

Calwatr September 2026 Release Notes

Address Changes:

- Bulk address changes have an updated interface to make changing an address across many rights at the same time more efficient
- Agents can now update addresses for the primary owner
- Improvements to how pending address changes are viewed
- You can now view the current address when making an address change
- You can now make address changes directly in the annual report for most types of annual report

Alternative Compliance Plans (ACP):

- Improvements to how Qualified individuals are entered
- Small adjustments to make ACPs easier to file and more similar to other forms in CalWATRS

Annual Reporting:

- Improved notification of annual report opening to consolidate emails for users with many rights
- Various improvements to the readability and accuracy of language in the form.
- Clarified the "Do you need to change your claim type?" section when revising an annual report
- Annual report statuses have been improved to show a difference between outstanding prior year report or current year's report
- Search has been made more consistent
- Annual reports now display which right is being reported for on most pages
- The diversion and use information screen has been simplified to require fewer save inputs and other small tweaks
- Entering measurement device information has been overhauled to improve ease and accuracy of entry and better match the regulation

Groundwater Recordations:

- You can now download a current year invoice for all your recordations in your "My annual reports" tab
- Annual report has been simplified and the information required brought more in line with how groundwater recordation reports were previously filed.

Measurement:

- Measurement methodologies has been added to the "My Measurement Details".
- Measurement device registration has been updated to support the Large Diverter weekly requirement of SB88
- Users can now view their raw measured data for telemetered devices

New Forms:

- A new form has been created for Inoperable Measurement Device Exemption
- A new form has been created to Request Additional Time to Comply (with measurement regulation)

Qualified Individuals:

- Qualified individuals can now confirm and/or update their qualifications in their profile in CalWATRS
