Arthur Baggett
State Water Resources Control Board
PO Box 100
Sacramento, California 95812

September 8, 2005

Dear Mr. Baggett,

I have recently been reading increasing numbers of articles in our local papers in which regional politicians are hoping to put off the storm water run off repairs to our drainage system recently mandated by NOAA. As a member of an "Area of Special Biological Significance (ASBS)", it is my hope that you will help ensure that our communities do not continue to get off the hook. Your State Water Board adopted the pollution discharge prohibition twenty years ago! It is clearly time for action. We have given our community leaders long enough to plan ahead for the required changes. Please help force us to do the right thing to protect these fragile areas. Financial debt can be repaid. Loss of habitat and diversity can not.

Please continue to help protect our rights!!

Sincerely,

Handwritten signature of Jason Williams.
