TENTATIVE ORDER R8-2026-0006¹

NOTICE IS HEREBY GIVEN that the Santa Ana Regional Water Quality Control Board (Santa Ana Water Board) will hold a public hearing to receive oral comments and consider adoption of tentative Order R8-2026-0006 (Tentative Order), which will serve as Waste Discharge Requirements for the discharge of treated groundwater into the subsurface at the Flatiron Groundwater Treatment Facility (501 West Francis Street, Ontario). The objective of the Waste Discharge Requirements is to authorize extraction of groundwater contaminated with volatile organic compounds (VOCs) and hexavalent chromium (CrVI) and injection of treated groundwater into the subsurface. With proper management and monitoring as required by the Tentative Order and associated Monitoring and Reporting Program, the discharge will be consistent with the maximum benefit to the people of the state, and will not unreasonably impair any existing or prospective beneficial uses of groundwater. For additional background on the ongoing investigation and cleanup at the Flatiron Groundwater Treatment Facility, reference the GeoTracker database under Global ID No. SL0607132486 at:
