OPINION

Application 9850 having been filed and protests against approval
thereof having been received, was regularly set for a field investigation of
which applicants and protestants were duly notified and did agree by signed
stipulations, to abide by the report and subsequent findings of such investi-
gation.

During the course of the investigation all interested parties were fully advised as to the clauses protecting their claimed rights customarily placed in all permits issued by the Division of Water Resources and several stream flow measurements conclusively showed that unappropriated water existed in Widow White Creek in excess of the amount sought by the applicants, whereupon all protestants definitely advised the investigator that they had no further objections to approval of Application 9850 for the amount sought thereunder.

The uses to which applicants propose to put the water are useful and beneficial ones and there appearing to be no bar to approval of Application 9850 it is the opinion of this office that the said application should be approved subject to the usual terms and conditions.
