Point Loma Wastewater Treatment Plant Process

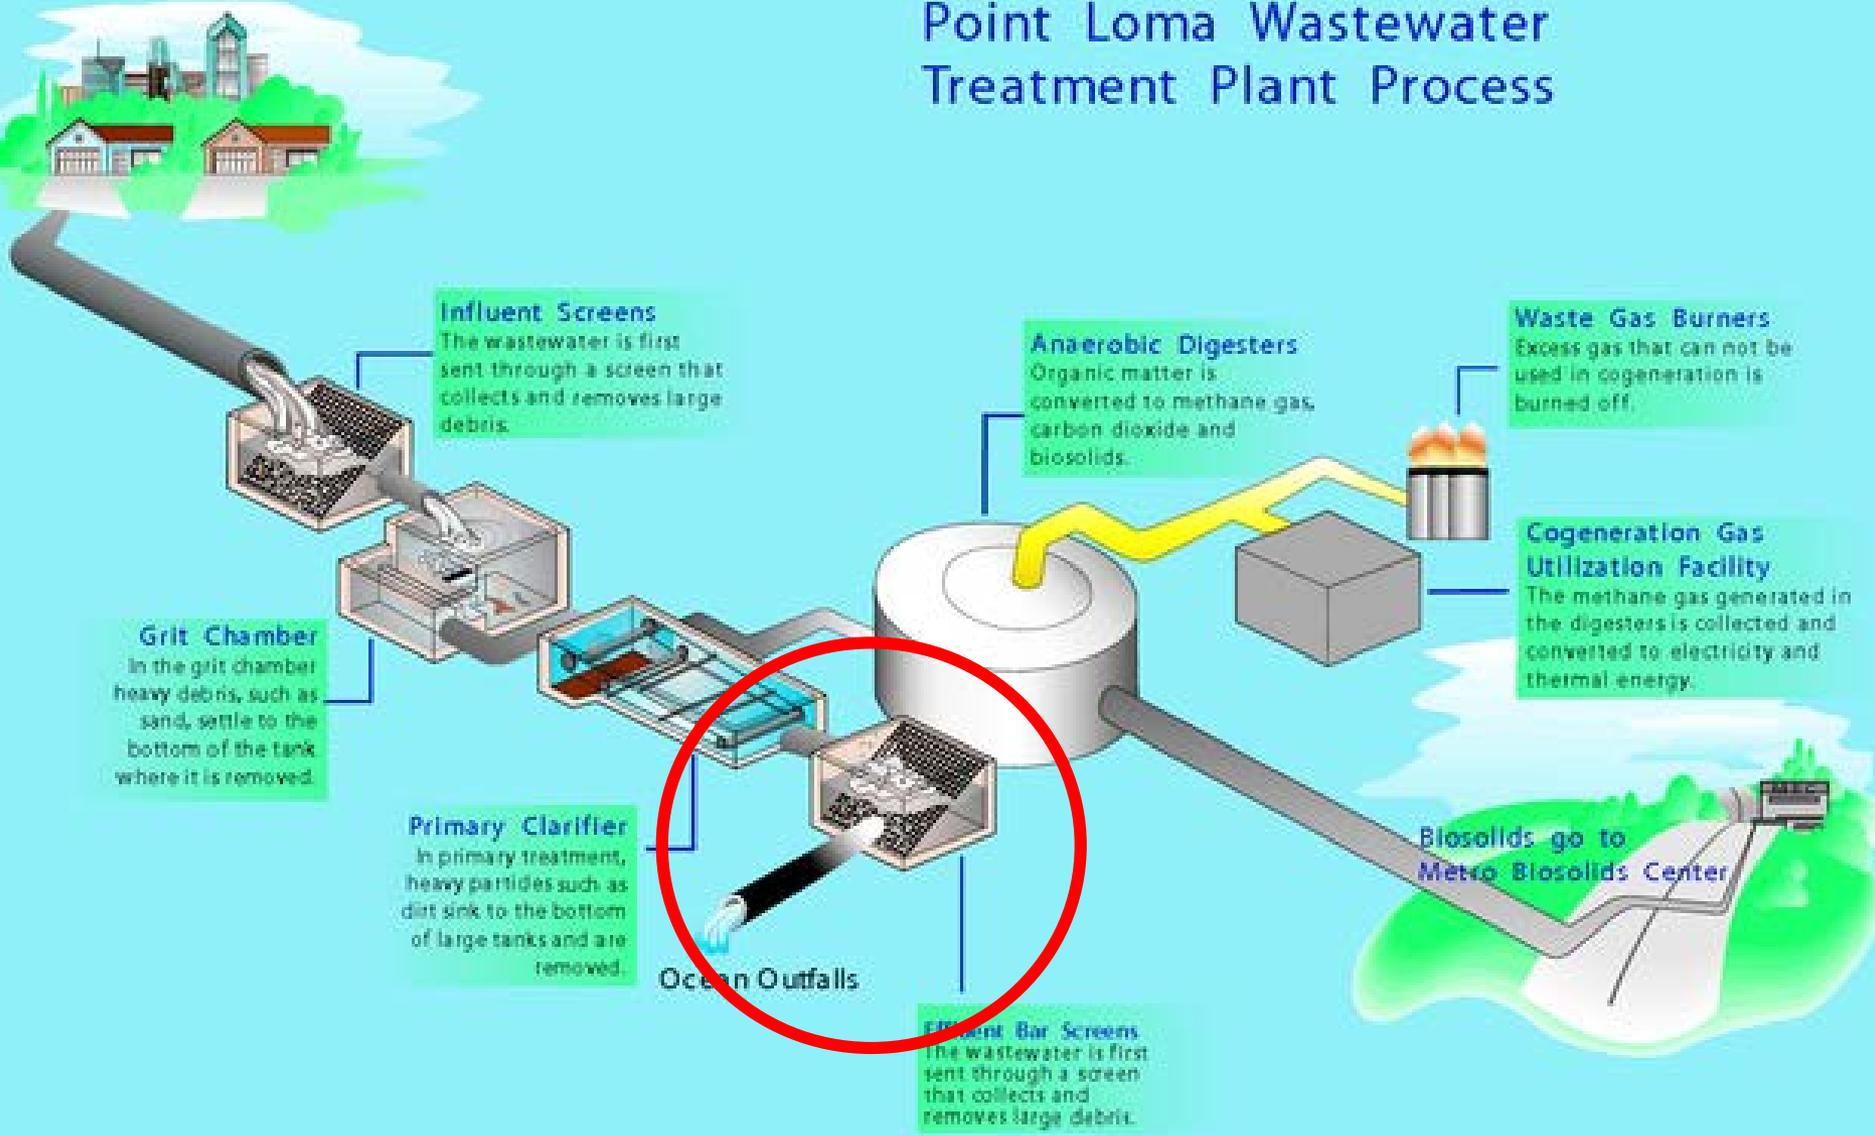

Point Loma Wastewater Treatment Plant Process

Point Loma Wastewater Treatment Plant Process

Point Loma Wastewater Treatment Plant Process

Influent Screens
The wastewater is first sent through a screen that collects and removes large debris.

Grit Chamber
In the grit chamber heavy debris, such as sand, settle to the bottom of the tank where it is removed.

Primary Clarifier
In primary treatment, heavy particles such as dirt sink to the bottom of large tanks and are removed.

Ocean Outfalls

Effluent Bar Screens
The wastewater is first sent through a screen that collects and removes large debris.

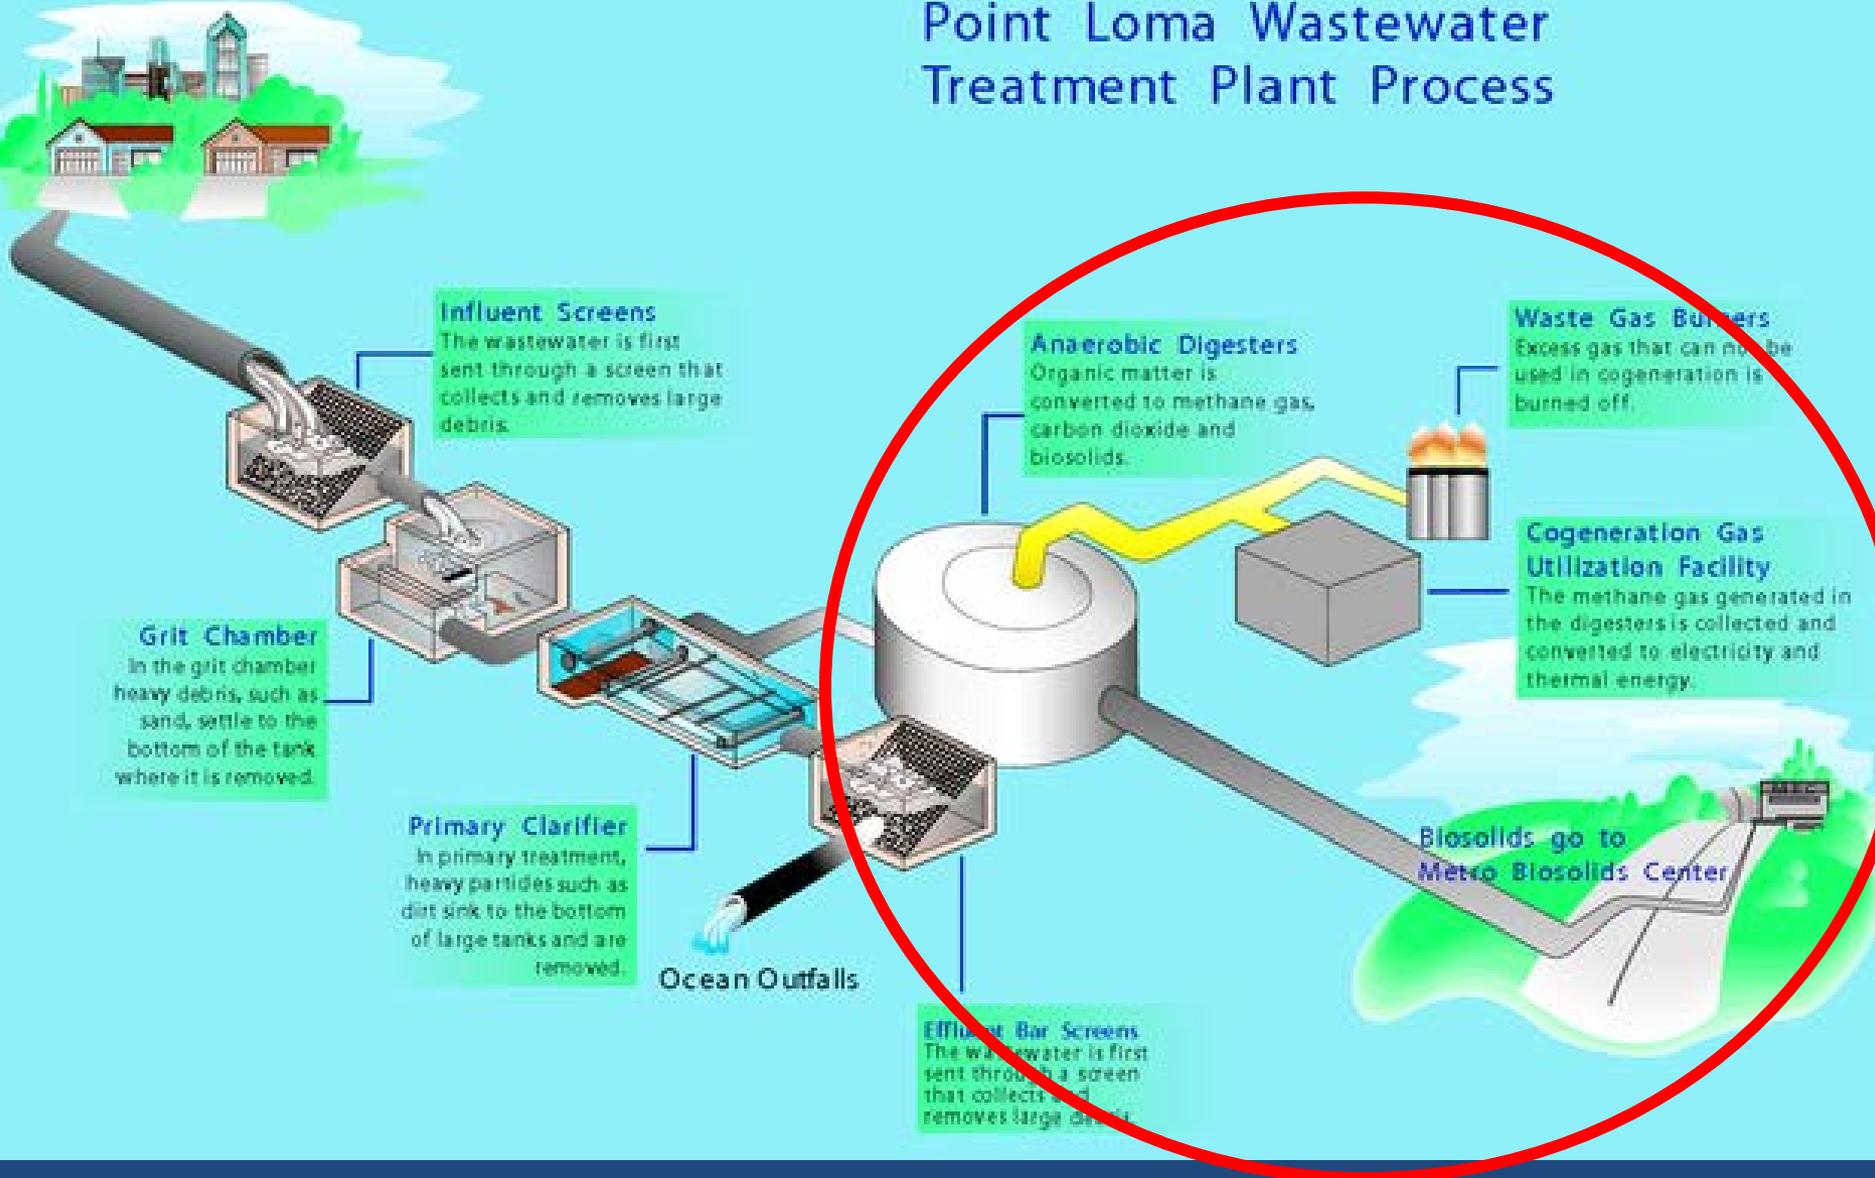

Anaerobic Digesters
Organic matter is converted to methane gas, carbon dioxide and biosolids.

Waste Gas Burners
Excess gas that can not be used in cogeneration is burned off.

Cogeneration Gas Utilization Facility
The methane gas generated in the digesters is collected and converted to electricity and thermal energy.

Biosolids go to Metro Biosolids Center

301(h) waiver for Point Loma WWTP

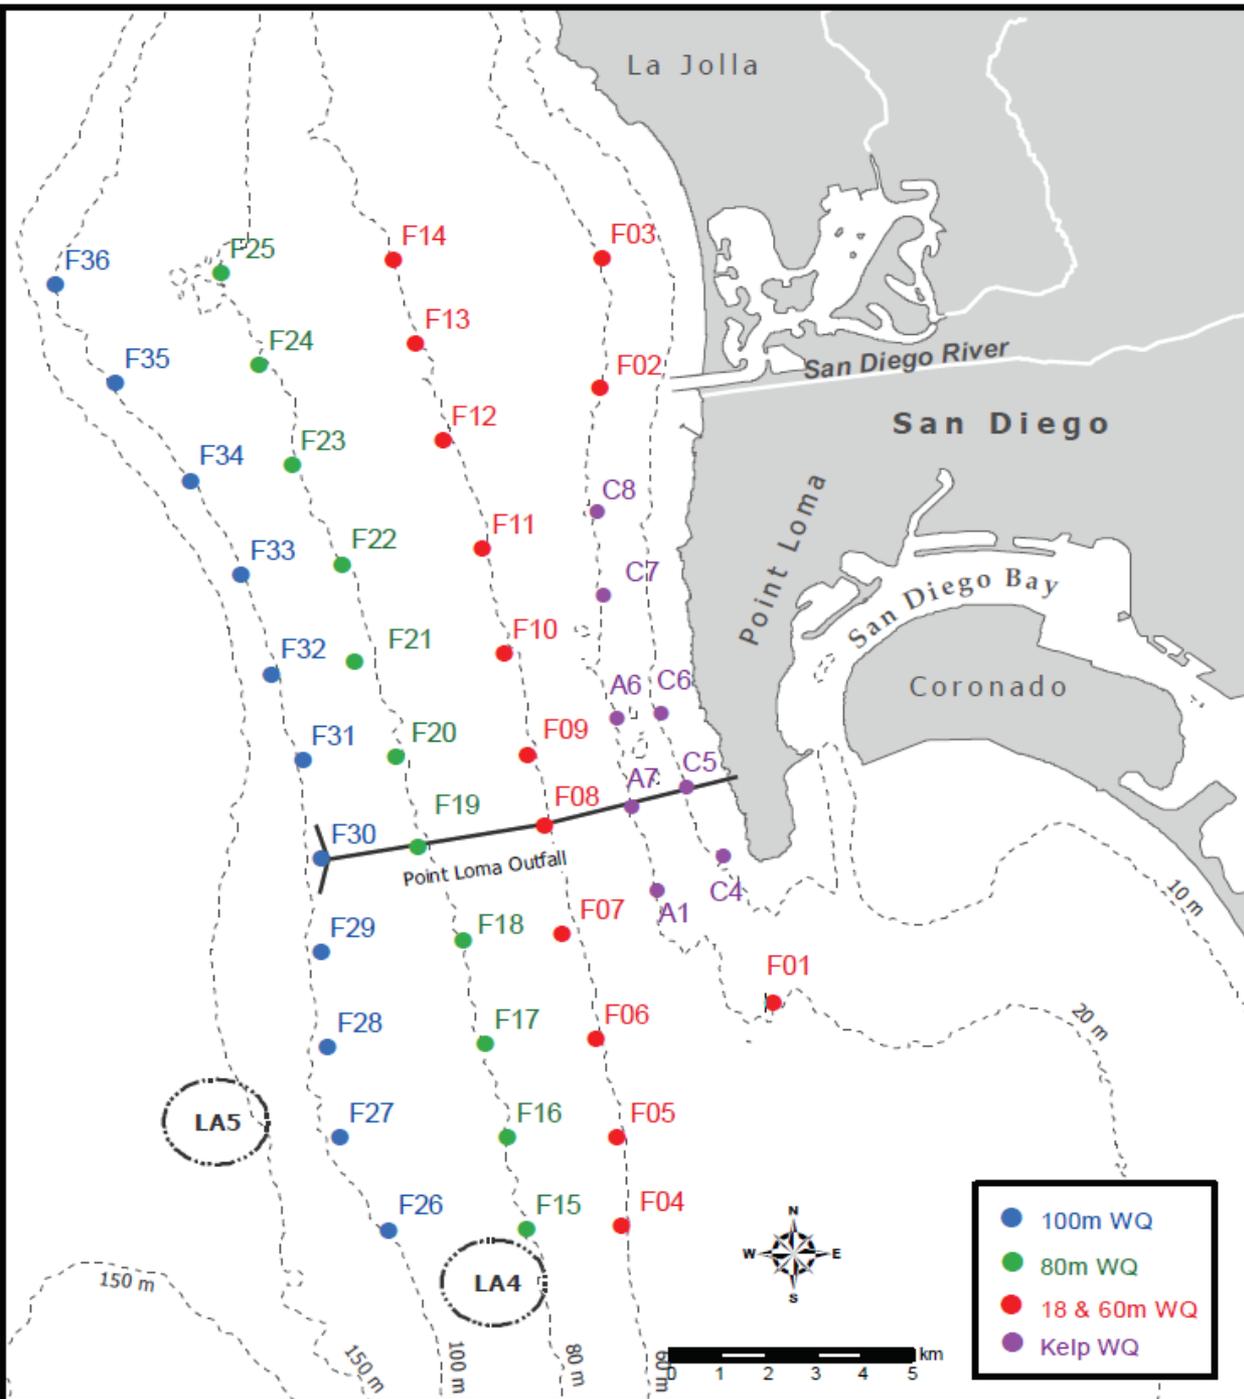

Peter Kozelka, USEPA
Water Division

<u>TSS</u>	<u>BOD</u>
<u>301(h) criteria</u>	
<ul style="list-style-type: none"> • must < 75 mg/L conc. • must ≥ 80% removal 	<ul style="list-style-type: none"> • must ≥ 58% removal
<u>Facility performance</u>	
<ul style="list-style-type: none"> • 25-50 mg/L (mos. avg.) • 90% removal 	<ul style="list-style-type: none"> • 65-68% removal
<u>Secondary treatment level</u>	
<ul style="list-style-type: none"> • meet 30 mg/L • 85% removal 	<ul style="list-style-type: none"> • meet 30 mg/L • 85% removal

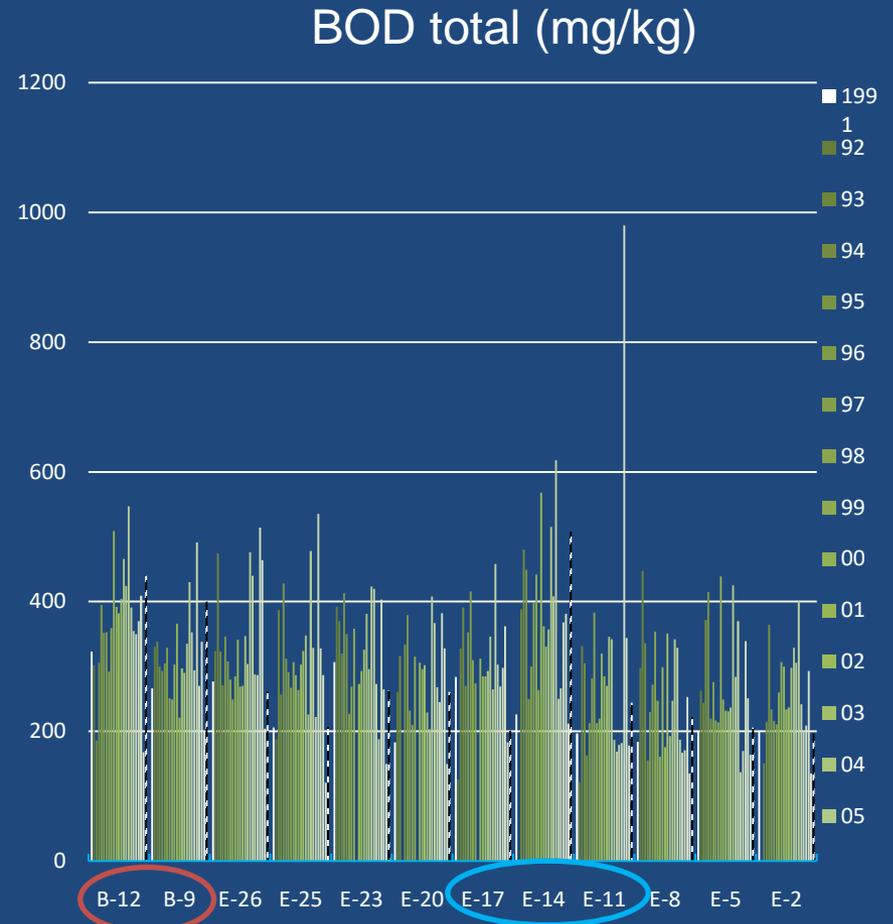

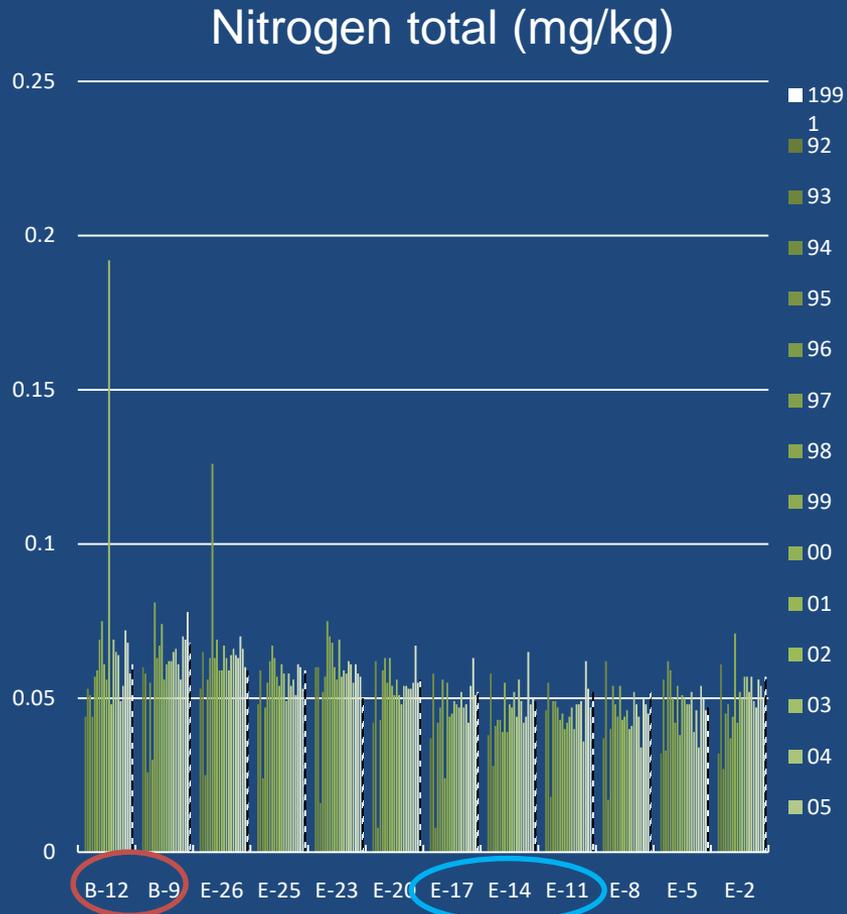

CWA 301(h) Criteria

- Adequately remove toxics prior to WWTP
 - City has effective pretreatment program
 - Adequate effluent and ocean monitoring
 - City has extensive monitoring program—many parameters in water(s), sediment and fish
 - Robust data set over 2 decades
- OPRA requires reuse program

Monitoring Near Pt. Loma Ocean Outfall

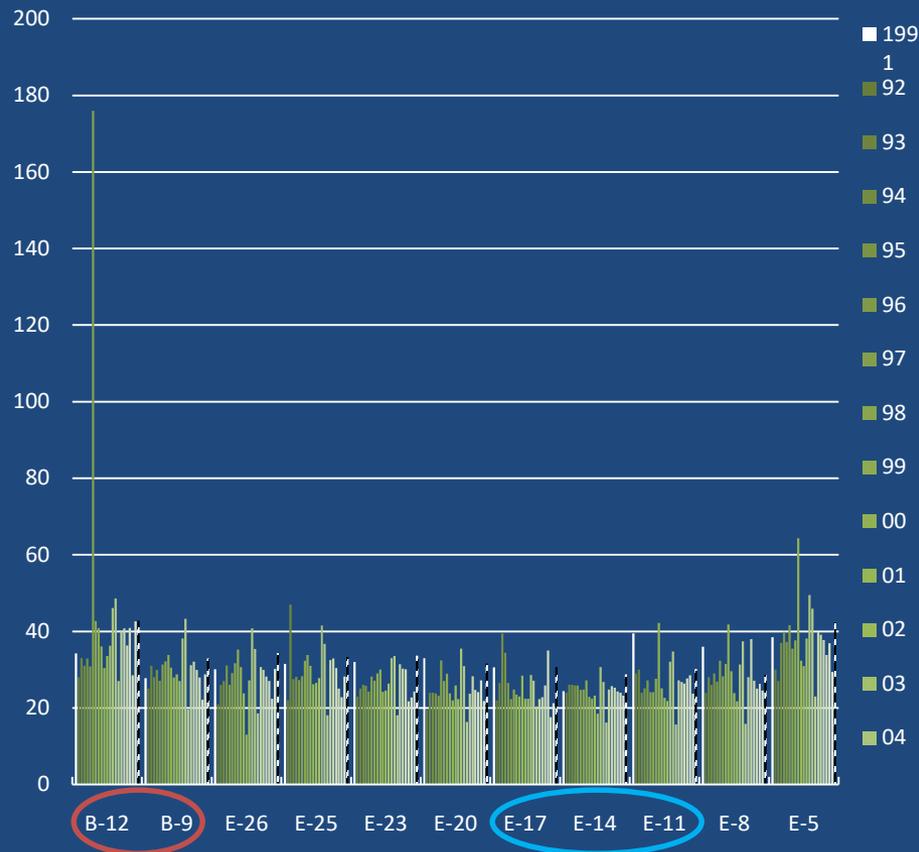

Sediment chemistry ('95-'15)

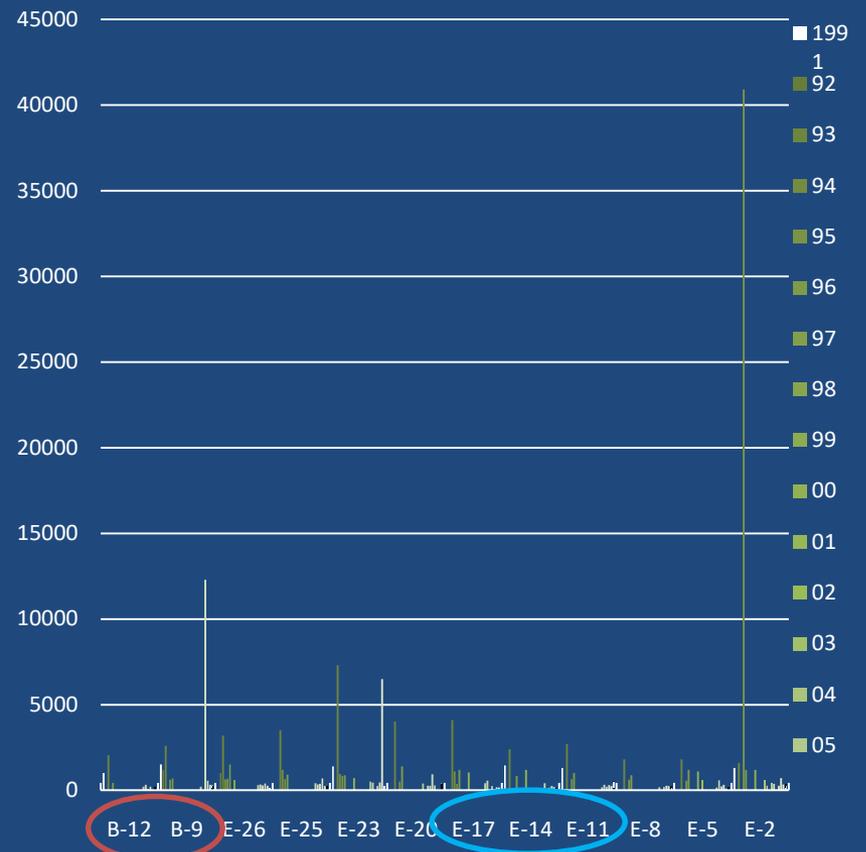

Sediment chemistry ('95-'15)

Zinc total (mg/kg)

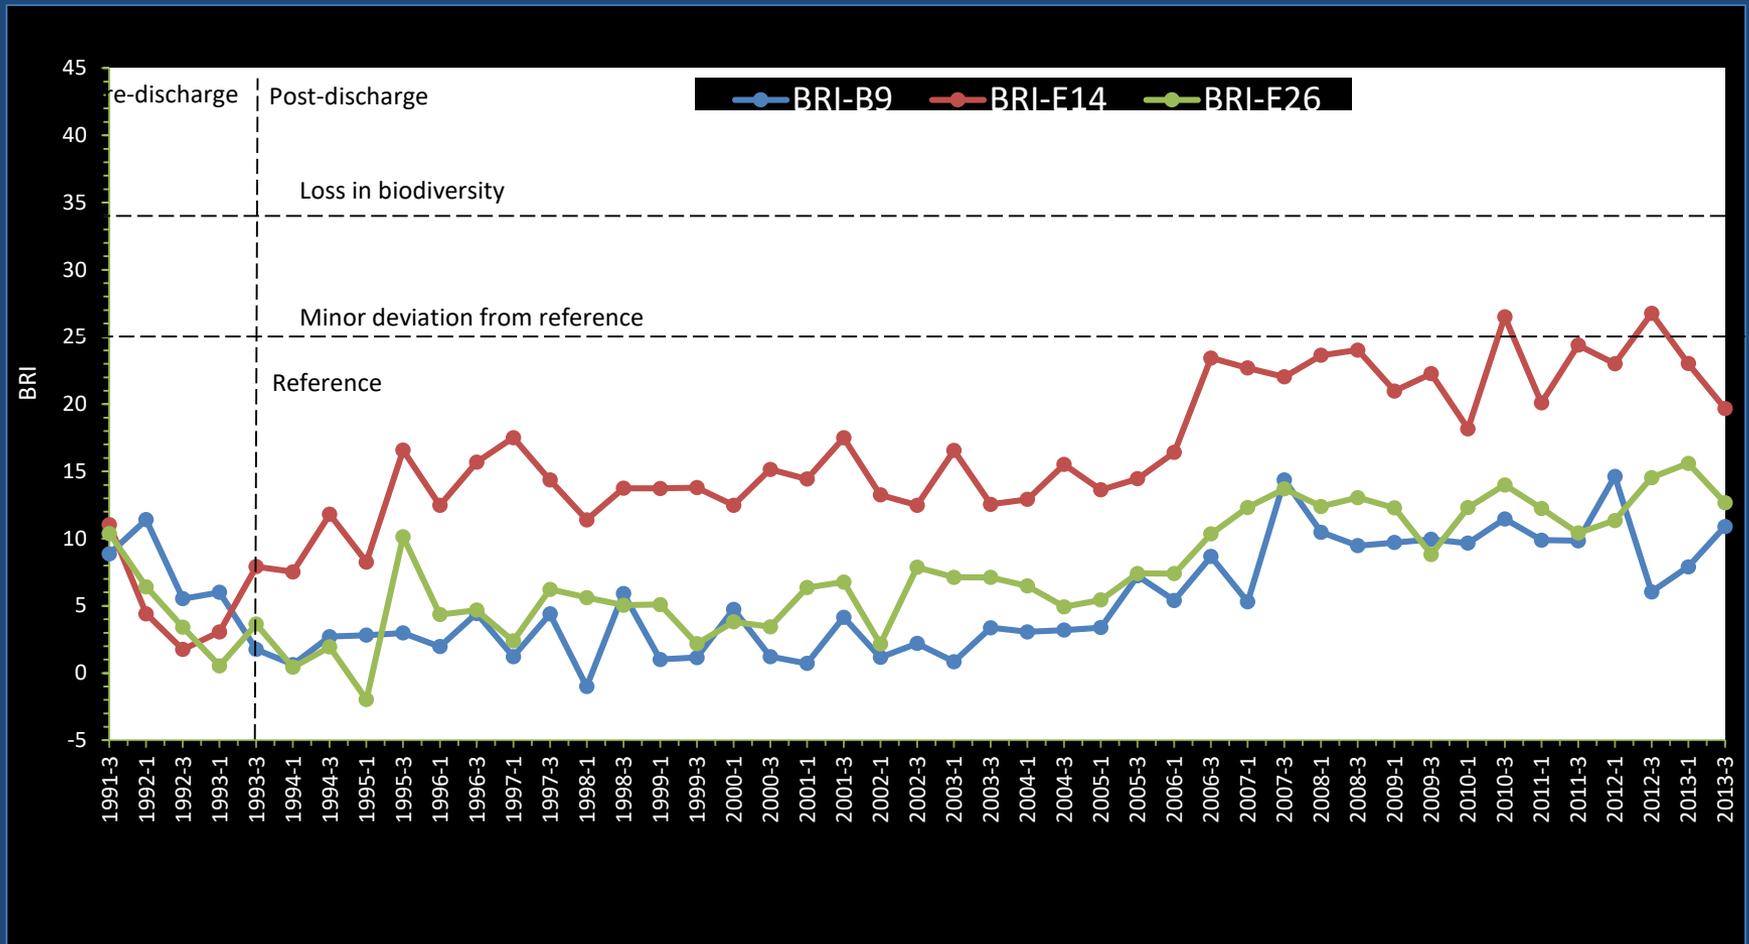

DDT total (ng/kg)

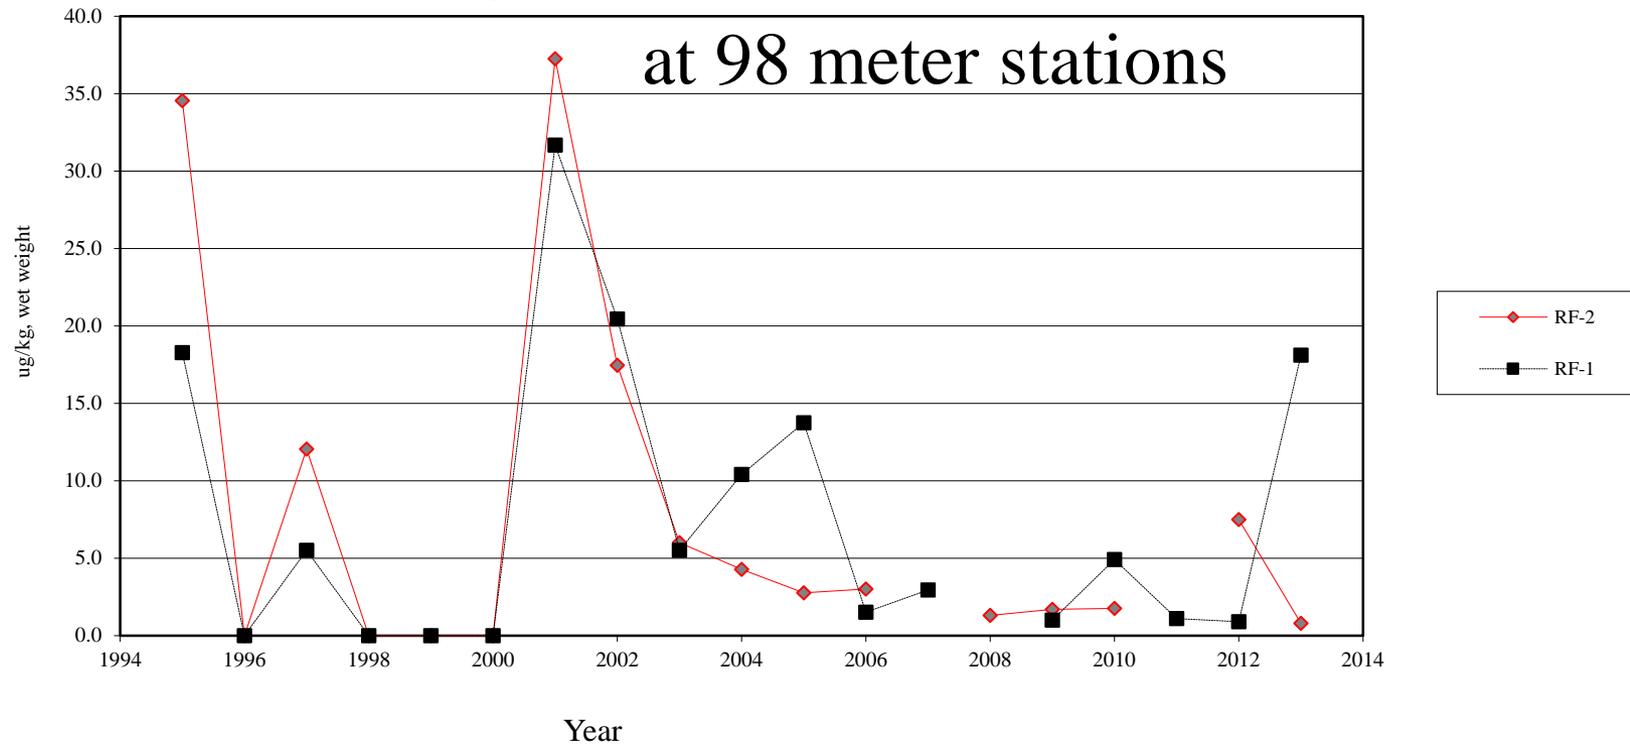

Benthic Community ('91-'13)

(benthic response index values)

Fish tissue conc. ('95-'13)

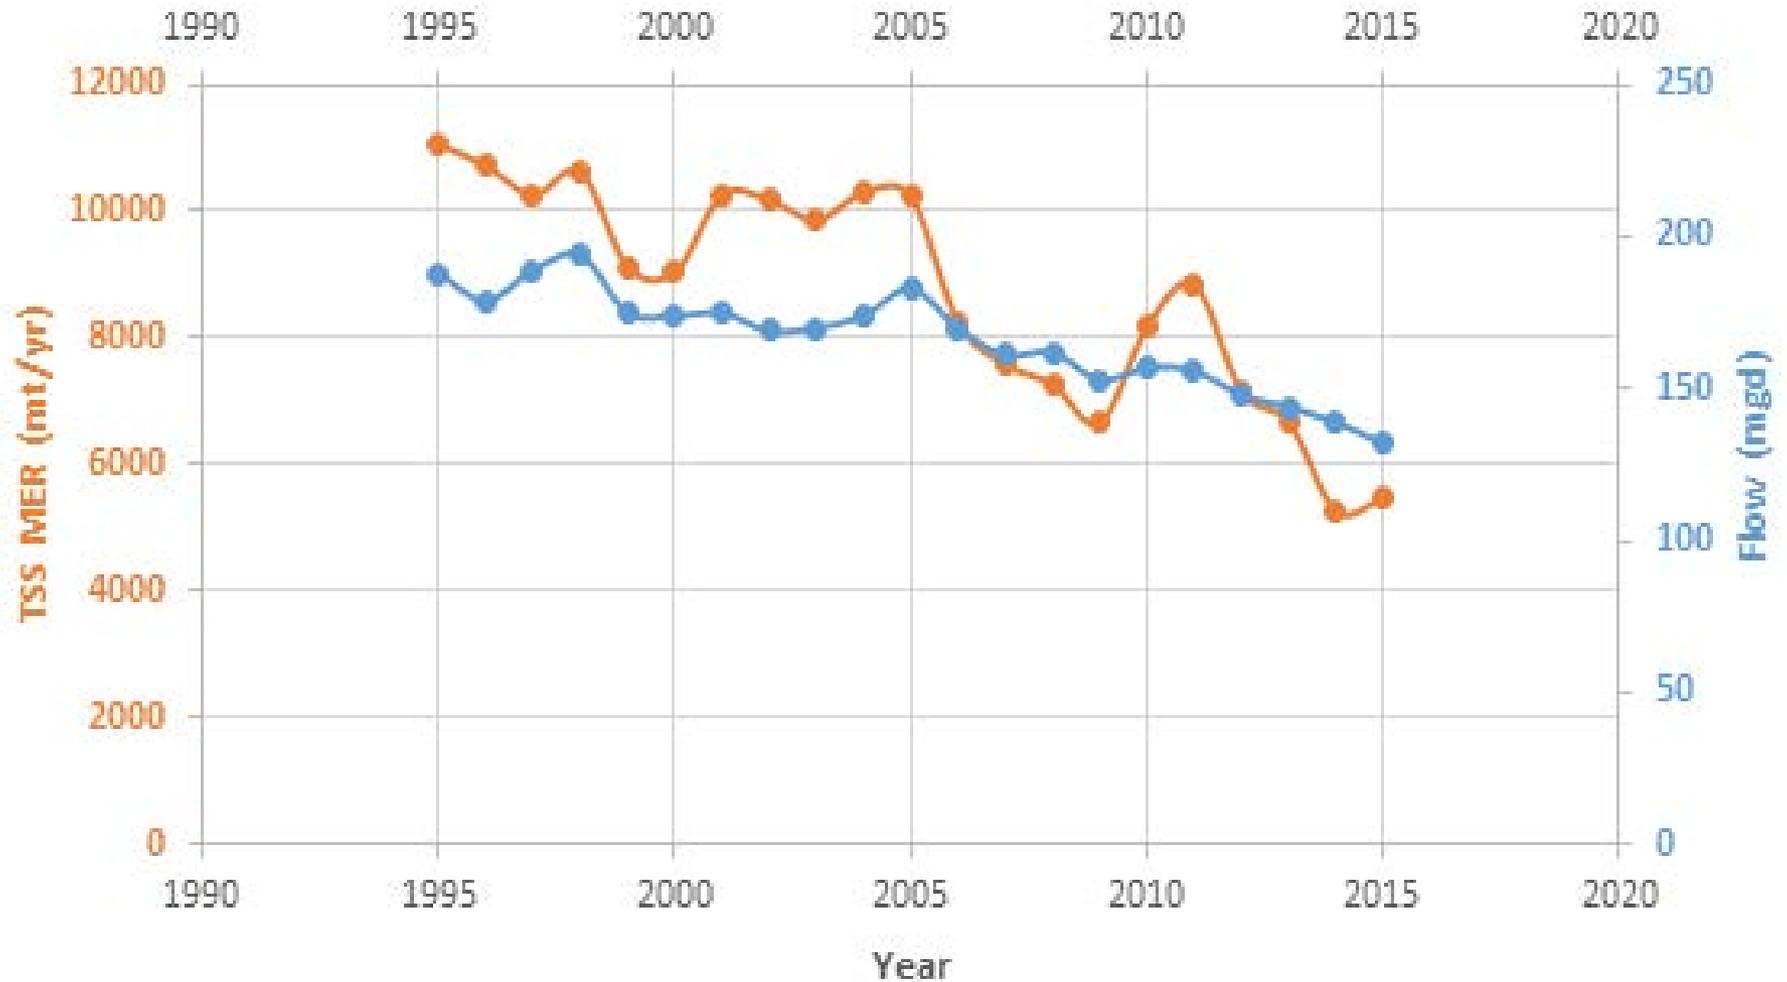

total PCB concentrations in rockfish muscle
at 98 meter stations

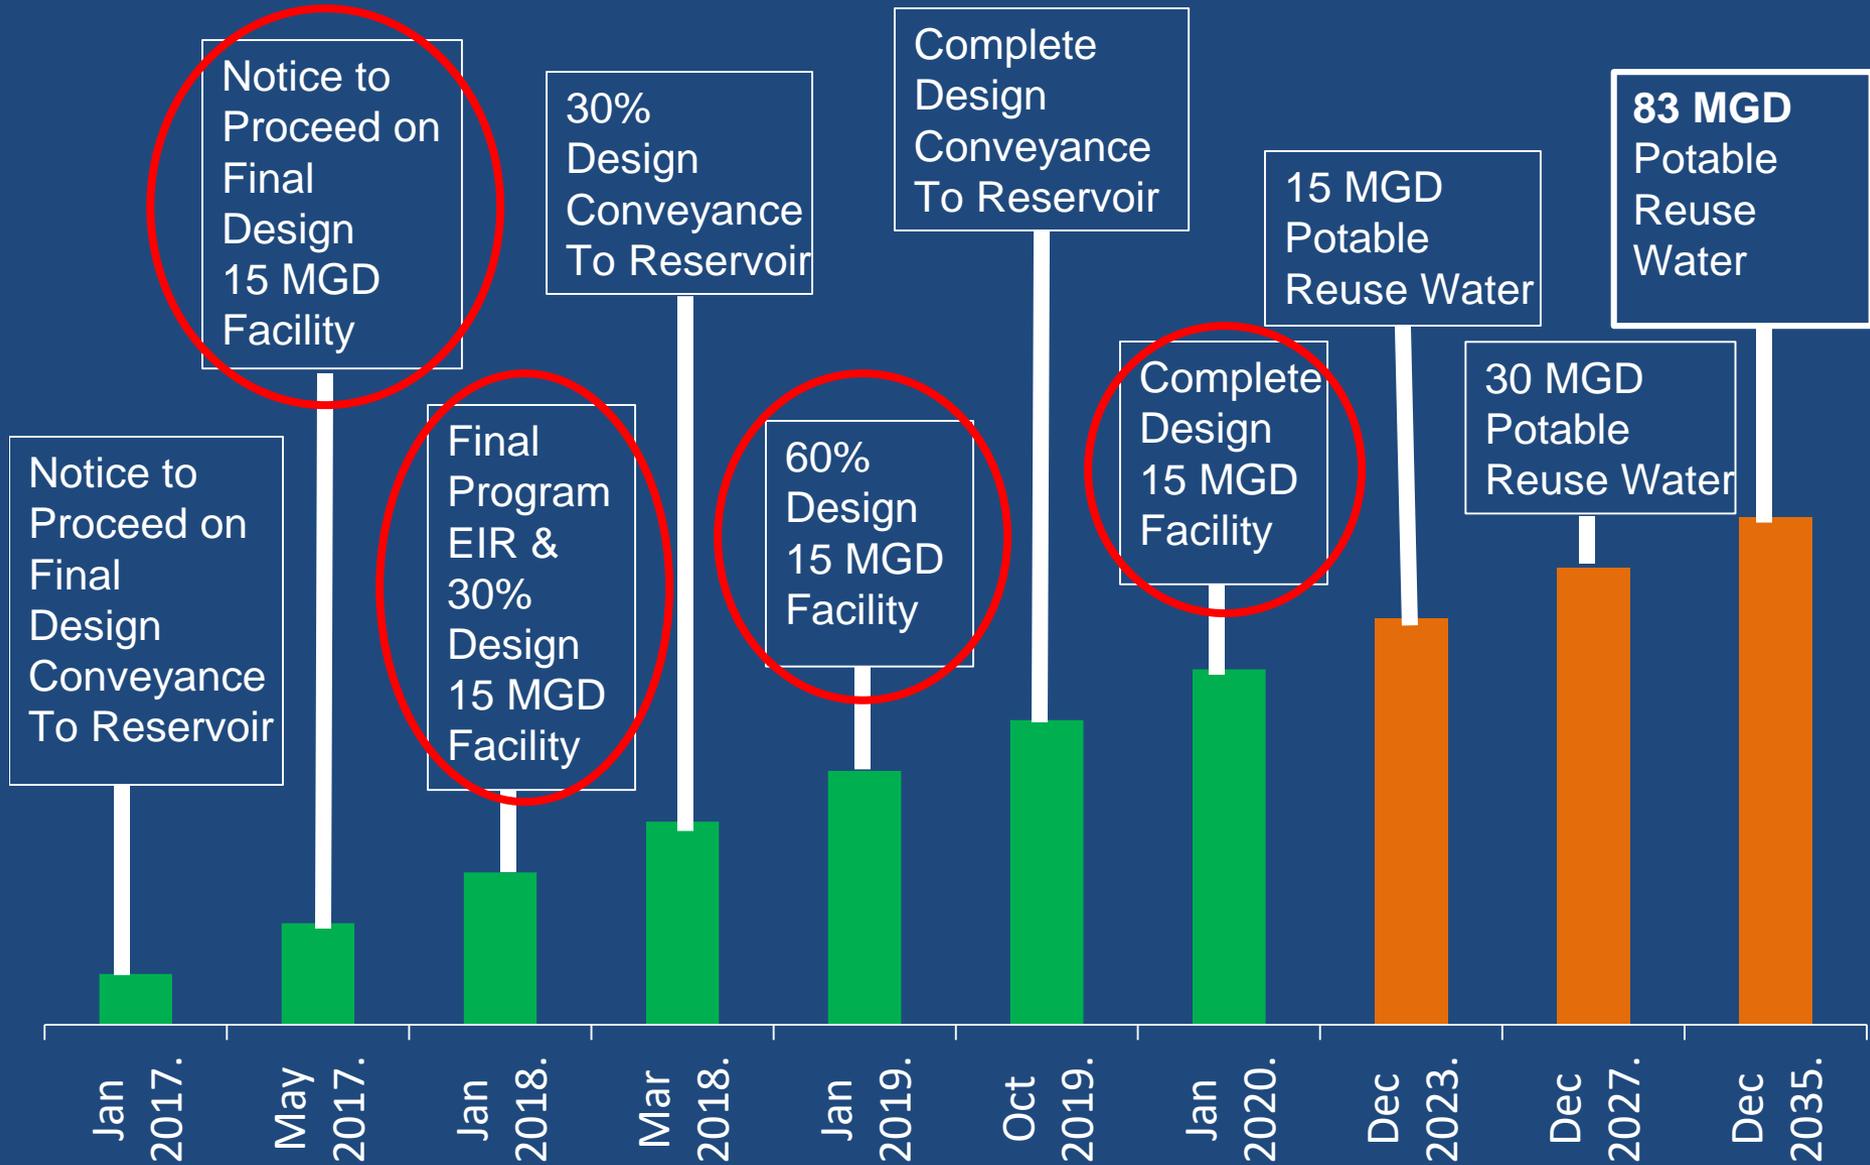

Secondary Equivalency for Total Suspended Solids

Current Mass Emission Limitation	13,598 metric tons/year (mt/yr)
Proposed Mass Emission Limitation	12,000 mt/yr (years 1-4) 11,999 mt/yr (by year 5)
Mass Emission Goal for Year 2028	9,942 mt/yr
Mass Emission at full capacity and secondary standard	9,942 mt/yr

Special Study – Climate Change

Oct 28, 2016: Public Notice/Tentative Documents

Dec 14, 2016: Joint Public Hearing

Dec 21, 2016: Comment Due on Tentative Documents

City of San Diego Comment Letter

- Typographical errors and request for clarification
- Error on TCDD equivalency reasonable potential analysis

Lemon Grove Sanitation District Comment Letter

- Support waiver
- Support Pure Water San Diego

- Joint Adoption of Tentative Order by
 - USEPA and
 - San Diego Water Board
- Endangered Species Act consultation
 - US Fish and Wildlife Services and
 - National Marine Fishery Service
- Determination from
 - California Coastal Commission
- Final 301(h) Waiver Decision Document
 - USEPA Region 9 Administrator
