Subject: Proposed Water Regulatory Framework / San Diego County

Dear Ms. Frevert:

I am writing to oppose blanket, state-wide, uniform water restrictions that unfairly do not recognize the planning and spending that has occurred in San Diego County where water supplies are ample.

California is a big state. Really big. Not every nook, cranny or corner of the State has the same water use, or access to supplies.

And nowhere in the State have local water districts (and thus the ratepayers) done more to plan for long-term water needs, and to build supply infrastructure, reservoirs and a desalinization plant than San Diego.

Don't penalize the one area in the State that planned ahead and spent wisely. We oppose blanket restrictions that unfairly impact San Diego County.

Sincerely,

Tim Pickwell
