

Dear Chairwoman Marcus:

(cc: Vice Chair Frances Spivy-Weber, Tam Doduc, Steven Moore, Dorene D'Amamo)

I urge you to do what you can to close Diablo Canyon and all nuclear reactor plants across the nation. Better, cleaner, harmless energy sources are developed, and developable, as well as deployable. It is only the concern for profits which have largely kept these technologies hidden from the public.

THE CESSATION OF THE PROCUREMENT AND USE OF ALL DIRTY ENERGIES AND FOSSIL FUELS IS LONG OVERDUE, AS IS THE TRANSITION TO GREEN, CLEAN, RENEWABLE, SUSTAINABLE SOURCES OF ENERGY, TECHNOLOGIES, AND DEVICES.

Jason Kamalie
