Mr. Bustamante:

**Subject: Requirement to Enroll under Industrial Storm Water General Permit, Pozo Transport, 6965 Camino Maguiladora, San Diego, CA 92154**

Pursuant to California Water Code (CWC) Section 13399.30, you are hereby notified that Pozo Transport, San Diego is required to enroll under Order No. 97-03-DWQ, National Pollutant Discharge Elimination System (NPDES) General Permit No. CAS000001, *Waste Discharge Requirements (WDRs) For Discharges of Storm Water Associated with Industrial Activities Excluding Construction Activities*. Order No. 97-03-DWQ (Industrial Storm Water General Permit) was issued by the State Water Resources Control Board on April 17, 1997 and is enforced locally by the California Regional Water Quality Control Board, San Diego Region (San Diego Water Board).

The San Diego Water Board and the City of San Diego Storm Water Department, inspected your facility and confirmed that coverage under the Industrial Storm Water General Permit for your facility, located at 9955 Marconi in San Diego, is mandatory based on SIC Code 4213 (Trucking Except Local). In addition, the inspectors observed waste oil in open 5 gallon buckets on the ground at the east and south areas of the facility. The inspectors met with the property owner, Richard Moya, and advised Mr. Moya that corrective actions must be taken to clean up and properly dispose of the waste oil. Since you were not present during the inspection, this letter serves as a notice to you that corrective actions are needed to clean up and properly dispose of the waste oil.

The Industrial Storm Water General Permit is an NPDES permit that regulates discharges associated with 10 broad categories of industrial activities. This permit requires the implementation of management measures that will achieve the performance standard of best available technology economically achievable (BAT) and best conventional pollutant control technology (BCT). The Industrial Storm Water General Permit also requires the development of a Storm Water Pollution Prevention Plan (SWPPP) and a water quality monitoring plan. Through the SWPPP, sources of pollutants are to be identified and the means to manage the sources to reduce storm water pollution described. The permit requires that an annual report be submitted each July 1. Attached is a copy Order No. 97-03-DWQ and Notice of Intent Form.

[http://www.waterboards.ca.gov/water\\_issues/programs/stormwater/industrial.shtml](http://www.waterboards.ca.gov/water_issues/programs/stormwater/industrial.shtml)

Within thirty days, please submit a completed NOI, a site map of the facility, and the application fee of \$1791.00 made payable to "State Water Resources Control Board."
