

STATE OF CALIFORNIA
CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SAN FRANCISCO BAY REGION

STAFF SUMMARY REPORT – Donald Trembley
MEETING DATE: February 18, 2004

ITEM: 5.C

SUBJECT: LUST CLEANUP PROGRAM - CASE CLOSURE STATUS REPORT

DISCUSSION: Attached is a table summarizing the closure status of leaking underground fuel tank (LUST) cases as of January 31, 2004, for the Regional Board and the local agencies within the nine counties under the Regional Board's jurisdiction.

All local oversight program agencies and local implementing agencies are currently using GEOTRACKER for managing their own LUST data, except the San Rafael Fire Department. The San Rafael Fire Department is currently upgrading its database to be compatible with GEOTRACKER.

We are contemplating a new report format that will not only contain closure status but will more accurately reflect the scope of the leaking underground storage tank cleanup program. The new report format will be presented in the March 2004 report.

RECOMMEN-
DATION: This is an information item only and no action is necessary.
