Sacramento, CA 94812-0100

**Re: Delta VCD NPDES Permit 2012 Annual Report, NPDES Vector Control  
Permit (Order No. 2012-0003-DWQ)**

Dear Mr. Isorena:

Please find our electronic copy of the 2012 Annual Report prepared by Delta Vector Control District for the National Pollutant Discharge Elimination System (NPDES) Vector Control Permit (Order No. 2012-0003-DWQ). The Annual Report presents the:

- Narrative Annual Report
- Map of all treatments to WOTUS
- Application Log of all applications to WOTUS
- Visual Monitoring Log.

If you have any questions, please contact Michael Alburn, Delta VCD General Manager, at (559) 732-8606 or [alburnm@deltavcd.com](mailto:alburnm@deltavcd.com).

Sincerely,

**Delta Vector Control District**

*Michael W Alburn*

Michael W. Alburn  
General Manager

**1. Annual Report**

**a. Executive Summary**

Delta Vector Control District (District) complied with the applicable components of the General NPDES Permit for Biological and Residual Pesticide Discharges from Vector Control Applications (General Permit). The District is a member of the MVCAC NPDES Permit Coalition and the Coalition conducted all required chemical and physical monitoring. The results of the Coalition's monitoring will be included in the Coalition Annual Report that will be sent separately to the SWRCB and Regional Boards.

The District made 475 applications to waters of the U.S. during the 2012 calendar year. The log of these applications can be found in Attachment B. The District performed Visual Monitoring of >10% of individual application sites identified as "Waters of the US" until July 2012. The visual monitoring completed by the District in the first half of the year found that there is no observable change in water quality between the background, event, and post event time periods-see monitoring log sheets. The SWRCB notified the permit holders in a letter to MVCAC dated July 13, 2012 that because the visual monitoring requirements were "interfering with the need for maximal efficient application to adequately protect human health from vector-borne diseases like West Nile Virus," that the visual monitoring was no longer required by individual Districts. The District continued to follow the guidelines of its Pesticide Application Plan (PAP).

**b. Summary of Monitoring Data**

The District began the year by complying with the visual monitoring requirements of the permit. See Footnote 1 of Tables C-1 and C-2 in Amended Water Quality Control Order No. 2011-0002-DWQ, General Permit No. CAG990004. These requirements required a tremendous amount of time to monitor including a number of revisits to specific sites to gather the necessary information. Most critically, time spent revisiting old sites caused delay in getting to new sites. Given the short lifecycle of the mosquito, this greatly exacerbated the task of looking for and treating mosquito-breeding sites early in their lifecycle when treatment is more concentrated and effective. Recognizing the need of mosquito control districts to quickly find and treat mosquito breeding sites to prevent the spread of disease, such as West Nile virus, the SWRCB issued a letter to MVCAC dated July 13, 2012 that indicated the visual monitoring requirement would no longer be required of individual Districts.

Per the instructions in the letter, the Coalition will provide information on the incidence of West Nile Virus and other similar public health threats in the Coalition's annual report.

For the reasons stated above, the District will no longer be collecting visual monitoring data.

c. BMP Identification

BMP's utilized by the District are outlined in the District's PAP. These include; emphasis on reducing mosquito breeding habitat through non-chemical means, training employees to prevent spills and applying appropriate amount of chemical in each treatment area, calibrate application equipment and use a biology based assessment for determining treatment thresholds.

d. Violation Discussion

No violations of the General Permit by the District were observed.

e. Map of Applications

See Attachment A

f. Log of Applications made to Waters of the U.S.

Attachment B includes monthly reports of all application data on the covered application areas.

g. General Information on Applications

Attachment B includes information on acreage and quantity of each pesticide used, which are derived from the individual pesticide labels.

h. Visual Monitoring Data

Visual Monitoring Data has been submitted to the State Water Board in excel format -Attachment C.

i. BMP, PAP, Monitoring Program Recommendations

No recommendations are being proposed to improve the current BMP's, PAP, or monitoring plan. Any changes to the Coalition Monitoring Plan will be highlighted in the Coalition Monitoring Annual Report.

j. Pesticide Application Log made to Waters of the U.S.

The pesticide application log is contained in Attachment B

2. **Updated PAP Components**

N/A

3. **Self Monitoring Reports**

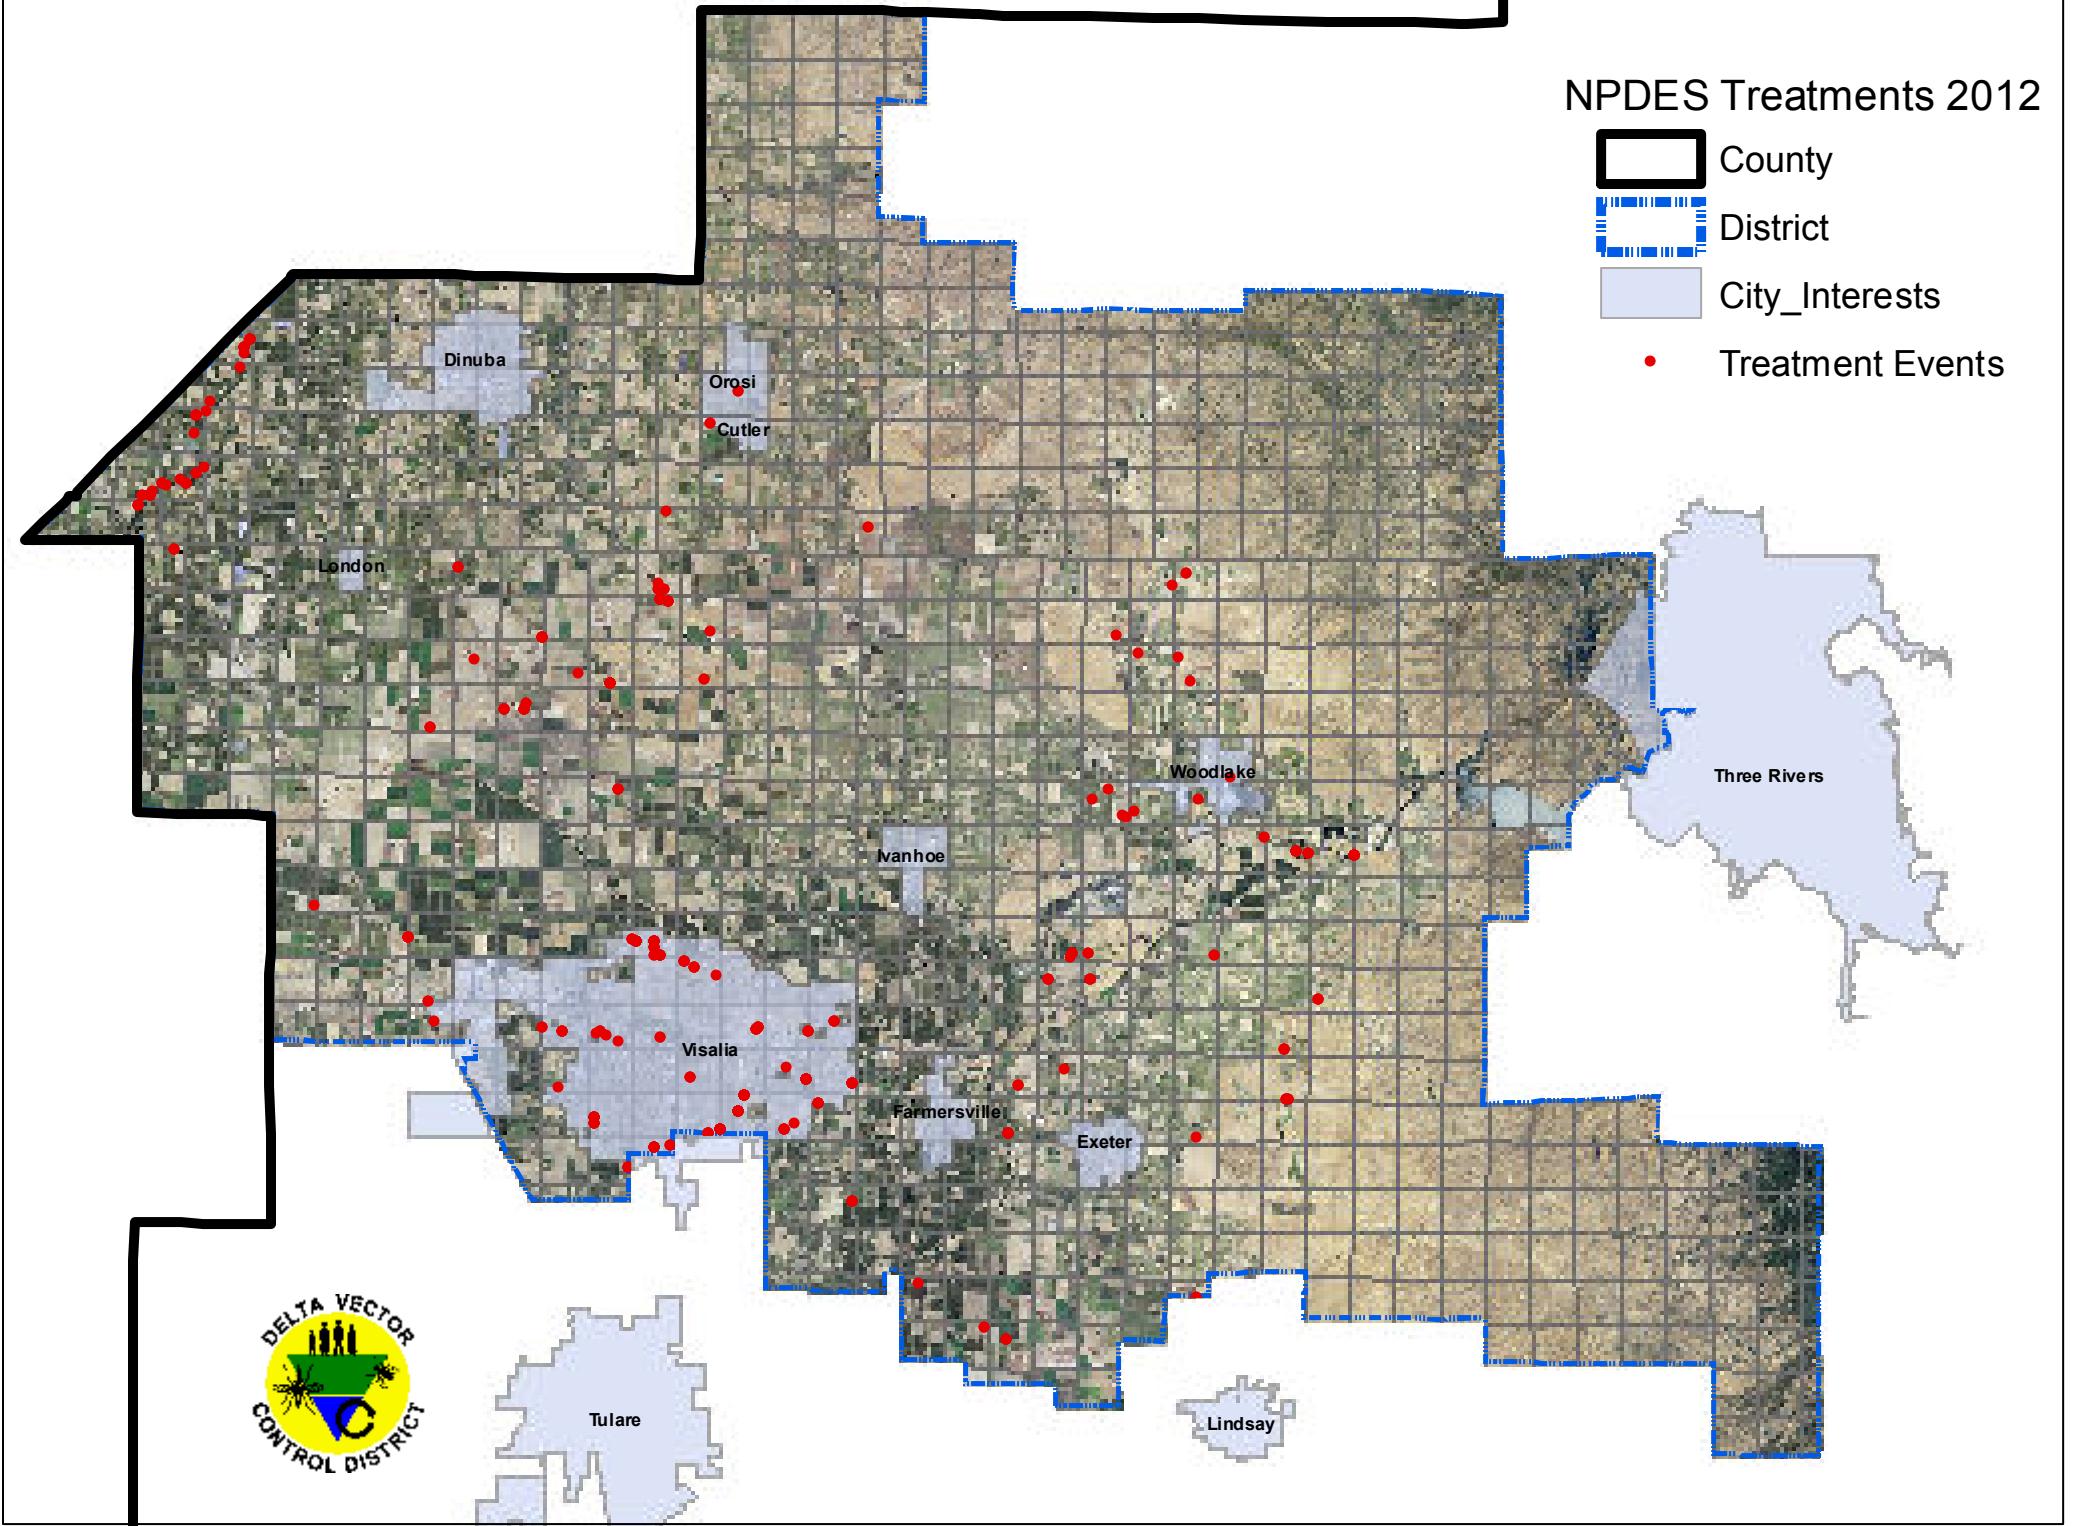

N/A

4. **Monitoring Reports**

The Coalition Monitoring Annual Report will summarize all physical measurements and chemical monitoring done for 2011 and 2012.
