OPINION

Application 11510 having been filed and protests against approval
thereof having been received, was regularly set for a field investigation
of which applicant and protestants were duly notified and did agree, by

signed stipulations, to abide by the report and subsequent findings of said investigation.

The report of the investigation indicates that, as the result of a conference held at the conclusion of the investigation, the protestants were agreeable to withdrawal of their protests if applicant would reduce the amount sought under Application 11510 to 0.25 cubic foot per second.

Applicant did, on September 24, 1947, file written authorization to change the amount sought under Application 11510 to 0.25 cubic foot per second and the application was so amended and protestants did, on September 24, 1947, file written requests for withdrawal of their protests on the condition that the application be so amended. There would now appear to be no bar to approval of Application 11510 and since the uses to which applicant proposes to put the waters sought are beneficial ones, it is the opinion of the State Engineer that said application should be approved subject to the usual terms and conditions.

ORDER

Application 11510 for a permit to appropriate water having been filed with the Division of Water Resources as above stated, protests having been filed, a field investigation having been made, a stipulated hearing having been held in accordance with Article 13, Section 733b of the California Administrative Code and the State Engineer now being fully informed in the premises:

IT IS HEREBY ORDERED that Application 11510 be approved for the amended amount and the season of use applied for and that a permit be

issued subject to such of the usual terms and conditions as may be appropriate.

WITNESS my hand and the seal of the Department of Public Works of the State of California, this 26 day of Nov. , 1947.

Edward Hyatt, State Engineer
