**Subject:** New construction storm water runoff standards  
**CC:** <tcoyle@cbia.org>

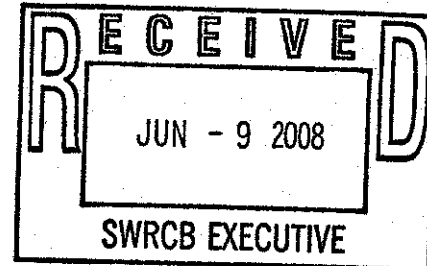

Dear Board members:

The proposed new storm water runoff standards for new construction are overburdensome, and not cost effective. If implemented they will double the cost required to meet the current standards, thus further increasing the cost of new construction, while the outcomes will not be substantially improved from the outcomes obtained under the current standards.

Please give serious consideration to this matter. I urge you to refrain from implementing these new standards without further study regarding their effectiveness.

Very Truly Yours,

Barry Scherman  
Past President  
California Building Industry Association
