**BACKGROUND:** On September 10, 2021, the Water Board transmitted the Tentative Order to the Permittees and other stakeholders for public comments. The Tentative Order is a draft permit pursuant to 40 C.F.R. section 124.6(d), and opportunity for public comment is provided pursuant to 40 C.F.R. section 124.10 and California Water Code section 13167.5. The Permittees own and/or operate municipal separate storm sewer systems (MS4s) from which stormwater is discharged into receiving waters, including Bay Area creeks and rivers, San Francisco Bay, the Delta, and the Pacific Ocean. The Tentative Order requires Permittees to reduce the discharge of pollutants from their MS4s and to effectively prohibit non-stormwater discharges into storm sewers pursuant to the federal Clean Water Act. It includes a Fact Sheet that sets forth the principal facts and the significant factual, technical, legal, and policy rationales for the Tentative Order's requirements.

The Tentative Order is available at the Water Board's website:
