## I. INTRODUCTION

---

The State Water Resources Control Board (State Water Board) added capabilities to the GeoTracker database including building-specific information for a cleanup case and the ability to differentiate Field Points for collecting samples.

This document provides instruction on how to create relevant vapor intrusion (VI) information to be used in a VI assessment including a building profile and how to assign vapor data related to a specific building. This capability is performed through the VI Building Tool in the electronic submittal of information (ESI) portal of GeoTracker. This document assumes the reader is aware of the GeoTracker ESI process. If unfamiliar with the GeoTracker ESI process, the reader should familiarize themselves with the [“Electronic Submittal of Information \(ESI\) Beginner’s Guide”](#)<sup>1</sup> (ESI Beginner’s Guide). ESI users should use the tool to track VI assessments for their Site/Facility, as well as, list VI building profiles in the study area with an associated Site/Facility.

The VI Buildings Tool contains the ESI user’s Site/Facility, which has associated VI data. The VI building tool should be used for all the ESI user’s Site/Facility with a VI assessment. Through the VI building tool, VI data are uploaded, assigned the appropriate Field Point Class, and then associated with its respective building within the Site/Facility. VI building data attributes include both building attributes (e.g., design, occupants, foundation type) and sample attributes (e.g., location, media, concentration).

***Note: The Site/Facility used in this document is not an actual case and created only for demonstration purposes.***

## II. FIELD POINT AND SAMPLING SETUP

---

The [“ESI Beginners Guide”](#) provides information for ESI accounts, how to claim a Site/Facility, add Field Points to a site, and/or upload (submit) ESI data files.

A summary of the procedures for logging into an ESI account and adding/uploading ESI features is presented below.

Log into GeoTracker ESI: <https://geotracker.waterboards.ca.gov/esi/>

Once ESI users have access and have followed the steps outlined in the [“ESI Beginner’s Guide”](#) to claim their Site/Facility, they may begin to assign Field Points, upload VI data, and create VI building profiles.

---

<sup>1</sup> [ESI Beginner’s Guide: https://www.waterboards.ca.gov/ust/electronic\\_submittal/docs/beginnerguide2.pdf](https://www.waterboards.ca.gov/ust/electronic_submittal/docs/beginnerguide2.pdf)

## **A. SETTING UP FIELD POINTS FOR VAPOR INTRUSION ASSESSMENT**

When using the new VI features of GeoTracker (explained in subsequent sections), it is necessary that existing and new Field Points used for collection of vapor samples be assigned appropriate names and the appropriate “Field Point Class.” For example, a soil gas sample location (Field Point) can be collected from a temporary grab sample, soil gas probe, or a monitoring gas well. Thus, the soil gas Field Point should be assigned a Field Point Class of Soil Gas (SG), Monitoring Gas Well (MGW), or a Transient Subsurface Sampling Point (TRS), respectively.

**Note: The Field Point is the type of the sample point and a Field Point Class defines the sample media.**

The table below shows the available Field Points, appropriate naming convention, available Field Point Class and description of each of vapor type sample available for the GeoTracker VI functionality.

<b>Field Point</b>	<b>Appropriate Field Point Name</b>	<b>Available Field Point Class and (Valid Value)</b>	<b>Description</b>
Indoor Air	IA – 1a, IA1, IA – Bath B1, IA – 1	1. Indoor Air (IA)	Air sample collected from within building.
Subslab	SSV– 1a, SSV1, SS – Bath B1, SS – 1	1. Subslab Soil Vapor (SSV)	Soil vapor sample collected beneath building foundation footprint.
Crawl space	CSA – 1, CSA – 1a	1. Crawl Space Air (CSA)	Air sample collected in the crawl space area of the building.
Soil Gas	SG – 1, SG – 1a, SG – 1b, SG1, GRB – 1a	1. Soil Gas (SG) 2. Monitoring Gas Well (MGW) 3. Transient Subsurface Sampling Point (TRS)	Soil vapor sample collected outside of the building foundation footprint. For non-permanent sample locations, use transient subsurface sampling point.
Ambient Air/ Outdoor	AAS – 1, AAS – 1a, OA – 1, OA – 1a	1. Ambient Air Sample (AAS)	Air sample collected outside of the building.
Sewer Air	SWAG – 1, SWAG – 1a	1. Sewer Air Gas (SWAG)	Air/vapor sample collected within a sewer line.
Groundwater	MW – 1, GB – 1a	1. Remediation/Groundwater Monitoring Well (MW) 2. Transient Subsurface Sampling Point (TRS)	Groundwater sample collected associated with Site/Facility. For nonpermanent sample locations, use transient subsurface sampling point.

**Note: Many existing vapor sample Field Points with a Field Point Class identified as “vapor” should be changed for existing Field Points that are to be used in a vapor intrusion assessment. To re-assign a Field Point to the appropriate Field Point class use the edit Field Point functionality in the ESI portal (refer to [Section II.D](#)).**

## **B. SAMPLE ID NOMENCLATURE**

The SAMPID (Sample ID) field in the GeoTracker Electronic Deliverable Format (EDF) (EDFSAMP, EDFTEST, and EDFFLAT files)<sup>2</sup> is the unique identifier assigned to a field sample as it appears on the Chain-of-Custody. The Sample ID normally is the same as the Field Point Name, although for certain scenarios the Sample ID will be different to indicate heating, ventilation, and air conditioning (HVAC) conditions or subsurface depth. The Sample ID field entry can be up to 25 characters long.

### **Heating, Ventilation, and Air Conditioning Settings**

As part of VI investigations, some information about HVAC settings should be contained within the Sample ID. As such, a Sample ID for an indoor air or subslab sample should indicate if heating or air conditioning is on or off. It is highly recommended that the nomenclature presented in the table below for Sample ID be used when submitting this sample event scenario to standardize vapor entry and to help identify HVAC conditions during sample collection in the database.

<b>SAMPID</b>	<b>Field Point Name</b>	<b>Field Point Class</b>	<b>Description</b>
IA – 1 – HEAT ON	IA – 1	Indoor Air	Air sample collected from within a building with the heating system on.
IA – 1 – COOL ON	IA – 1	Indoor Air	Air sample collected from within a building with the cooling system on.
IA – 1 – HVAC OFF	IA – 1	Indoor Air	Air sample collected from within a building with the HVAC system off.
SSV – 1 – HEAT ON	SSV – 1	Subslab	Subslab sample collected from within a building with the heating system on.
SSV – 1 – COOL ON	SSV – 1	Subslab	Subslab sample collected from within a building with the air conditioning system on.
SS – 1 – HVAC OFF	SSV – 1	Subslab	Subslab sample collected from within a building with the HVAC system off.

### **Soil Gas Depths for a Single Sampling Point**

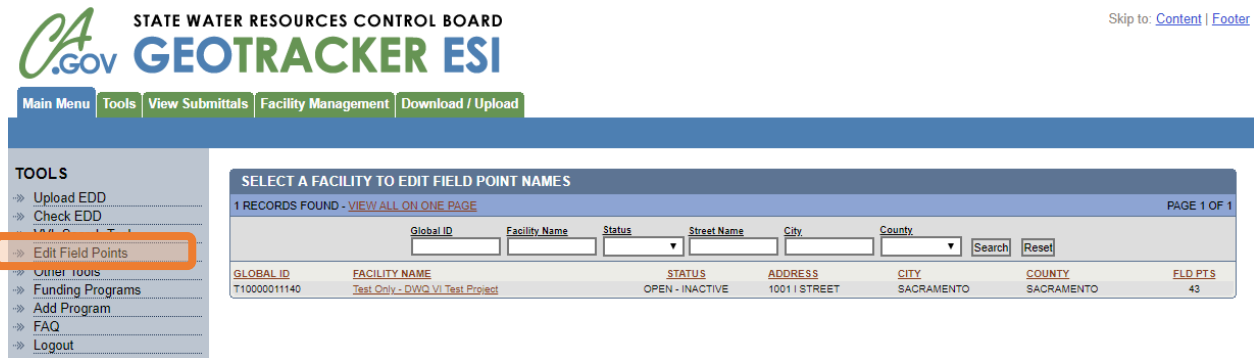

As part of VI investigations, information about depth-discrete sampling performed within a single sampling point should be contained within the Sample ID. As such, a Sample ID for this type of soil gas sample should indicate at what depth in feet the sample was collected. It is highly recommended that the nomenclature presented in the table below for Sample ID be used when submitting this sample event scenario to standardize vapor entry in the database.

<b>SAMPID</b>	<b>Field Point Name</b>	<b>Field Point Class</b>	<b>Description</b>
SG – 1a7.5 SG – 1b15.0	SG – 1	Soil Gas	Soil gas samples collected from a single sampling point at 7.5 feet and 15.0 feet.

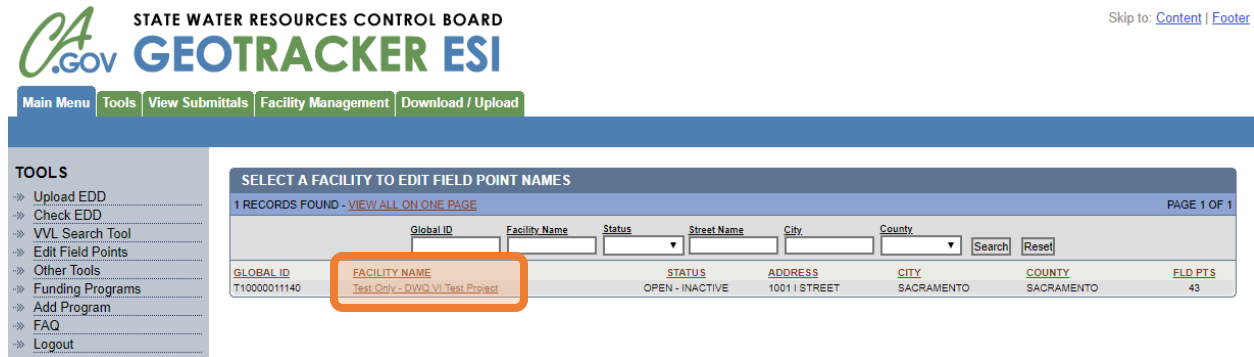

<sup>2</sup> [https://www.waterboards.ca.gov/ust/electronic\\_submittal/docs/faq.pdf](https://www.waterboards.ca.gov/ust/electronic_submittal/docs/faq.pdf)

## C. CREATING FIELD POINT

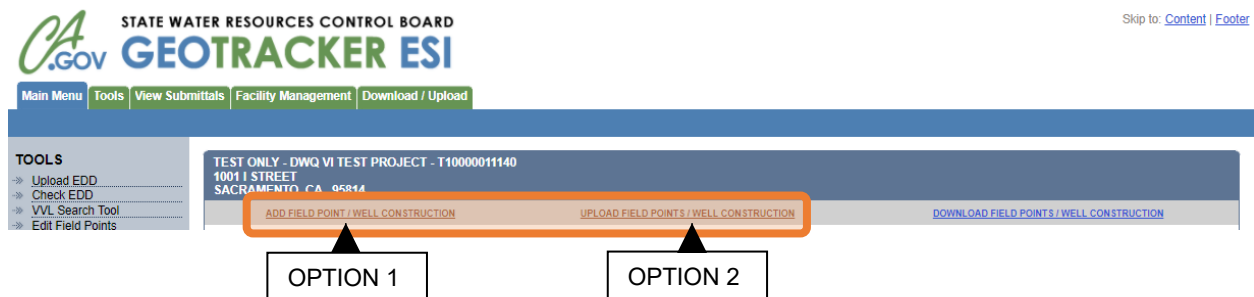

Under Tools on the left-hand side, select “Edit Field Points”; the user’s claimed sites will be displayed.

Select the “Site/Facility” for adding/uploading Field Points.

The Site/Facility page has two options for creating a Field Point and assigning a Field Point Class for every sample location at the study area for the purposes of assessing VI. Described below is how ESI users can either add individual Field Points manually (Option 1) or use an upload feature to add more than one Field Point at a time (Option 2).

***It is critical to have a consistent Field Point naming system and assign the appropriate Field Point Class. This will be important when assigning a Field Point to a VI building profile.***

## OPTION 1 – MANUALLY ADDING A FIELD POINT

The ESI user will manually enter the Field Point Name and select the Field Point Class. When appropriate the depth (top of casing to well screen), length of well screen, and Field Point description should be included (see below).

Select “Add Field Point/Well Construction.”

The screenshot shows the top navigation bar with the CA.GOV logo and 'STATE WATER RESOURCES CONTROL BOARD GEOTRACKER ESI'. Below the navigation bar, the 'TOOLS' menu is visible on the left. The main content area displays project information: 'TEST ONLY - DWQ VI TEST PROJECT - T10000011140' and '1001 I STREET SACRAMENTO, CA 95814'. A button labeled 'ADD FIELD POINT / WELL CONSTRUCTION' is highlighted with an orange box. Other buttons for 'UPLOAD FIELD POINTS / WELL CONSTRUCTION' and 'DOWNLOAD FIELD POINTS / WELL CONSTRUCTION' are also visible.

Input the assigned Field Point name and select the appropriate Field Point Class from the drop-down menu (described in [Section II.A](#)).

This screenshot shows the same interface as the previous one, but with the 'Add This Field Point' button highlighted in orange. The form fields for 'FIELD POINT NAME', 'FIELD POINT CLASS', 'ALTERNATIVE FACILITY ID', 'DEPTH - TOP OF CASING TO WELL SCREEN (FT)', 'LENGTH OF WELL SCREEN (FT)', and 'FIELD POINT DESCRIPTION' are visible. The 'FIELD POINT CLASS' dropdown menu is also highlighted with an orange box.

For Soil Gas and Groundwater Field Points, include the depth from the top of the casing to the well screen and the length of well screen.

This screenshot shows the same interface, but with the 'DEPTH - TOP OF CASING TO WELL SCREEN (FT)' and 'LENGTH OF WELL SCREEN (FT)' input fields highlighted with an orange box. The 'Add This Field Point' button remains highlighted.

For Field Point Description include the buildings name associated with the Field Point.

The screenshot shows the GEOTRACKER ESI web application interface. At the top left is the logo for the STATE WATER RESOURCES CONTROL BOARD (CA.GOV) and GEOTRACKER ESI. A navigation bar includes 'Main Menu', 'Tools', 'View Submittals', 'Facility Management', and 'Download / Upload'. On the left, a 'TOOLS' sidebar lists various functions like 'Upload EDD', 'Check EDD', 'VVL Search Tool', etc. The main content area displays project information: 'TEST ONLY - DWQ VI TEST PROJECT - T10000011140' and '1001 I STREET SACRAMENTO, CA 95814'. Below this is a form with columns for 'FIELD POINT NAME', 'FIELD POINT CLASS', 'ALTERNATIVE FACILITY ID', 'DEPTH - TOP OF CASING TO WELL SCREEN (FT)', 'LENGTH OF WELL SCREEN (FT)', and 'FIELD POINT DESCRIPTION'. The 'FIELD POINT DESCRIPTION' column is highlighted with an orange box. At the bottom of the form is a button labeled 'Add This Field Point'.

Select “Add This Field Point” to store the Field Point in the database.

This screenshot is identical to the one above, showing the same GEOTRACKER ESI interface. In this version, the 'Add This Field Point' button at the bottom of the form is highlighted with an orange box, indicating the next step in the process.

## OPTION 2 – UPLOADING MANY FIELD POINTS

The ESI user will use an upload feature to add more than one Field Point at a time by using a text editor to create the upload file (see below).

Select “Upload Field Points/Well Construction.”

The screenshot shows the GEOTRACKER ESI interface with a different set of options. The project information remains the same. Below the project details, there are three buttons: 'ADD FIELD POINT / WELL CONSTRUCTION', 'UPLOAD FIELD POINTS / WELL CONSTRUCTION', and 'DOWNLOAD FIELD POINTS / WELL CONSTRUCTION'. The 'UPLOAD FIELD POINTS / WELL CONSTRUCTION' button is highlighted with an orange box.

Refer to “Field Point Upload Instructions” (shown below) for the type of files and format required for using this option.

## D. EDIT FIELD POINT

Once Field Points are added/uploaded to a Site/Facility, the list of Field Points for the VI study area will be stored in one location within the database shown below. This page also has the functionality to edit or delete Field Point information. Normally, the Alternative Facility ID is left blank.

STATE WATER RESOURCES CONTROL BOARD

X GW - 1B25	Remediation/Groundwater Monitoring Well		15	10		

**Note: The Field Point name can only be edited by deleting the Field Point and recreating the Field Point.**

To edit Field Point Class, use the drop-down menu (refer to [Section II.A](#)).

FIELD POINT	FIELD POINT CLASS	ALTERNATIVE FACILITY ID	DEPTH - TOP OF CASING TO WELL SCREEN (FT)	LENGTH OF WELL SCREEN (FT)	FIELD POINT DESCRIPTION
X AM - 1	Ambient Air Sample				4Story

To edit depth (top of casing to well screen), length of well screen, or Field Point description, manually enter changes.

To save edits, select **Save Changes** located at the bottom of the page.

To delete a Field Point, select **X** on the left-hand side of the list.

The system will ask the user to confirm deletion of the entry; select "OK" to delete Field Point from database.

FIELD POINT	FIELD POINT CLASS	ALTERNATIVE FACILITY ID	DEPTH - TOP OF CASING TO WELL SCREEN (FT)	LENGTH OF WELL SCREEN (FT)	FIELD POINT DESCRIPTION
X SS - 1	Subslab				Day Care
X BDAYCARE	Subslab				Building 500
X SS - 1 BKSP	Subslab				4Story
X SS - 2	Subslab				Building 500
X SS - 2 ART	Subslab				

**Note: Once laboratory analytical data is uploaded to a Field Point, the Field Point is no longer available to be deleted.**

## **E. UPLOADING LABORATORY ANALYTICAL DATA TO FIELD POINTS FOR VAPOR INTRUSION ASSESSMENT**

Once Field Points are created in the database for a Site/Facility, the user will need to upload laboratory analytical data (EDF) and the associated GEO\_Report (written report) for a VI assessment. EDF files are normally created by the laboratory, not by the Responsible Party (RP) or consultant, but are normally uploaded by the RP or consultant, not by the laboratory (for information about the formatting and structure of EDF files, refer to “[Technical Information on Uploading data](#)”).<sup>3</sup> The following sections outline how to check the data format, upload analytical data, and upload the associated report.

### **Check Laboratory Analytical Data**

Before the laboratory analytical data for a VI assessment is uploaded to the database, verify that the EDF is valid to prevent errors in the upload format.

Under tools on the left-hand side, select “Check EDD.”

GLOBAL ID	FACILITY NAME	STATUS	ADDRESS	CITY	COUNTY	FLD PTS
T10000011140	Test Only - DWQ VI Test Project	OPEN - INACTIVE	1001 I STREET	SACRAMENTO	SACRAMENTO	42

Under check EDD, select “EDF.”

GLOBAL ID	FACILITY NAME	STATUS	ADDRESS	CITY	COUNTY	FLD PTS
T10000011140	Test Only - DWQ VI Test Project	OPEN - INACTIVE	1001 I STREET	SACRAMENTO	SACRAMENTO	42

Follow “EDF Upload Instructions” to error-check the lab analytical data file.

**EDF UPLOAD INSTRUCTIONS**

Note: The EDF's "REPORT TITLE" and "REPORT TYPE" should normally be the same as the written report (GEO\_REPORT) that it is associated with.

FILE  
Choose File No file chosen

CHECK GLOBAL\_ID AND FIELD POINT NAMES

USE GLOBAL\_ID FROM EDF UPLOAD FILE

Check File

### **Upload Laboratory Analytical Data**

Once the laboratory analytical data is verified, the EDF is ready to be uploaded to Field Points in the database.

<sup>3</sup> [https://www.waterboards.ca.gov/ust/electronic\\_submittal/index.shtml](https://www.waterboards.ca.gov/ust/electronic_submittal/index.shtml)

Under tools on the left-hand side, select “Upload EDD.”

The screenshot shows a sidebar menu with 'Upload EDD' highlighted. The main content area displays a table with the following data:

GLOBAL ID	FACILITY NAME	STATUS	ADDRESS	CITY	COUNTY	FLD PTS
T10000011140	Test Only - DWQ VI Test Project	OPEN - INACTIVE	1001 I STREET	SACRAMENTO	SACRAMENTO	42

Under Upload EDD, select “EDF.”

The screenshot shows the 'TOOLS' menu with 'EDF' highlighted. The main content area displays the same table as in the previous screenshot.

Follow “EDF Upload Instructions” to upload lab analytical data file.

The screenshot shows the 'UPLOADING AN EDF FILE' page. A yellow box highlights the 'EDF UPLOAD INSTRUCTIONS' link. Below the link, there is a note: "Note: The EDF's 'REPORT TITLE' and 'REPORT TYPE' should normally be the same as the written report (GEO\_REPORT) that it is associated with." The form includes fields for 'REPORT TITLE', 'REPORT TYPE', 'FILE' (with a 'Choose File' button), and a checkbox for 'USE GLOBAL\_ID FROM EDF UPLOAD FILE'. An 'Upload File' button is at the bottom.

**Note: The UPLOAD TITLE and REPORT TYPE for laboratory analytical data should match the UPLOAD TITLE and REPORT TYPE of its associated GEO\_REPORT (the written report).**

### Upload GEO Report Associated With Laboratory Analytical Data

The GEO\_Report is an electronic version (PDF file format) of the complete written report. Upload the GEO\_Report with the associated laboratory analytical data.

Under Tools on the left-hand side, select “Upload EDD.”

The screenshot shows the 'TOOLS' menu with 'Upload EDD' highlighted. The main content area displays the same table as in the previous screenshots.

Under Upload EDD, select “GEO\_Report.”

**TOOLS**

## **F. GEOTRACKER ESI INFORMATION & CONTACTS**

For additional information, refer to [GeoTracker’s ESI informational page](#):

[https://www.waterboards.ca.gov/ust/electronic\\_submittal/index.shtml](https://www.waterboards.ca.gov/ust/electronic_submittal/index.shtml) or contact the GeoTracker Help Desk: [geotracker@waterboards.ca.gov](mailto:geotracker@waterboards.ca.gov).

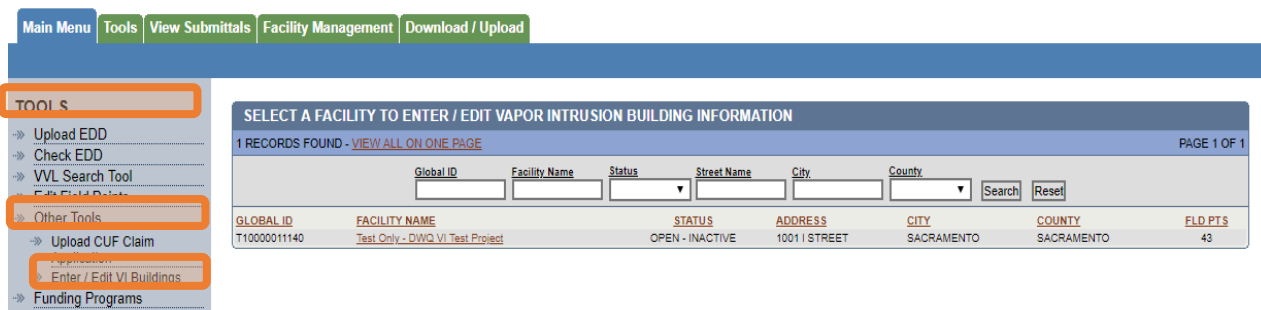

### III. GEOTRACKER VAPOR INTRUSION ESI FUNCTIONALITY

The process for adding VI building profiles to a Site/Facility that will be used in a vapor intrusion assessment is outlined below. This process uses GeoTracker’s ESI functionality for RPs and assigned contractors to enter the information.

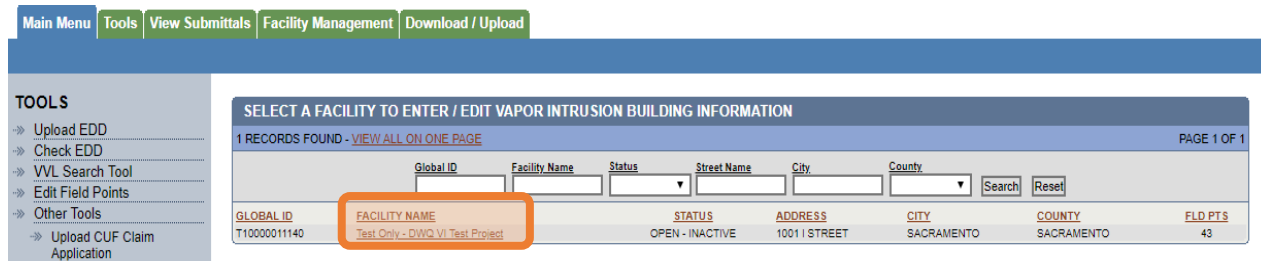

#### A. CREATING VAPOR INTRUSION BUILDING PROFILE

After adding Field Points and assigning the appropriate Field Point Class (refer to [Section II.C](#)), the next step is to create a building’s VI building profile in the database. The VI building profile will also assist the user in co-locating Field Points within and in proximity to the building. It is important to co-locate indoor air and subslab samples when possible. VI building profiles are part of the conceptual site model for a Site/Facility and inputting each building’s information into the database stores all available vapor data for a study area in one location.

To add a VI building profile to a Site/Facility, under Tools on the left-hand side, select “Other Tools” and then select “Enter/Edit VI Buildings.” This will display the available Site/Facilities the user has claimed.

Select the Site/Facility to begin the process of adding VI building profiles for onsite and off-site buildings within the VI study area.

Select “Add a New VI Building” to create a VI building profile.

Shown below is the VI building profile page.

The locator pin  indicates the Site/Facility GeoTracker location.

The Site/Facility's name, global ID, and address are displayed on the top menu and will be the same for all buildings in the study area for the purposes of assessing VI.

**Note: There are three sections (building-specific information, co-located Field Points, and building outline/location) to complete in the VI building profile (outlined below).**

TEST ONLY - DWQ VI TEST PROJECT - T10000011140  
 1001 I STREET  
 SACRAMENTO, CA 95814

BUILDING NAME		ON SITE / OFF SITE BUILDING?		YEAR BUILT	BUILDING DESIGN	
BUILDING OCCUPANTS		FOUNDATION TYPE	CEILING HEIGHT (FT)	# FLOORS (EXCL BASEMENT)	VI MITIGATION	HVAC SYSTEM
						BLDG AREA (SQFT)

**Co-Located Field Points - ADD ADDITIONAL CO-LOCATION FIELD POINT GROUP**

CO-LOCATED POINTS NAME	INDOOR AIR FIELD PT	SUBSLAB / CRAWLSPACE	SOIL GAS FIELD PT	AMBIENT AIR FIELD PT	SEWER AIR GAS FIELD PT	GW/MW / GRAB SAMPLE

**Building Outline / Location:**

**Add This Building**

## B. BUILDING-SPECIFIC INFORMATION

The first section of the VI building profile is the building-specific information. This includes the Building Name, Onsite/Offsite Building, Year Built, Building Design, Building Occupants, Foundation Type, Ceiling Height (feet), Number of Floors, VI Mitigation, HVAC System, and Building Area.

TEST ONLY - DWQ VI TEST PROJECT - T10000011140 1001 I STREET SACRAMENTO, CA 95814							
BUILDING NAME	ONSITE / OFFSITE BUILDING?		YEAR BUILT	BUILDING DESIGN			
<input type="text"/>	<input type="text"/>		<input type="text"/>	<input type="text"/>			
BUILDING OCCUPANTS	FOUNDATION TYPE	CEILING HEIGHT (FT)	# FLOORS (EXCL BASEMENT)	VI MITIGATION	HVAC SYSTEM	BLDG AREA (SQFT)	
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	

Boxes that are blank  indicate fields that will need to be entered manually.

Boxes with a triangle in the right corner  indicate a drop-down menu. The options are defined in Table 1 below for each field.

**Table 1: BUILDING SPECIFIC INFORMATION**

Field	Drop-Down Option	Description
Building Name	- -	User-defined name for a site building.
Onsite/Offsite Building	Offsite – building is outside of facility/site footprint	Building is outside of site/facility property boundary.
	Onsite – building is within facility/site footprint	Building is within site/facility property boundary.
Year Built	- -	The year the building was built.
Building Design	Single Unit Residential	A single unit building designed for residential use (e.g., single-family home).
	Multi-Unit Residential	Multiple unit building designed for residential use (e.g., duplex, apartments).
	Single Unit Commercial	A single unit building designed for commercial use of one business.
	Multi-Unit Commercial	A building with multiple separate units designed for commercial use ( e.g., strip mall).
	Multi-Unit Mixed Use	A multiple unit building with a combination of units either designed for commercial or residential use.
	Auditorium	A large building or hall with an open space designed for gatherings ( e.g., church, theater).
	School	A large building designed with multiple rooms to facilitate educational activities.

Field	Drop-Down Option	Description
	Industrial	A large building designed for the systematic processing of goods or products (e.g., packaging plant).
	Manufacturing Facility	A building designed for the manufacturing of goods from raw materials (e.g., chemical plants, research and development facilities).
	Warehouse	A large building designed to store raw materials or manufactured goods.
	Other	A building with a design type not listed.
Building Occupants	Residential	Occupants could be inside building for up to 24 hours a day.
	Commercial	Occupants could be inside building for up to 8 hours a day (typical work day).
	Residential Unit Over Commercial Unit	Residential use is prohibited only on the first floor for the occupied space.
	Sensitive Use	Building occupants that may have significantly increased sensitivity or exposure to contaminants by virtue of their age (e.g., school, child care, retirement community) or health condition (e.g., medical facility).
	Other	Building occupants not listed.
Foundation Type	Slab-on-Grade	There is no space between the ground and the foundation system (bedding gravel and slab).
	Crawl Space	An area of limited height between the ground surface and the ground floor of a building, giving access to wiring and plumbing.
	Partial Crawl Space	Foundation is partially a crawl space and partially slab-on-grade.
	Basement	One or more floors of a building that are either completely or partially below the ground surface. Basement foundation is assumed slab-on-grade.
	Partial Basement	Foundation is partially a basement and partially slab-on-grade.
	Podium	The lowest floor of the building is constructed with more than 5 feet above the ground surface and not regularly occupied (e.g., car port beneath a building).
	Earthen	Made of compressed earth with no covering.
	Secondary Slab Pour	Modifications have been made to the original slab-on-grade foundation (e.g., remodels, garage addition, porch addition).
	Other	Foundation type is not listed.

Field	Drop-Down Option	Description
Ceiling Height (ft)	--	The distance from the averaged floor height to the averaged ceiling height of the lowest floor, measured in feet.
# Floors (excluding Basement)	--	Total number of floors within the building excluding the basement (i.e., 3 story building = 3).
VI Mitigation	Vapor Intrusion Barrier Only	A subslab liner (passive membrane or vapor barrier) is a material or structure installed below a building to limit the upward flow of vapors.
	Passive Vented System	A system designed to function by venting soil gas (or crawl space air) to the exterior of the building. Passive venting relies on natural thermal and wind effects to withdraw vapors from below the building.
	Active Vented System	A venting system equipped with a fan-powered vent that actively draws soil gas (or crawl space air) from beneath the building to the exterior of the building.
	Subslab Depressurization	A system designed to continuously create lower pressure directly underneath a building floor relative to the pressure within the building.
	Other	A vapor intrusion mitigation system not listed above.
	None	No vapor intrusion mitigation system in place.
HVAC System	Cooling Only	The building contains a system whose purpose is to provide cooling or significant ventilation within the building (e.g., air conditioner, whole house fans).
	Heating Only	The building contains a system whose purpose is to generate heat within the building (e.g., furnaces, fireplaces, baseboard heaters, radiators, or other regularly used system).
	Heating & Cooling	The building contains both a cooling system and a heating system.
	None	No heating or cooling systems are installed in the building.
Building Area (ft <sup>2</sup> )	--	The building's foundation footprint in square feet (e.g., 1,200 ft <sup>2</sup> ).

### **C. CO-LOCATED FIELD POINTS**

The second section of the VI building profile allows the user to link each Field Point with a building for a VI assessment with the following Field Point Class types: indoor air, subslab, crawl space, soil gas, ambient (outdoor) air, sewer gas air, and groundwater. Within a building the user should co-locate the indoor air Field Points with the associated subslab (or crawl space) Field Points that are collected within the same area of the building (e.g., bathroom, kitchen, office, etc.). The co-located indoor air and subslab Field Points are the primary data pairs for a building. All applicable soil gas, ambient air, sewer air gas, and groundwater Field Points should be linked to the building as secondary data Field Points, and if appropriate linked to the primary data pair.

#### Primary Data Pair – Indoor Air and Subslab (or Crawlspace) Field Points

Co-Located Field Points - ADD ADDITIONAL CO-LOCATION FIELD POINT GROUP						
CO-LOCATED POINTS NAME	INDOOR AIR FIELD PT	SUBSLAB / CRAWLSPACE	SOIL GAS FIELD PT	AMBIENT AIR FIELD PT	SEWER AIR GAS FIELD PT	GW MW / GRAB SAMPLE

#### Secondary Data – Soil Gas, Ambient Air, Sewer Air Gas, and Groundwater Sample Field Points

Co-Located Field Points - ADD ADDITIONAL CO-LOCATION FIELD POINT GROUP						
CO-LOCATED POINTS NAME	INDOOR AIR FIELD PT	SUBSLAB / CRAWLSPACE	SOIL GAS FIELD PT	AMBIENT AIR FIELD PT	SEWER AIR GAS FIELD PT	GW MW / GRAB SAMPLE

### **Adding a Co-Located Field Point Group**

The database has the capability for the user to set up multiple Field Point Groups for a building. All co-located and linked Field Points for a building should be listed in this section of the VI building profile tool.

The “Co-Located Points Name” refers to either the specific area within the building (e.g., bathroom, kitchen) where the primary data pairs were collected or to the building name linked to the secondary data Field Points.

Co-Located Field Points - ADD ADDITIONAL CO-LOCATION FIELD POINT GROUP						
CO-LOCATED POINTS NAME	INDOOR AIR FIELD PT	SUBSLAB / CRAWLSPACE	SOIL GAS FIELD PT	AMBIENT AIR FIELD PT	SEWER AIR GAS FIELD PT	GW MW / GRAB SAMPLE

To set up multiple Field Point Groups, select “Add Additional Co-Location Field Point Group” for as many co-located or linked Field Points as needed.

Co-Located Field Points - ADD ADDITIONAL CO-LOCATION FIELD POINT GROUP						
CO-LOCATED POINTS NAME	INDOOR AIR FIELD PT	SUBSLAB / CRAWLSPACE	SOIL GAS FIELD PT	AMBIENT AIR FIELD PT	SEWER AIR GAS FIELD PT	GW MW / GRAB SAMPLE
Bathroom	IA - 1 B1	SS - 1 B1				

Once a co-located area has an assigned Co-Located Points Name (e.g., bathroom, building name), the associated primary data pair and secondary data Field Points should be populated by using the drop-down menu.

## Co-Locating Field Point Process – Primary Data Pair

First, populate the primary data pair by clicking in the Indoor Air Field Point box; then select from the drop-down menu, and select the correct Field Point that is associated with that specific area.

Co-Located Field Points - ADD ADDITIONAL CO-LOCATION FIELD POINT GROUP						
CO-LOCATED POINTS NAME	INDOOR AIR FIELD PT	SUBSLAB / CRAWLSPACE	SOIL GAS FIELD PT	AMBIENT AIR FIELD PT	SEWER AIR GAS FIELD PT	GW / MW / GRAB SAMPLE
Bathroom						

Building Outline / Location:

Next, complete the primary data pair by clicking in the Subslab/Crawlspace Field Point box and selecting from the drop-down menu the correct Field Point that is paired with the Indoor Air Field Point and the specific area.

Co-Located Field Points - ADD ADDITIONAL CO-LOCATION FIELD POINT GROUP						
CO-LOCATED POINTS NAME	INDOOR AIR FIELD PT	SUBSLAB / CRAWLSPACE	SOIL GAS FIELD PT	AMBIENT AIR FIELD PT	SEWER AIR GAS FIELD PT	GW / MW / GRAB SAMPLE
Bathroom	IA - 1 B1					

Building Outline / Location:

Continue to add the primary data pairs and co-locate to the specific areas within the building.

Co-Located Field Points - ADD ADDITIONAL CO-LOCATION FIELD POINT GROUP						
CO-LOCATED POINTS NAME	INDOOR AIR FIELD PT	SUBSLAB / CRAWLSPACE	SOIL GAS FIELD PT	AMBIENT AIR FIELD PT	SEWER AIR GAS FIELD PT	GW / MW / GRAB SAMPLE
Bathroom	IA - 1 B1	SS - 1 B1	SG - 1			MW-1
Kitchen	IA - 2 KITCHEN	SS - 2 KITCHEN	SG - 1			MW-1
Office Area	IA - 3 OFFICE	SS - 3 OFFICE	SG - 1			MW-1

## Co-Locating Field Point Process – Secondary Data

Next, populate the secondary data Field Points by clicking in the Soil Gas Field Point box, Ambient Air Field Point box, Sewer Air Gas Field Point box, or Groundwater Sample Field Point box, and select from the drop-down menu the correct Field Point that is linked to the building.

To link a secondary data Field Point to a primary data pair, select a secondary data Field Point from the drop-down box menu on that row.

Co-Located Field Points - ADD ADDITIONAL CO-LOCATION FIELD POINT GROUP						
CO-LOCATED POINTS NAME	INDOOR AIR FIELD PT	SUBSLAB / CRAWLSPACE	SOIL GAS FIELD PT	AMBIENT AIR FIELD PT	SEWER AIR GAS FIELD PT	GW / MW / GRAB SAMPLE
Bathroom	IA - 1 B1	SS - 1 B1	SG - 1			MW-1
Kitchen	IA - 2 KITCHEN	SS - 2 KITCHEN	SG - 1			MW-1
Office Area	IA - 3 OFFICE	SS - 3 OFFICE	SG - 1			MW-1

To link a secondary data Field Point to the building, select “Add Additional Co-Location Field Point Group” to add a blank Co-Located Points Name.

Co-Located Field Points - ADD ADDITIONAL CO-LOCATION FIELD POINT GROUP						
CO-LOCATED POINTS NAME	INDOOR AIR FIELD PT	SUBSLAB / CRAWLSPACE	SOIL GAS FIELD PT	AMBIENT AIR FIELD PT	SEWER AIR GAS FIELD PT	GW / MW / GRAB SAMPLE
Bathroom	IA - 1 B1	SS - 1 B1	SG - 1			MW-1
Kitchen	IA - 2 KITCHEN	SS - 2 KITCHEN	SG - 1			MW-1
Office Area	IA - 3 OFFICE	SS - 3 OFFICE	SG - 1			MW-1

Enter the appropriate building name, then select the secondary data Field Points from the drop-down box menu on that row.

Co-Located Field Points - ADD ADDITIONAL CO-LOCATION FIELD POINT GROUP						
CO-LOCATED POINTS NAME	INDOOR AIR FIELD PT	SUBSLAB / CRAWLSPACE	SOIL GAS FIELD PT	AMBIENT AIR FIELD PT	SEWER AIR GAS FIELD PT	GW MW / GRAB SAMPLE
Bathroom	IA - 1 B1	SS - 1 B1	SG - 1			MW-1
Kitchen	IA - 2 KITCHEN	SS - 2 KITCHEN	SG - 1			MW-1
Office Area	IA - 3 OFFICE	SS - 3 OFFICE	SG - 1			MW-1
Building Name			SG - 2		SWAG - 1	MW-2

Check to make sure the appropriate Field Point is assigned to the correct Co-Located Points Name.

**Note: The drop-down boxes will only populate with the available Field Point that was assigned to a Field Point Class (refer to Section II.C). It is critical to check the Field Point to ensure it has the appropriate “Field Point Class,” otherwise it will not populate as an option in the drop-down menu.**

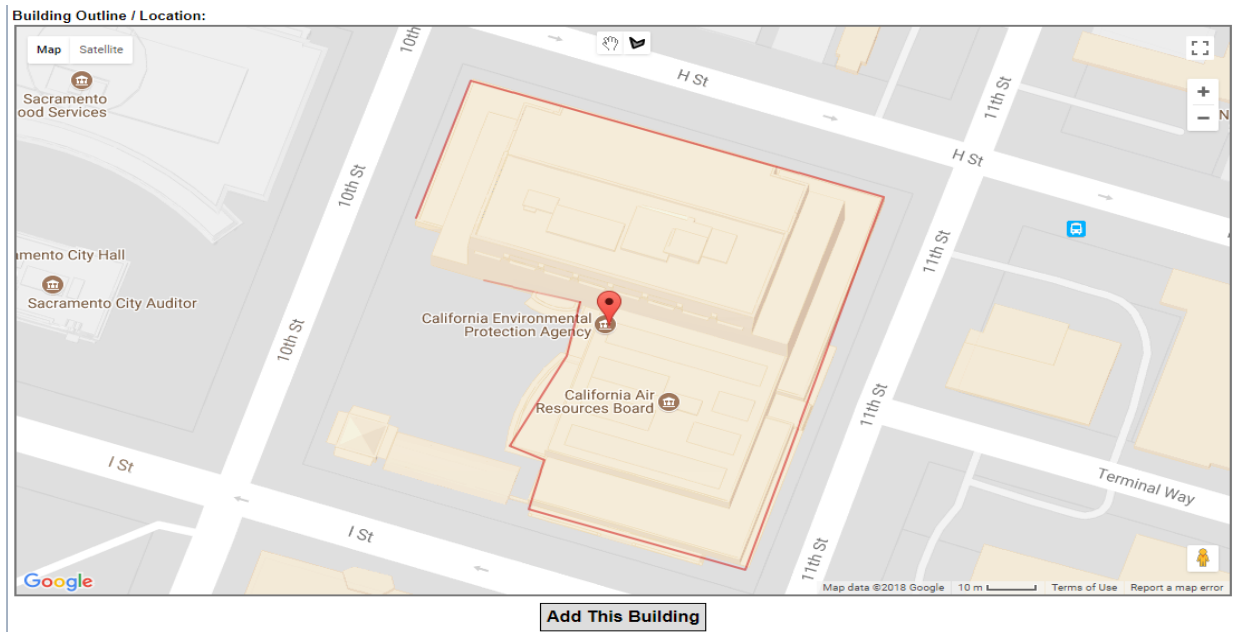

### D. BUILDING OUTLINE/LOCATION

The third section of the building profile defines the spatial attributes of a building and Field Points associated with them. Certain Field Points do not have geospatial data collected and cannot be placed on a map, therefore drawing the building on the map is representative of those sample locations.

Select  the drawing tool at the top of the map to start drawing the building outline.

Each click on the map will place a point; use as many points necessary to outline the building shape.

To complete the shape, double-click with mouse or select the hand at the top of the map  and the shape will connect itself and fill in with a shaded red color. Once the shape is connected,  will appear in place of .

Select “Clear Drawing” if a mistake was made while drawing and the building outline/location will be cleared.

To complete the VI building profile, select “Add This Building” located at the bottom of the page.

The VI building profile is now stored in the database.

### **E. SITE/FACILITY BUILDING LIST**

Once a VI building profile is stored within the Site/Facility database, the list of onsite and offsite buildings and their locations will be displayed on the Site/Facility page shown below. This page also has the functionality to edit or delete a building (described in the following section).

TEST ONLY - DWQ VI TEST PROJECT - T10000011140  
1001 I STREET  
SACRAMENTO, CA 95814

**ADD A NEW VI BUILDING**

BUILDING NAME	ONSITE / OFFSITE	YR BUILT	DESIGN	OCCUPANTS	FOUNDATION	CEILING	# FLOORS	VI MITIGATION
<a href="#">[EDIT]</a> BUILDING 500	OFFSITE	1966	MANUFACTURING FACILITY	COMMERCIAL	SLAB-ON-GRADE	10	1	NONE

## F. EDIT/DELETE VAPOR INTRUSION BUILDING PROFILE

To edit or input additional building-specific information to a VI building profile, select  located to the left of “Building Name”; this returns the user back to the VI building profile page.

TEST ONLY - DWQ VI TEST PROJECT - T10000011140  
1901 J STREET  
SACRAMENTO, CA 95814

ADD A NEW VI BUILDING

BUILDING NAME	ONSITE / OFFSITE	YR BUILT	DESIGN	OCCUPANTS	FOUNDATION	CEILING	# FLOORS	VI MITIGATION
<a href="#">EDIT</a> BUILDING 500	OFFSITE	1999	MANUFACTURING FACILITY	COMMERCIAL	SLAB-ON-GRADE	10	1	NONE
<a href="#">EDIT</a> CALERA BUILDING	ONSITE	1991	MULTI-UNIT COMMERCIAL (E.G. STRIP MALL)	OTHER	PARTIAL BASEMENT	20	25	SUBSLAB DEPRESSURIZATION
<a href="#">EDIT</a> DAY CARE	OFFSITE	2010	SCHOOL	SENSITIVE USE (I.E. SCHOOL, CHILD CARE)	SECONDARY SLAB POUR	15	1	NONE
<a href="#">EDIT</a> HOTEL	OFFSITE	1991	MULTI-UNIT MIXED USE	COMMERCIAL	PODIUM	15	8	NONE
<a href="#">EDIT</a> MACHINE SHOP Z	OFFSITE	1990	MANUFACTURING FACILITY	COMMERCIAL	SLAB-ON-GRADE	30	1	NONE
<a href="#">EDIT</a> OOD SHAPED BUILDING INC.	OFFSITE	1918	MANUFACTURING FACILITY	COMMERCIAL	SECONDARY SLAB POUR	12	2	NONE

<a href="#">EDIT</a> PARKING GARAGE	OFFSITE	2004	OTHER	OTHER	BASEMENT	20	8	NONE
<a href="#">EDIT</a> RESTAURANT	OFFSITE	2000	MULTI-UNIT RESIDENTIAL (E.G. DUPLEX, APARTMENTS)	RESIDENTIAL	BASEMENT	15	8	PASSIVE VENTED SYSTEM
<a href="#">EDIT</a> SACRAMENTO CITY HALL	OFFSITE	1925	MULTI-UNIT COMMERCIAL (E.G. STRIP MALL)	COMMERCIAL	PARTIAL BASEMENT	20	8	OTHER

**Note:** Since the VI building profile has already been stored in the database,  will now be at the bottom of the VI building profile page.

Select “Save Changes” to save modifications to the VI building profile.

To delete a VI building profile, select **[DELETE]** located to the right of VI Mitigation.

TEST ONLY - DWQ VI TEST PROJECT - T10000011140  
1001 I STREET  
SACRAMENTO, CA 95814

ADD A NEW VI BUILDING

BUILDING NAME	ONSITE / OFFSITE	YR BUILT	DESIGN	OCCUPANTS	FOUNDATION	CEILING	# FLOORS	VI MITIGATION
[EDIT] BUILDING 500	OFFSITE	1966	MANUFACTURING FACILITY	COMMERCIAL	SLAB-ON-GRADE	10	1	NONE [DELETE]
[EDIT] CALEPA BUILDING	ONSITE	1991	MULTI-UNIT COMMERCIAL (E.G. STRIP MALL)	OTHER	PARTIAL BASEMENT	20	25	SUBSLAB DEPRESSURIZATION [DELETE]
[EDIT] DAY CARE	OFFSITE	2016	SCHOOL	SENSITIVE USE (I.E. SCHOOL, CHLD CARE)	SECONDARY SLAB POUR	10	1	NONE [DELETE]
[EDIT] HOTEL	OFFSITE	1991	MULTI-UNIT MIXED USE	COMMERCIAL	PODIUM	15	8	NONE [DELETE]
[EDIT] MACHINE SHOP Z	OFFSITE	1950	MANUFACTURING FACILITY	COMMERCIAL	SLAB-ON-GRADE	30	1	NONE [DELETE]
[EDIT] ODD SHAPED BUILDING INC.	OFFSITE	1918	MANUFACTURING FACILITY	COMMERCIAL	SECONDARY SLAB POUR	12	2	NONE [DELETE]
[EDIT] OFFSITE BUILDING A	OFFSITE	2000	MULTI-UNIT COMMERCIAL (E.G. STRIP MALL)	COMMERCIAL	BASEMENT	10	6	ACTIVE VENTED SYSTEM [DELETE]
[EDIT] OPEN LOT	OFFSITE							
[EDIT] PARKING GARAGE	OFFSITE	2004	OTHER	OTHER	BASEMENT	20	6	NONE [DELETE]
[EDIT] RESTAURANT	OFFSITE	2000	MULTI-UNIT RESIDENTIAL (E.G. DUPLEX, APARTMENTS)	RESIDENTIAL	BASEMENT	15	8	PASSIVE VENTED SYSTEM [DELETE]
[EDIT] SACRAMENTO CITY HALL	OFFSITE	1925	MULTI-UNIT COMMERCIAL (E.G. STRIP MALL)	COMMERCIAL	PARTIAL BASEMENT	20	6	OTHER [DELETE]

The system will ask the user to confirm deletion of the building, select “OK” to delete the building from the database.

geotracker.waterboards.ca.gov says

Are you sure you wish to delete this building?

**OK** Cancel

BUILDING NAME	ONSITE / OFFSITE	YR BUILT	DESIGN	OCCUPANTS	FOUNDATION	CEILING	# FLOORS	VI MITIGATION
[EDIT] BUILDING 500	OFFSITE	1966	MANUFACTURING FACILITY	COMMERCIAL	SLAB-ON-GRADE	10	1	NONE [DELETE]
[EDIT] CALEPA BUILDING	ONSITE	1991	MULTI-UNIT COMMERCIAL (E.G. STRIP MALL)	OTHER	PARTIAL BASEMENT	20	25	SUBSLAB DEPRESSURIZATION [DELETE]

Deleting a building from the database will not delete Field Points from the database.

## IV. GEOTRACKER VAPOR INTRUSION DATABASE

One component of the State Water Board data management system (GeoTracker) is the VI database, which has the capability to easily accept electronic data to populate vapor concentration information for a Site/Facility and differentiate vapor concentration by the sample media. The VI database will also include building-specific information. Housing all this information in one database is a tool that helps RPs, contractors, and regulators evaluate sites for risk. The vapor concentration information is available through the public and secure portals.

The State Water Board will be assessing future modifications to the VI database to help with VI investigations.

## APPENDIX A: GLOSSARY OF TERMS

---

**EDD** (Electronic Data Deliverable) – Information stored in a defined format, accessible via a computer (e.g., stored on diskette, internal hard drive, CD-ROM, magnetic tape, etc.).

**EDF** (Electronic Data Deliverable Format) – A comprehensive data standard designed to facilitate the transfer of electronic data files between data producers and data users. The GeoTracker EDF is specific to analytical laboratory data.

**ESI** (Electronic Submittal of Information) – Data submitted electronically.

**Field Point** – The name of a sample location (e.g., IA-1, SG-1, SSV-1, etc.).

**Field Point Class** – Defines the sample location's medium (e.g., indoor air sample, soil gas sample, subslab sample, etc.).

**Study Area** – The area that encompasses any building undergoing a vapor intrusion assessment for a particular Site/Facility.

**Valid Value** – Specially assigned, standardized coded value designating an approved (i.e., "valid") value for entry into a field in the database.

**Vapor Intrusion Building Profile** – Information collected on an individual building; the "profile" stores building-specific information, co-located Field Points, and building outline/location in one location in the GeoTracker database.

## FREQUENTLY ASKED QUESTIONS

---

### **1. Why doesn't my Field Point show up as part of the co-located Field Point drop-down option?**

Check that the Field Point has the appropriate Field Point Class. Field Points will only populate in the associated Field Point class as a drop-down option.

### **2. What do I do with previously uploaded vapor concentration data?**

Previously uploaded vapor concentration data will still be in the database and will not change. It will be useful to update the Field Point Class for the vapor (Field Point) to represent the sample medium. Prior to the added capabilities of the database, Field Point Class options were limited to vapor or air.

### **3. Why am I getting a Global ID or Field Point Name error while checking an EDF file?**

The user uploading does not have access to the specific site (labs typically do not have access); leave both checkboxes ("Check Global\_ID and Field Point Names" and "Use Global\_ID from EDF upload file") unchecked, and the user will be able to verify if the lab analytical data has errors.

### **4. What if I am the lab trying to upload EDF to a Site/Facility and the Site/Facility is not listed?**

A lab will not be able to upload EDF to a Site/Facility without the Responsible Party (RP) claiming a site first. Contact the RP to gain access.

### **5. How do I delete a Field Point after uploading an EDF file?**

Contact the GeoTracker Help Desk for assistance in deleting a Field Point.

### **6. How do I make corrections, additions, or delete an EDF submittal?**

If your submittal has not been "Received" yet, you can delete it and then resubmit a corrected version. "Pending" submittals uploaded by you will have a "Delete Submittal" option. If your submittal has already been "Received," you'll need to contact your Lead Agency Regulator, who can retroactively "Deny" a previously "Received" submittal.

### **7. Where do I get help for troubleshooting?**

Contact the GeoTracker Help Desk: [geotracker@waterboards.ca.gov](mailto:geotracker@waterboards.ca.gov).
