

1. **Annual Report**

a. Executive Summary

Los Angeles County West Vector Control District (District) complied with the applicable components of the General NPDES Permit for Biological and Residual Pesticide Discharges from Vector Control Applications (General Permit). The District is a member of the MVCAC NPDES Permit Coalition and the Coalition conducted all required chemical and physical monitoring. The results of the Coalition's monitoring will be included in the Coalition Annual Report that will be sent separately to the SWRCB and Regional Boards.

The District made 312 applications to waters of the U.S. during the 2012 calendar year. The log of these applications can be found in Attachment B.

The District continued to follow the guidelines of its Pesticide Application Plan (PAP).

b. Summary of Monitoring Data

In this first year of implementation, we planned our visual monitoring work based on historical patterns of frequency and emergence during the mosquito season, and to coincide with the concentration of the greatest number of sites that peak in late summer. Our plans sought to reduce loss of critical staff time for visual monitoring where long distance travel to emergence sites would be required and to minimize loss in our ability to prevent emergence at the greatest number of larval habitat sites. As a result of the determination by the SWRCB to suspend visual monitoring in July to ensure that we reached as many larval sites as possible to prevent WNV, no visual monitoring occurred in 2012.

Per the instructions in the letter, the Coalition will provide information on the incidence of West Nile Virus and other similar public health threats in the Coalition's annual report.

For the reasons stated above, the District will no longer be collecting visual monitoring data.

c. BMP Identification

BMP's utilized by the District are outlined in the District's PAP. These include; emphasis on reducing mosquito breeding habitat through non-chemical means, training employees to prevent spills and applying appropriate amount of chemical in each treatment area, calibrate application equipment and use a biology based assessment for determining treatment thresholds.

d. Violation Discussion

No violations of the General Permit by the District were observed.

- e. Map of Applications
See Attachment A
- f. Log of Applications made to Waters of the U.S.
See Application Log (Attachment A)
- g. General Information on Applications
Attachment B includes information on dosage, concentration and quantity of each pesticide used which are derived from the individual pesticide labels.
- h. Visual Monitoring Data
See Section b above
- i. BMP, PAP, Monitoring Program Recommendations
No recommendations are being proposed to improve the current BMP's, PAP, or monitoring plan. Any changes to the Coalition Monitoring Plan will be highlighted in the Coalition Monitoring Annual Report.
- j. Pesticide Application Log made to Waters of the U.S.
See Section f above

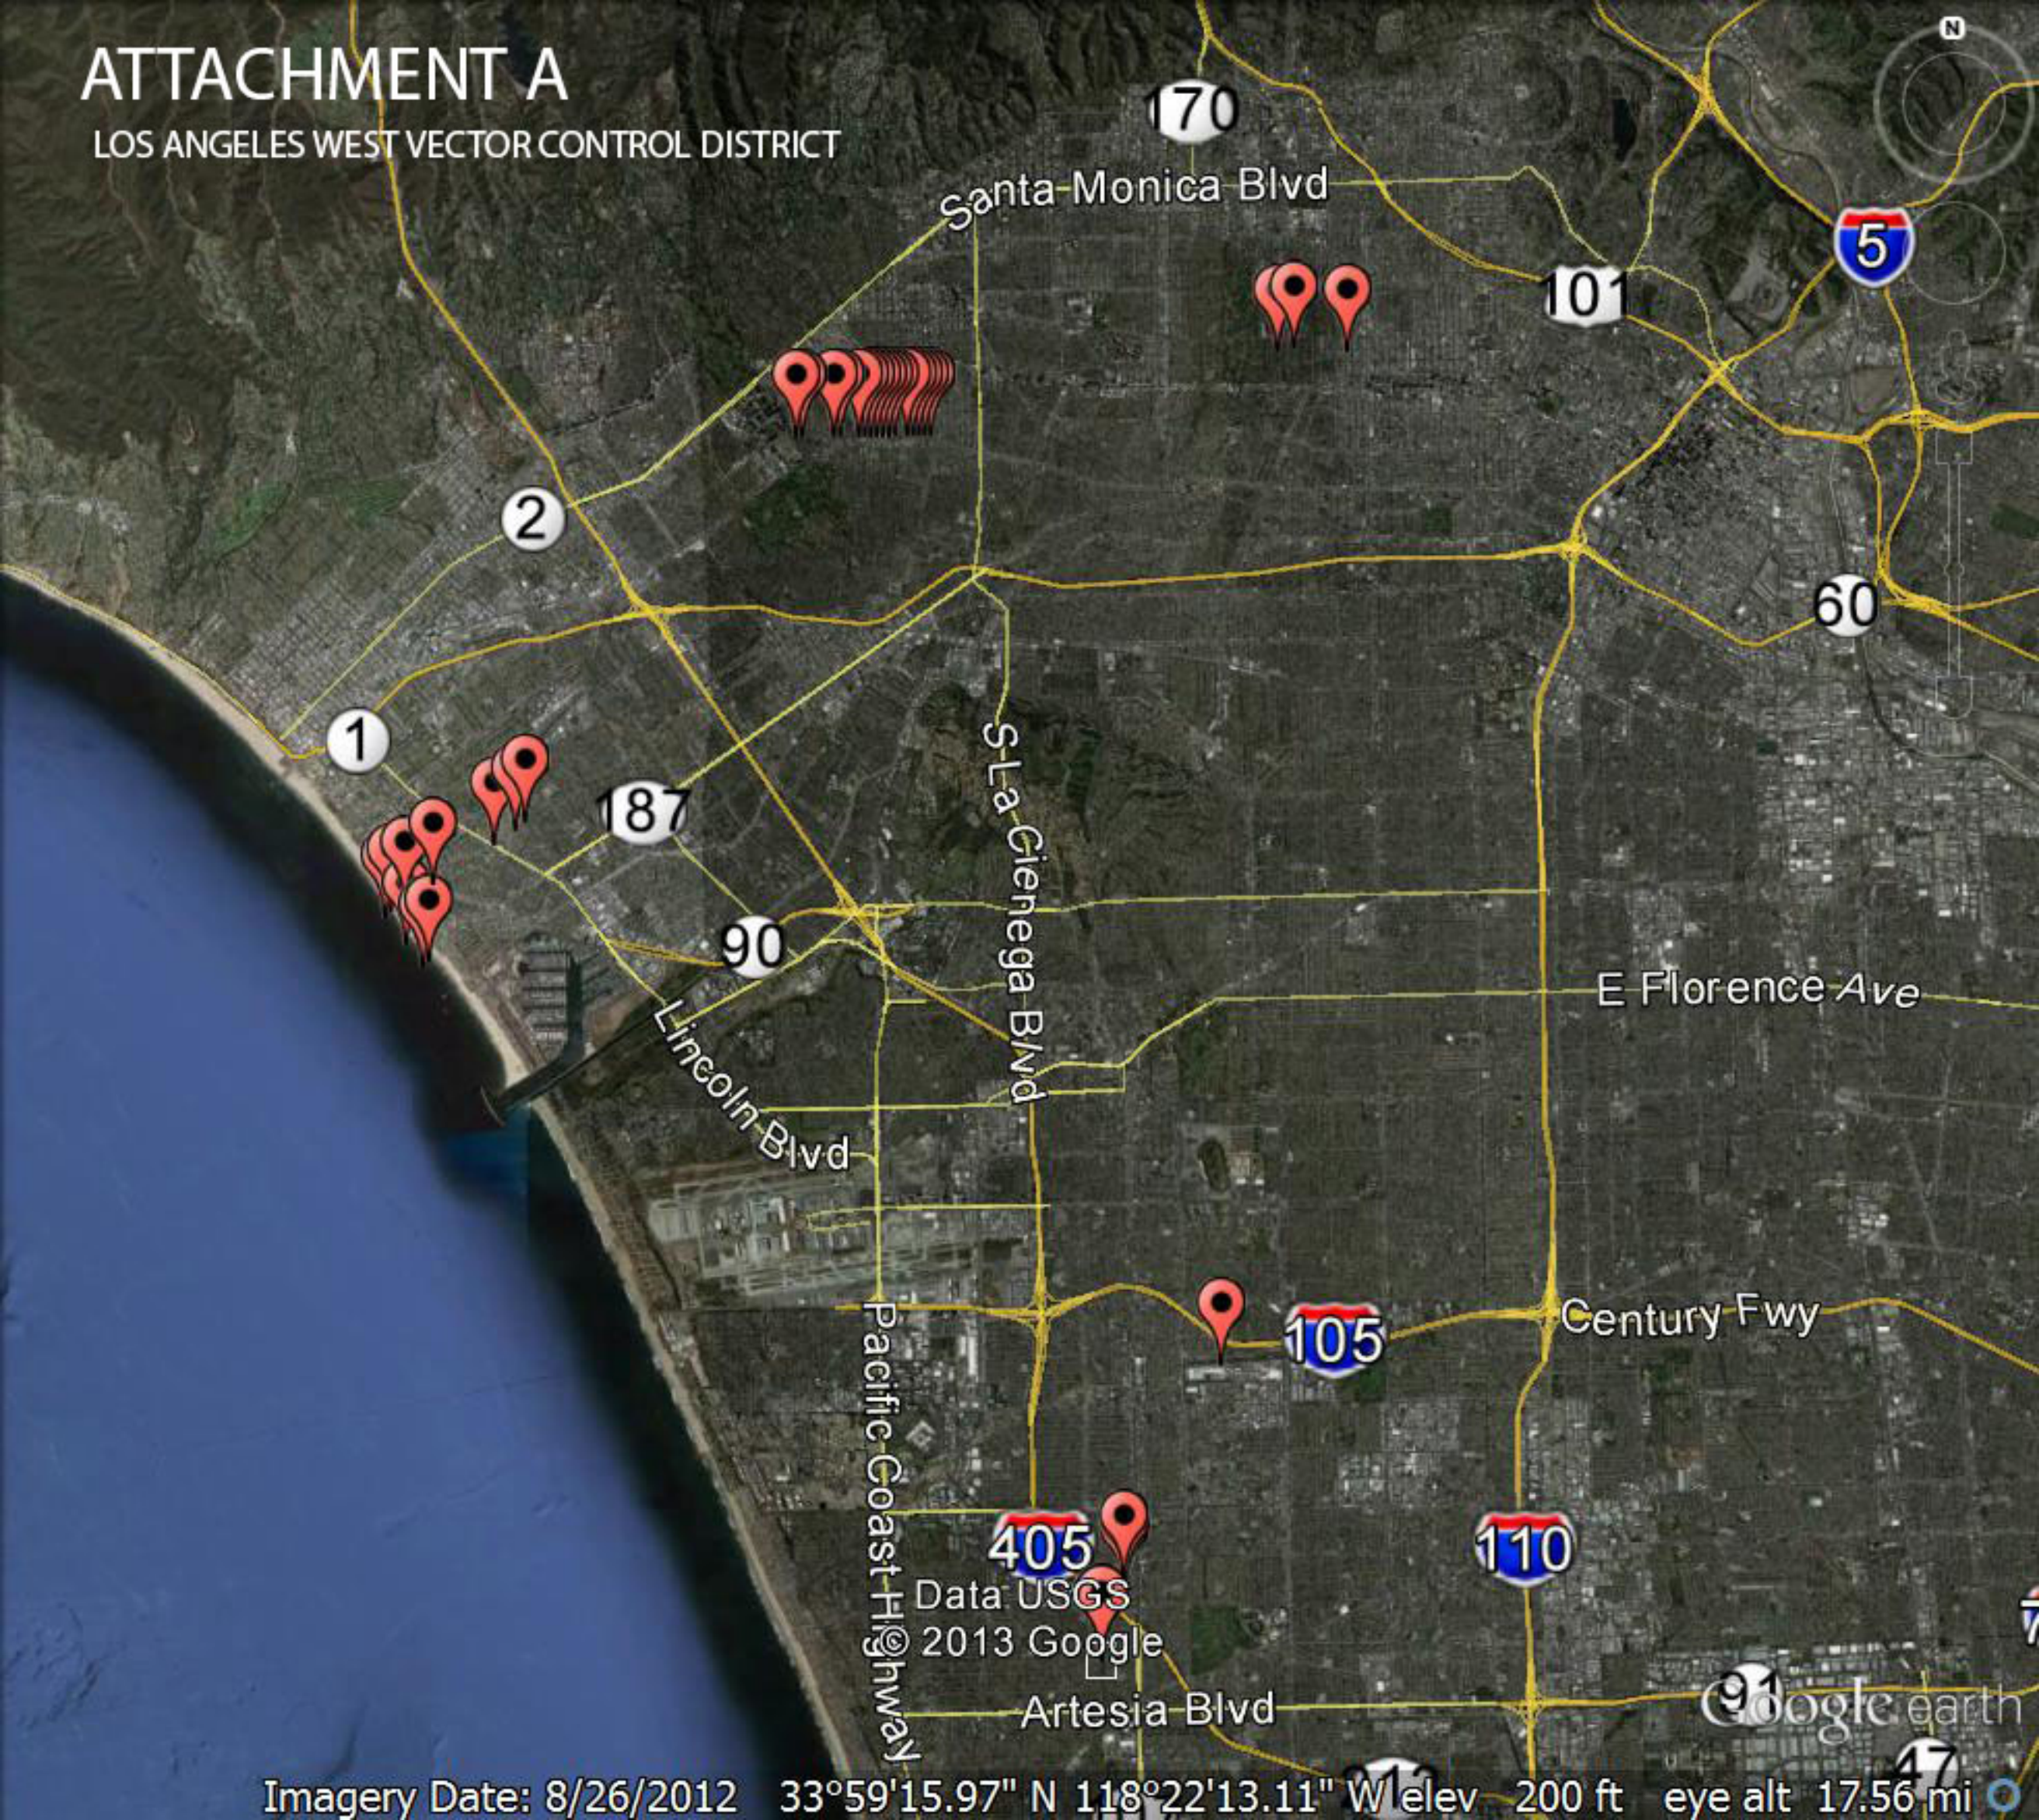

2. **Updated PAP Components**
N/A

3. **Self Monitoring Reports**
N/A

4. **Monitoring Reports**
The Coalition Monitoring Annual Report will summarize all physical measurements and chemical monitoring done for 2012.
