

**San Diego Water Board Meeting**  
**Action Items**  
**December 13 and 18, 2023**  
**(Underlined names are responsible for the action)**

**December 13, 2023 Meeting**

**Item 2: Chair's, Board Members', State Board Liaison's, and Executive Officer's Reports**

During Item No. 2, Board Member Warren requested General Atomics provide the Board with information regarding the affordability of its Industrial Supercritical Water Oxidation (iSCWO) technology system that is used to treat PFAS. Vice Chair Olson added a request for information regarding the operational and capital costs and the energy needs associated with the system.

**Course of Action:** Brian McDaniel will coordinate with John Follin from General Atomics to provide an informational item at a future Board meeting that includes the requested information.

**Hours needed to complete request:** 20

**Completion Date:** Spring 2024

**Item 8: Future Agenda Items**

During Item No. 8, Chair Cantú requested an item that provides information regarding Blue Baby Syndrome and how it is related to nitrogen in drinking water and groundwater (private wells).

**Course of Action:** Roger Mitchell will coordinate an update for the Board in a future Executive Officer's Report.

**Hours needed to complete request:** 30

**Completion Date:** Spring 2024

**December 18, 2023 Meeting**

**Item 1: Consideration of a Time Schedule Order to be issued to the United States Section of the International Boundary and Water Commission (USIBWC)**

During Item No. 1, Vice Chair Olson requested updates on the status of all upgrades at the South Bay International Wastewater Treatment Plant, especially when USIBWC will not meet estimated completion dates provided in previous Executive Officer Reports. Chair Cantú asked for an update regarding USIBWC's data integrity and upload issues and any potential new data upload methods.

**Course of Action:** Vicente Rodriguez will prepare an update for the Board in the March 2024 Executive Officer's Report that includes the requested information regarding data issues and ongoing reports regarding the status of upgrades at the treatment plant.

**Hours needed to complete request:** 30

**Completion Date:** Ongoing and March 2024
