Charlie Hoppin, Chair and Board Members
State Water Resources Control Board
1001 I Street
Sacramento, CA 95814

Via electronic mail: commentletters@waterboards.ca.gov

Re: Comment Letters on OTC Policy Amendment

On behalf of California Coastkeeper Alliance (CCKA), Surfrider, and Sierra Club California supporters, we respectfully submit **3,873 comment letters** on the Proposed Amendment (Amendment) to the Water Quality Control Policy on the Use of Coastal and Estuarine Waters for Power Plant Cooling (Policy). The attached spreadsheets compile comment letters resulting from our organizations' calls to action. It is of particular note that while many members of our collective organizations have been actively involved in the development of this Policy since its inception, many individuals became engaged for the first time upon learning that a new set of amendments to significantly weaken the Policy are once again on the table.

The full text of our organizations' letters is attached, but we call to the Board's attention one key message that was consistent throughout all three letters, and which resonated with so many Californians:

"I adamantly oppose the recently proposed amendments to the Policy and request you immediately begin the task of enforcing the current Policy's goals and timelines with no changes to the Policy."

On behalf of 3,873 surfers, divers, swimmers, scientists, fisher men and women, parents, students and others who submitted letters, and on behalf of Californians around the state who care about our coast and ocean, we respectfully submit to this Board that the Policy must stand. By rejecting the Amendment in full and upholding the current language in the adopted Policy, you will have the deep gratitude of generations of Californians, who will surely reap the benefits of your work.

Sincerely,

Linda Sheehan
California Coastkeeper Alliance

Jim Metropulos
Sierra Club California

Joe Geever
Surfrider

Chair Hoppin & Board Members
State Water Resources Control Board
1001 I Street, 24th Floor
Sacramento, CA 95814

RE: Protect Our Magnificent Coast and Ocean / Uphold and Implement the Current Policy on Coastal Power Plants

Dear Chair Hoppin & Board Members:

I am writing as a Californian with deep concerns about the health of our marine life and coastal habitats. Our precious ocean is under numerous and growing threats. Ensuring healthy and robust bays, estuaries, coasts, and ocean will mean reducing or eliminating each of those multiple threats.

Your recent adoption of the "Policy on the Use of Coastal and Estuarine Waters for Power Plant Cooling" was an important and critical step towards restoring and protecting our marine environment, protecting the integrity of California's electrical grid, and encouraging clean energy for the future.

I adamantly oppose the recently proposed amendments to the Policy and request you immediately begin the task of enforcing the current Policy's goals and timelines with no changes to the Policy.

I applaud the Board for your five years of exhaustive independent research, coordination of multiple environmental and energy agencies, and extensive public outreach that resulted in a Policy that was fair and balanced. The final Policy met the difficult multiple goals of:

- eliminating unnecessary marine life mortality,
- fully protecting the state against disruption of electrical supply, and
- providing sufficient time and flexibility for power plant owners to prepare and transition to the "best available technology" for minimizing the ongoing destruction to marine life and habitats.

The path that would be set by the amendments under current consideration was carefully and fully considered in the five years of thorough, exhaustive research and debate process that resulted in the adoption of the final Policy. The Clean Water Act mandated the changes incorporated in the final Policy almost four decades ago. The current amendments are nothing more than a thinly veiled effort by a powerful industry and their lobbyists to create even more loopholes and delays - efforts that were already heard and properly rejected by this Board.

Enough is enough. You should be commended for carrying out your duty under the Clean Water Act to thoroughly study and vet publicly a reasonable and balanced transition to avoid unnecessary marine life mortality through employing the "best technology" available for power plant cooling. This decision should stand.

By upholding the current language in the adopted Policy, you will have the deep gratitude and respect of the millions of Californians who care about our coast and ocean, and the generations of Californians to come who will surely reap the benefits of your work.
