

**STATE OF CALIFORNIA  
CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD  
SAN FRANCISCO BAY REGION**

**STAFF SUMMARY REPORT (Blair Allen)  
MEETING DATE: October 11, 2006**

**ITEM: 11**

**SUBJECT: Cosentino Winery, Cosentino Winery LLC and Cosentino Winery  
Wastewater Treatment System, Napa County - Reissuance of  
Waste Discharge Requirements**

**CHRONOLOGY:** March 1989 – Water Reclamation Requirements adopted

**DISCUSSION:** Cosentino Winery is a commercial winery facility in an unincorporated area of Napa Valley north of the town of Yountville. It is immediately north of the Mustards Grill restaurant that is the subject of Item 10 on this month's agenda. There are no municipal sewers in this area. The Winery is served by an on-site wastewater system. In the past, the Winery and Mustards Grill were both served by the same wastewater system. The old system was inadequate, and the two businesses decided to build separate, new systems.

The Winery has proposed a new separate wastewater system and submitted an application for updated waste discharge requirements (WDRs). Draft WDRs for the Winery were circulated shortly after draft WDRs for Mustards Grill were circulated, and we received comments from both the Discharger and from concerned neighbors. We have given priority to completing the response to comments and resultant revisions to Mustards Grill's draft WDRs over those of the Winery's; thus, we recommend continuing this item.

**RECOMMEN-  
DATION:** Continue the item.
