

Fact Sheets Supporting  
“Do Not Delist” Recommendations

September 2005

## Region 8

---

**Water Segment:** San Diego Creek Reach 1

**Pollutant:** Chlorpyrifos

**Decision:** Do Not Delist

**Weight of Evidence:** This pollutant is being considered for listing under section 2.2 of the Listing Policy. Under this section of the Policy, a minimum of one line of evidence is needed to assess listing status.

One line of evidence is available in the administrative record to assess this pollutant. Based on the applicable factor, a TMDL has been developed and approved by USEPA and an approved implementation plan is expected to result in attainment of the standard.

Based on the readily available data and information, the weight of evidence indicates that there is sufficient justification in favor of placing this water segment-pollutant combination in the Water Quality Limited Segments Being Addressed portion of the section 303(d) list.

**SWRCB Staff Recommendation:** After review of the available data and information for this recommendation, SWRCB staff conclude that the water body should be placed in the Water Quality Limited Segments Being Addressed category of the section 303(d) list because a TMDL has been approved by USEPA and an implementation plan has been approved, and data demonstrated that water quality objectives are met.

### Lines of Evidence:

---

*Line of Evidence* Remedial Program in Place

*Beneficial Use* WA - Warm Freshwater Habitat

*Information Used to Assess Water Quality:* A TMDL and implementation plan has been approved for this water segment-pollutant combination. The Newport Bay Watershed Diazinon/Chlorpyrifos TMDL was approved by RWQCB on April 4, 2003 and subsequently approved by USEPA on February 13, 2004.
