Apr 11, 2010

Chairman Charlie R. Hoppin  
1001 I Street  
Sacramento, CA 95814

Dear Chairman Hoppin,

As a resident of San Luis County where Diablo Canyon Nuclear Power plant uses (OTC)Once Through Cooling. I am asking you stop this practice ASAP. The local fisheries are in deep peril. Perhaps of the OTC didn't kill billions of marine larvae, eggs and food for the animals of the sea, our fish populations would be in better shape.

Now that we have finally realized the immense daily destruction to ocean life due to OTC, it is time to stop the practice in a timely manner. It might be considered too costly by some, but the ocean has paid a high enough price for long enough. We need to be responsible stewards of our environment. We need to protect our marine life and try to help improve the collapsed fishing industries.

Sincerely,

Diane Dolden
