

Dear Chairwoman Marcus:

(cc: Vice Chair Frances Spivy-Weber, Tam Doduc, Steven Moore, Dorene D'Amamo)

PG&E is owned by the Queen of England. She is a soulless monster who pettles uranium for profit. Look into "smart meters" installed by pg&e in N.CA. they have been proven to put out high frequency ringing that makes people sick and mentally unstable. The plant should be disassembled. CA needs to stop Geo - engineering - if we are to last more than 5 years here - and we need to work with Tesla energy. this is our wake up call. ignore this any longer - we will have no state to salvage.

This drought is man made - geo engineering is the cause of it.

go to [geoengineering watch. org](http://geoengineeringwatch.org).
