Subject: RE>AES and Poseiden

Dear Board

Please don't weaken the policy goal of a 90-95 % reduction of impingement and entrainment impacts at the AES plant in HB. It should be mandatory for CA . The AES plant if it cannot meet this standard may have to close. Poseiden says if AES is gone they will take over. The EIR for Poseiden says that no marine life is affected by the Poseiden project that AES has taken care of the impingement and entrainment.

If AES can't meet the standards Poseiden must start over with a new EIR because they would then be liable for the Marine life which is killed. Once through Cooling is a thing of the past. Desalination must find another method to obtain their water.

Sincerely,
Eileen Murphy
