**ATTACHMENT TO ACCOMPANY
PETITION FOR CHANGE
PERMIT 12167 (APPLICATION 5648B)
JACKSON VALLEY IRRIGATION DISTRICT**

This petition is filed for a change to Permit 12167 which would add diversion to offstream storage in addition to direct diversion as an additional method of diversion for 2,800 acre feet per annum presently available to Jackson Valley Irrigation District (JVID) from the Mokelumne River at Pardee Reservoir pursuant to Permit 12167. Said 2,800 acre feet per annum is that portion of the 5,000 acre feet originally assigned to JVID by the State which is not subject to reversion back to the State without a substitute supply being made available, all in accordance with the State Water Board Decision 1490.

The season for diversion to storage would coincide with the direct diversion season of March 1 to November 1 of each year presently allowed by Permit 12162. The rate of diversion to offstream storage and direct diversion would not exceed the 50 cubic feet per second also allowed by Permit 12162. The maximum amount of water diverted for direct use and/or for offstream storage would not exceed the 2,800 acre feet per annum.

Point of Diversion and Rediversion

The present Point of Diversion is located at the North Spillway of Pardee Dam. 200 feet North and 200 feet West from the center of Section 15, T5N, R10E MDB&M within the SE ¼ of NW ¼ of said Section 15.

This petition seeks to add a Point of Rediversion/Point of Storage at the existing Jackson Creek Dam for the water diverted at the Pardee Dam North Spillway described above and which flows down the natural channel of Carson Creek into the reservoir (Lake Amador) formed by the Jackson Creek Dam located on Jackson Creek at a point 800 feet North and 2,112 feet West from the center of Section 9, T5N, R10E, MDB&M being within the SW ¼ of the NW ¼ of said Section 9. See Permits 11589 & 11224 (Applications 12342A & 17605 respectively).

The District has access to the existing point of diversion by written agreement with East Bay Municipal Utility District, and access to the proposed Point of Rediversion by virtue of ownership. This change is sought to provide more flexibility in the diversion and use of the water available to JVID under Permit 12167.

ENVIRONMENTAL INFORMATION FOR PETITIONS

Petition for Change

Petition for Extension of Time

Before the State Water Resources Control Board (SWRCB) can approve a petition to change your water right permit or a petition for extension of time to complete use, the SWRCB must consider the information contained in an environmental document prepared in compliance with the California Environmental Quality Act (CEQA). This form is not a CEQA document. If a CEQA document has not yet been prepared, a determination must be made of who is responsible for its preparation. As the petitioner, you are responsible for all costs associated with the environmental evaluation and preparation of the required CEQA documents. Please answer the following questions to the best of your ability and submit any studies that have been conducted regarding the environmental evaluation of your project. If you need more space to completely answer the questions, please number and attach additional sheets.

1. DESCRIPTION OF PROPOSED CHANGES OR WORK REMAINING TO BE COMPLETED

For a petition to change, provide a description of the proposed changes to your project including, but not limited to, type of construction activity, structures existing or to be built, area to be graded or excavated, increase in water diversion and use (up to the amount authorized by the permit), changes in land use, and project operational changes, including changes in how the water will be used. For a petition for extension of time, provide a description of what work has been completed and what remains to be done. Include in your description any of the above elements that will occur during the requested extension period.

This Petition seeks to add diversion to storage as a method of diversion.

All diversion and storage facilities required to implement the proposed change exist and no new facilities are required.

See Attachment No. _____
