mario Delgado

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

This strategy is disingenuous. As the Foothill toll road violates California's coastal conservation law and state park sovereignty, and has the potential to adversely impact water quality, I have to wonder who stands to profit from this ill-conceived project. It is certainly not the public.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Barbara Gersh

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

My family are campers and we have stayed at San Onofre State beach and several other California beaches. It is a beautiful area which should be protected. It was completely occupied by visitors while we were there, and is a popular site. The Tesoro extension would not be of any benefit to this area. The staff has the knowledge to know the facts and make the proper decision.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Katherine Ellis

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Twikie Simms
1415 W Chevy Chase Dr
Anaheim, CA 92801-1904

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Our wild, natural landscapes are scientifically, ecosystems -- every reason mankind breathes and is alive. According to science, we are "suicidal" when we skin, denude, deforest and bulldoze ecosystems as only ecosystems generate and deliver every single one of mankind's lifelines for life itself.

"In wildness is the salvation of the Earth and the preservation of all life."

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Susan Bond
10511 Caminito Memosac

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

Please halt the Foothill tollroad. We have enough roads, we do not have enough wild places. The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

How can this benefit California? We are proud of our natural environment and thousands of tourists come here to see California's beauty. This toll-road would add nothing but problems to a pristine area.

This proposal is a bad idea for so many, many reasons.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Chris OMeara Dietrich

It is a mistake to accommodate traffic at the cost of our natural resources, rather than make traffic accommodate the land and all its flora and fauna.

It is also in the nature of civic organizations to put 'people' ahead of 'nature'. That is why we have hired expert staff to advise us.

Follow that advice, please and do not allow construction to begin

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

This project was already rejected once because of the threat to some of southern California's last wild lands. Yet here you are, trying it again.

Give up. Stop this plan for good. We can't afford to lose these last remnants to greed. Find another route or roundfile this stupid and destructive project.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Robbie McKee
1286 University Ave # 811
San Diego, CA 92103-3312

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach.

Destroying what wild coastal lands we have in the name of jobs is illogical. There are historic Native American sites in the valley that are protected under law.

The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Toll roads have repeatedly been proven not effective for tax revenue nor traffic alleviation. Simply put, they are a short term jobs & profits maker with huge irrevocable damage to the California coastal ecosystem.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Greg Hadel
21871 Montbury Dr
Lake Forest, CA 92630-6507

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. EDWARD BAUTISTA
250 Twinlake Dr
Sunnyvale, CA 94089-2047

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Laura Cipollari
1137 2nd St
Manhattan Beach, CA 90266-6834

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

While I can understand the profit motive of creating this toll road, the price to the citizens is far greater in that it will have an irreversible impact on habit and the beauty of our precious beaches.

Since several regulatory agencies have already reviewed this issue and denied permits, it is clearly not in the best interest of the public that you are mandated to represent. Please do the right thing and deny this project.

Thank you for taking the time to read this.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The heritage of our state depends on taking the long view for preserving parts of California that are unique and irreplaceable resources like our coastlands. Short term expedient thinking does nothing to create a California our children can be proud of and grow from.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department of Commerce turned it down. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Please do not let them get away with this.

This is a beautiful area and any building in there would destroy yet another piece of natural habitat which is irreplaceable.

We cannot continue to build over every piece of land, just because there are no structures there.

Don't let them do this.

thank you.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I am privileged to be a native Californian. I have been saddened to see the the bounty of the state's biological, geological, and historical resources occasionally sacrificed for the short term gain of individuals or individual entities. The San Onofre State Beach is a unique and valuable resource. The Tesoro extension will create a situation where this resource will be endangered. Please follow staff recommendations and deny the Tesoro extension.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Annemone Barnett
101 Wollin Way
Los Gatos, CA 95032-4740
(408) 358-1034

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

We are very concerned that State Park lands should be inviolate.

The proposed Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach.

The California Coastal Commission and the U.S. Department of Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Please prevent erosion of state park land and deny this extension.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Martin Cox

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

I am writing to you today as I'm concerned about the Foothill tollroad, which would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S.

Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I do not live in San Diego, but have family and friends down there, and visit often. I love San Diego! Please do not ruin one of the wonderful natural places that make San Diego so dang great!

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Laura Lilly

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Steve Bush
Dexter
Santa Rosa, CA 95404

As a former resident of San Diego county, I loved surfing and strolling down San Onofre beach. It is a beautiful untouched stretch and the tollroad is an ill conceived grab that was a bad idea last time they tried it. Keep fighting against this kind of blatant disrespect for our park system. Thanks,

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

I drive from Glendora, CA to San Diego, CA frequently to visit my Mother. Even though this "toll road" might make that drive easier & shorter, especially during the summer months, I think it's a bad idea, from a ecological & environmental standpoint.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Please think of our future,your grand childrens future!!!!

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Denise Aldelia Ward
4300 Soquel Dr

The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I grew up in San Diego from 1949-1971 and the place was paradise. I hate what has happened in the way of unrestricted growth.

That is what is threatened with this road!

Just look at what happened when they put connecting roads through the back end of Clairemont, or the growth on Kearney Mesa , Powey, and the Scripps Ranch!

Save this land for future generations, please!

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Linda Reavely

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

There are millions of people who live in Southern California because of the ocean. San Onofre beach is one of California's earliest surfing beach and is a treasure. Please make your decision based upon what is best for present and future populations rather than the immediate economic interests of developers.

Thank you

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. michael newman

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

San Onofre State Beach should be protected land and not used by builders for anything. We do not need tollroads on these lands. Thank you for denial of the Tesoro Extension as it would ruin our natural lands and beaches Thank you for denial of the water permit.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mrs. Sharlene Bergart

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Siamak Vossoughi
2930 Sacramento St
Apt 7
San Francisco, CA 94115-2138

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Ms. Regina Flores

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

My family and I vacation in Southern Orange County for 2 weeks every summer. One of our highlights is spending time on the beach and in the water at this pristine piece of CA coastline. Construction of this toll road would cause us to reconsider where we might spend our vacation dollars.

It's hard to believe this previously rejected toll road project has come up again...

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Dan Tester

Feb 13, 2015

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views

Ron & Anna Winship
428 Seaward Rd.
Corona del Mar, CA 92625-2616

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Ron - Anna Winship
428 Seaward Rd

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

There are not any places like San Onofre State Beach left in Southern California and I believe we should protect it as a special, largely undeveloped place. The toll road would cut through and destroy some of the last undeveloped parts of coastal Southern California. Please follow the lead of the California Coastal Commission and the U.S. Department of Commerce, which have already turned it down. The Tesoro Extension is not in our best interest.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

Please save our open space at this county line!

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Dr. Denise Stanley
1392 N Schooner Ln
Anaheim, CA 92801-1779

The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Dan Esposito

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Dr. Jasmina Pavlin

	2015 Alert #2
	

Please Write to the Water Board to Stop the Foothill Tollroad

Background

The Foothill tollroad would run through some of Southern California’s most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down, citing the availability of alternatives. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment – called the Tesoro Extension – and thus creating pressure for completion.

When asked for a water quality permit, the San Diego Regional Water Quality Control Board saw through this ruse, and refused to issue a permit for Tesoro until such time as the entirety of the project was before them. Upon appeal, the State Water Board affirmed the legal basis for that denial. Now, the Regional Board needs to make “findings” to finalize its decision. The Regional Board will hold a hearing on March 16, 2015.

Action Requested

While we hope that the Regional Board will adopt the findings recommended by staff, it could also reverse course if it chooses. Please write to the Regional Board asking that it adopt the staff recommendation. Comments are due **February 18, 2015 before 2 PM**, and public input is important. Instructions and a sample letter are below, to which a personal statement can be added.

EHL will be at the March 16 hearing near downtown San Diego, and if you can also attend, please reply to this message.

Email Address: <RB9_DredgeFill@waterboards.ca.gov>

Dear Chairman Bradford and Members of the Regional Water Quality Control Board:

As previous residents of Orange County who still visit the area, and as concerned citizens, we ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

We believe that the Transportation Corridor Agency is acting in extremely bad fashion by continuing to try to piece-meal their project. This is a perfect example of a proposed project whose direct, indirect and cumulative negative impacts on our human environment are simply intolerable. Already other agency responsible for our trust resources have denied this TCA project. When asked for a water quality permit, the San Diego Regional Water Quality Control Board saw through this ruse, and refused to issue a permit for Tesoro until such time as the entirety of the project was before them. Upon appeal, the State Water Board affirmed the legal basis for that denial. Now, the Regional Board needs to make "findings" to finalize its decision. We urge you and other members of the Board to adopt your staff's recommendation in this matter.

Thank you for considering our views.

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
David Sanchez

In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Teri Lunn

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Robertt Nelson

Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Gwen Eng

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
MARY BARTHOLOMAY

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Andrew Wright

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Sheryl Folck

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Paula Garcia

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Robin York

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Peter Hunken

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Donald Slaven

Dear SD Regional Water Quality Control Board,

As a concerned citizen and long time surfer, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Paul Burnett

Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

We have to protect our precious resources and land so that not only we can enjoy them, but our kids can enjoy them, and generations to come can enjoy them. It is time to take a stand and actually do what is RIGHT and best for our protected lands and resources and NOT what some greedy developer deems as necessary.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Reagan West

Dear SD Regional Water Quality Control Board,

Please stop this land grab for profit. This delay, do in stages, tactics, are not in the public interest. We the people have spoken repeatedly on this issue. Apparently, the opposition is not really concerned about the community they want to impact. The only ones that truly want this profit financially from it. They are using deceptive political tactics to achieve these ends.

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

Dear SD Regional Water Quality Control Board,

Below you will find a drafted message that I wholeheartedly endorse. The TCA has proven that it will stop at nothing to make money for itself, despite huge amounts of public support against their actions, and formal decisions against their work as environmentally unsound. However, the TCA remains undeterred in their quest to make profits at the expense of the public. Please read the message below and recommend the findings for denial of the Tesoro Extension.

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Very truly yours,
James Marvel

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Bob Nenninger

Dear SD Regional Water Quality Control Board,

I surfed San Onofre beach as a youngster and now take our grandchildren there. I write asking to adopt your staff's recommended findings denying the proposed Tesoro Freeway Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll freeway's impacts to water quality prior to allowing construction to begin.

The Foothill toll freeway would run through some of Southern California's most intact natural habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the George Bush Administration rejected the toll road proposal due to its devastating impacts. Despite being legally rejected, the TCA board remains undeterred and now proposes to build the same freeway in segments to avoid comprehensive environmental review.

I am concerned the first section of the road is not only environmentally damaging, but this initial segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Donald Wood

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Dominique Stokes

Dear SD Regional Water Quality Control Board,

After more than a decade of thorough study and input from all sides, your staff has determined -- again -- that the Tesoro toll road is a flawed project. As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension to the Foothill toll road.

These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin. Please adopt their recommendations before any more taxpayer money is spent on yet another study pushed on us by developers. Please represent us citizens and stop this latest scheme now as it has been stopped repeatedly in the past.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach which, by the way, is owned by the citizens of California. Our family buys and uses State Park Passes each year, and can testify to the unique beauty of San Onofre, especially in ever-more-crowded Orange County. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected, the TCA remains undeterred and now plans to build the road in segments. They tried again -- and were denied again -- two or three years ago. How much staff time, how many public funds have been spent on this matter? Please put a stop to it now.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach, nearby campgrounds, and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Melissa Sweet

Dear SD Regional Water Quality Control Board,

Dear Sir/Madam,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Stephen Dolden

Dear SD Regional Water Quality Control Board,

I attended the previous Coastal Commission where the application was denied for this toll road. There was a huge turnout in opposition from environmentalists and concerned citizens. It's not unexpected that the toll road proponents are trying to sneak this back through the system but I urge you to refuse this Tesoro Extension.

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Ashley Stewart

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Geoffrey Gray

The big developers and profit motivated corporations don't care what is left to our future generation. Only greed and profits now is what they are interested in. I hope that these groups that have paid lobbyists to represent them in Congress and decision makers get rejected by the politicians and they stand up for we the people. Those that love the beach, the environment and Nature, unspoiled by the greed of those that just want to make money, at whatever cost to the environment. This is a very special place, please help protect it.

Sincerely,

Sincerely,
Don Instone

Dear SD Regional Water Quality Control Board,

As a concerned local citizen and scientist, I ask you to adopt the staff-recommended findings for DENIAL of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin. The data and infrastructure are insufficient to contain toxin in run off and prevent them from entering our streams and water.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build build build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year. I have personally visited this area with my family in the last week and this project would annihilate our families experience of the natural resources here.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Steve Blackwell

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Jeff and Kirstin Filliez

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments. I was part of the fight in 2008 and I continue to stand strongly against the TCA's repeated attempts to move forward with this project based solely on loopholes rather than merit or differing environmental evidence.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year. This was decided, in 2008, to be against the overall interests of the public. None of the facts or findings of that decision have changed, only the TCA's divisive approach.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Katie Benson

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Janice Pope

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Ed Schlegel

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Marco Araujo

Dear Sirs and/or Madam,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year. The people have spoken. Please honor their lawful request.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension. Thank you very much.

Sincerely,

Sincerely,
Boyd Scofield

Dear SD Regional Water Quality Control Board,

As concerned citizens and frequent travellers to Trestles and the surrounding beaches, we ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. We know this firsthand because we live out in inland, South OC and frequently hike the areas where the Rancho Mission Viejo Company is developing their various "planning areas" between Coto de Caza and Ortega Highway. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA apparently remains undeterred and now seeks plans to build the road in segments.

We are concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, we urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Kenneth and Pamela Petersen

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Carris Rhodes

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Susan Krzywicki

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
David Hovland

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Kenneth Brown

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Jeffrey Kudla

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Relocation of the riparian habitat is unacceptable and that's what they said they said they wanted to do at the last meeting. It would take 10 years for the habitat to grow back!! What will the wild life do in the meantime? This is one of the last natural watersheds on the west coast.

Unacceptable! Also taking over State Park public lands that were established in perpetuity (which means forever) by President Regan himself is unacceptable. There are other alternatives for this road and they won't consider them. This is the 4th time they have attempted to overthrow the denial for this pay highway that will cost \$15 one way to travel on while destroying this State Park and this natural watershed!

They just keep trying to sneak in and take over the route that will ultimately destroy and take over 60% of a state park. If they succeed it would set a precedent an ultimately developers could do this in any other state park or in natural habitats all over the country! They have not indicated where this road would hook up with the 5 freeway and think that building in segments (which is illegal) they will get this destructive road through! Please deny this extension like all the boards before you did.

Thank you for preserving our public lands and natural habitats for future generations.

Sincerely,

Sincerely,

julianne bradford

Dear SD Regional Water Quality Control Board,

The tollroad is a terrible idea that has been denied twice by reasonable informed members of boards and commissions. Why this is coming up again is because of the profit that will be acquired while paving over the land California thought was already safe from development.

My family is enjoying the fourth generation of Walker/Wakeling's to spend time enjoying the wetlands for birding. We camp and surf and walk and build sand castles. We make s'mores and gather drift wood and shells. We don't take them. We don't remove things from these areas because that's what we were taught. To respect the land set aside. To leave it BETTER than when we came. I would say this paving of a road that will EVENTUALLY ruin this area is a very pathetic legacy for us to leave my granddaughter Everlee. She deserves an assurance that this land is set aside for HER and her babies to come. Paving a road that is meant for an elite group of people crushes the legacy for State Parks and Beaches and Campgrounds. I've read the specs. It does not look good for this area if the road is extended. I am a 59 year old woman that cares about our state and what this state's priorities are. This has to be taken seriously.

You will be heroes if you deny this project. Imagine yourself doing that for our future, seriously- imagine securing this area for good clean fun. WOW that is something to be proud of.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. This momentum is worrisome because it will be foolish to start the extension and not finish it. STOP IT BEFORE IT STARTS. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Leslie Walker

Dear SD Regional Water Quality Control Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill toll road's impacts to water quality prior to allowing construction to begin.

The Foothill toll road would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. In 2008, both the California Coastal Commission and the Bush Administration rejected the toll road due to its devastating impacts. Despite being rejected the TCA remains undeterred and now plans to build the road in segments.

I am concerned the first section of the road is not only environmentally damaging, but this segment of the road would give the TCA momentum to complete the full road. Their full road would absolutely devastate fragile watersheds, greatly impact San Onofre State Beach and the beloved recreation spot for more than 2.4 million visitors/surfers each year.

For these reasons, I urge the Regional Board to adopt the staff-recommended findings for denial of the Tesoro Extension.

Sincerely,

Sincerely,
Charlotte weddell

Dear Chair and Members of Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The California coasts and our state parks and beaches are precious and belong to all of California and to all Californians. Please adopt the staff-recommended findings and **deny the Tesoro Extension.**

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Respectfully,

Monique Doryland

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

The Foothill tollroad would run through some of Southern California's most intact habitat lands in Orange and San Diego Counties and literally bisect San Onofre State Beach. The California Coastal Commission and the U.S. Department Commerce turned it down. Even so, the Transportation Corridor Agency came up with the strategy of first constructing the northern segment called the Tesoro Extension and thus creating pressure for completion. Please do not allow this to happen! Our growing California population needs all State Park lands to remain intact.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Miss Susan Heller

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

I am writing in reference to Permit Application SA J-2004-12518 (SP-JMS) to express my opposition to the proposed St. John Marina, located in Coral Bay Harbor, St. John, U.S. Virgin Islands. The area slated for development is located directly adjacent to lands and waters of Virgin Islands National Park and Coral Reef National Monument. I am deeply concerned that this marina will harm threatened and endangered species, sensitive habitat, water quality, and fragile coral reefs.

Like so many Americans, I am committed to the National Park System, which preserves our country's incredible array of landscapes, waters, wildlife, and opportunities for exploration. Virgin Islands National Park and Coral Reef National Monument are irreplaceable natural treasures. The proposed project could harm their significance through impacts to their prized viewsheds, soundscapes, habitats, and stunning biodiversity.

The marina would lead to more contamination in nearby waters from increased vessel use and traffic and could cause severe degradation in water quality. Creatures such as green sea turtles, black tip sharks, brown pelicans and humpback whales could be driven out of the area if the marina is constructed. Hurricane Hole, part of the Monument that supports some of the most extensive, pristine mangrove habitat on St. John, is located only about a mile away from the proposed marina.

In light of the marina's potentially irreversible impacts to the biological and ecological character of the surrounding area, I urge you to deny this permit. It would not be in the public interest for the Army Corps to approve a permit allowing for the development of a mega-yacht marina in the heart of National Park Service lands and waters.

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Kevin Reynolds
