

316 (b)
Once Through Cooling
Deadline: 9/15/06 5pm

Sept. 5, 2006

Dear Mr. Dudge and Boardmembers,
I live in the South Bay area of
Chula Vista near a power plant
that has & continues to use
"once through cooling" (OTC). This
method represents antiquated
technology that is toxic to
marine organisms in the Bay.

I urge the State Water Resources
Control Board to quickly bring an
end to this outdated technology
both in Chula Vista and other
areas of California.

Sincerely,
Susan Schertenbach
