

*California Regional Water Quality Control Board
San Francisco Bay Region*

Water Quality Excellence Award

Heroic Multimedia Pollution Prevention

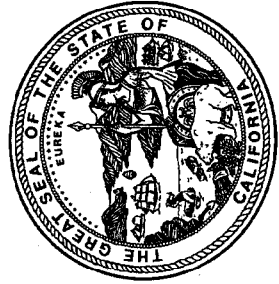

Awarded on this 8th Day of March 2006 to:

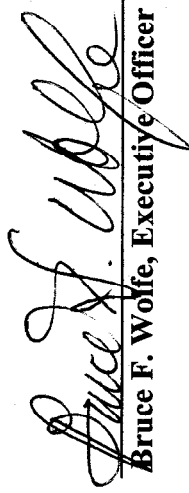

City of San Leandro

For

Going above and beyond permit requirements by implementing an extensive P2 program to achieve pollutant reductions to the environment through various avenues (sewers, stormdrains, biosolids, solid waste) thereby benefiting multi-media (surface waters, land, and air); implementing source control for mercury, copper, pesticides, fats, oil, grease, batteries, fluorescent bulbs, and "techno waste" (computers, cell phones, etc.) by both regulatory and non-regulatory means; and operating as a "green business" through environmental purchasing and green building practices.

John Muller, Chairman

Bruce F. Wolfe, Executive Officer

San Francisco Bay Region*

Water Quality Excellence Award

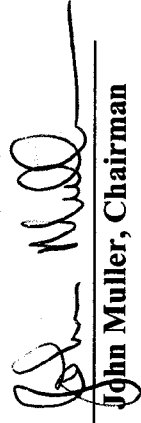

Top Pollution Prevention Achievement

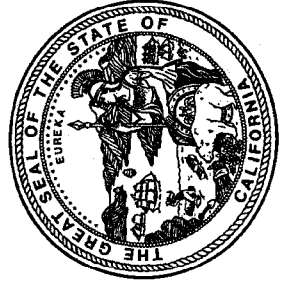

Awarded on this 8th Day of March 2006 to:

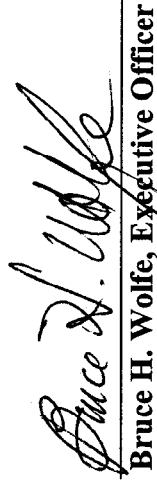

San Francisco Public Utilities Commission

For

Outstanding initiative in developing the first dental mercury reduction program in California to implement a source control program combining amalgam separators and Best Management Practices for dental offices; for permitting over 500 dental clinics within 18 months, achieving full compliance within the program's first year; conducting initial outreach to state and national dental associations and investigating technologies, thereby paving the way for other municipalities to pursue similar source control options.

Bruce H. Wolfe, Executive Officer

*California Regional Water Quality Control Board
San Francisco Bay Region*

Water Quality Excellence Award

Outstanding Public Outreach in Pollution Prevention

Awarded on this 8th Day of March 2006 to:

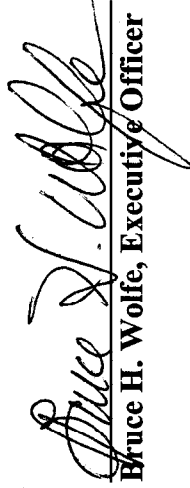

Mt. View Sanitary District

For

Leadership in developing an outstanding P2 educational program to educate children about marsh ecology, pollutants, how they enter the environment, and P2 alternatives for the home; for implementing a highly collaborative program through standard science curricula continuously taught to over 1,500 third-fifth graders, county-wide each year; for developing model educational references about marsh ecology and P2, thereby promoting P2 awareness and long-term behavioral changes in future generations.

John Muller, Chairman

Bruce H. Wolfe, Executive Officer

*California Regional Water Quality Control Board
San Francisco Bay Region*

Water Quality Excellence Award

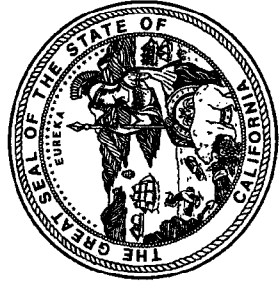

Outstanding Public Outreach in Pollution Prevention

Awarded on this 8th Day of March 2006 to:

Delta Diablo Sanitation District

For

Implementing a P2 outreach program that goes above and beyond permit requirements to control sources of mercury through an exemplary fluorescent bulb collection program (4,000 pounds of bulbs); for its unique educational program for fifth graders that teaches about the San Francisco Bay and Delta ecosystem and P2 alternatives; for a 10 year effort to survey public awareness of P2 practices while using this feedback to increase program effectiveness.

Water Quality Excellence Award

“The World is My Oyster” - Global Pollution Prevention Solutions

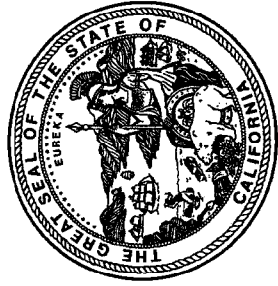

Awarded on this 8th Day of March 2006 to:

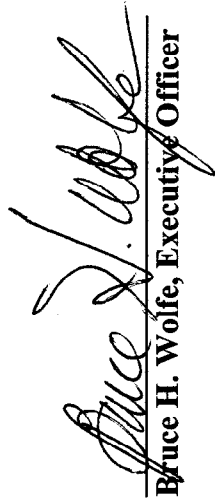

The Palo Alto Regional Water Quality Control Plant

For

Exemplary pursuit of P2 solutions that extend beyond City boundaries to benefit all municipalities by: spearheading legislative initiatives (mercury, copper, pesticides, etc.); pursuing product bans (zinc floor waxes, copper roofing, copper roof killers); leading multi-agency collaboration to address complex pollutants (pesticides, water treatment chemicals, and pharmaceuticals); coordinating regional source control efforts; and funding research and pilot projects (brake pads, polybrominated flame retardants, endocrine disrupting compounds, and triclosan.)

John Muller, Chairman

Bruce H. Wolfe, Executive Officer
