Project Name: Glass Road County Bridges Emergency Maintenance

Received: 10/12/2023

Date Posted: 10/18/2023

End of 21 Day Public Comment Period: 11/08/2023

Project City: San Bernardino

Project County: San Bernardino

Applicant Organization: San Bernardino County Department of Public Works (DPW)

Applicant Name: Lorraine Acuna

Waterboard Staff: TBA

Brief Description of Project:

Project Description: Tropical storm Hilary brought rains to southern California on August 20-21. As a result of the storm, flood related damages occurred in multiple locations all over San Bernardino County. Heavy flows on Barton Creek conveyed sediment and cobble that accumulated and significantly reduced freeboard under three County maintained bridges on Glass Road. Free board under the bridges was significantly impacted by the deposition of cobble and sediment under the bridges. If left as is, it is expected that flows in subsequent storm will overtop and flood the road. Maintenance is limited to removing accumulated cobble and sediment to restore freeboard capacity under the bridges.

Project Activities: A County contractor will remove sediment and cobble from the upstream and downstream approximately 100 LF at each bridge location. The material will be removed with an excavator and the length will be limited by the reach of the excavator. The excavator will remain on the road and shoulders and no equipment will be placed in the creeks.
