Subject: San Lorenzo River/Watershed

As a septic tank pumper of 25+ years in the San Lorenzo Valley I'm submitting the following statement based on my experience in the business of wastewater issues in the Santa Cruz County region. I was also a homeowner with a septic system on my property in Boulder Creek for 12 years.

I'm in favor of the proposed amendment State Water Resources Control Board is proposing by adding the San Lorenzo River Watershed to the Human Fecal Material Discharge Prohibition and Domestic Animal Waste Discharge Prohibition.

I also believe parts of AB 885 should be enforced in this area. Pumping septic tanks every 5 years is something that would protect the watersheds and the ground water and cost homeowners on septic less than what other homeowners on sewer pay for sewer tax.
