Petition for Change

Petition for Extension of Time

Before the State Water Resources Control Board (SWRCB) can approve a petition to change your water right permit or a petition for extension of time to complete use, the SWRCB must consider the information contained in an environmental document prepared in compliance with the California Environmental Quality Act (CEQA). This form is not a CEQA document. If a CEQA document has not yet been prepared, a determination must be made of who is responsible for its preparation. As the petitioner, you are responsible for all costs associated with the environmental evaluation and preparation of the required CEQA documents. Please answer the following questions to the best of your ability and submit any studies that have been conducted regarding the environmental evaluation of your project. If you need more space to completely answer the questions, please number and attach additional sheets.

1. DESCRIPTION OF PROPOSED CHANGES OR WORK REMAINING TO BE COMPLETED

For a petition to change, provide a description of the proposed changes to your project including, but not limited to, type of construction activity, structures existing or to be built, area to be graded or excavated, increase in water diversion and use (up to the amount authorized by the permit), changes in land use, and project operational changes, including changes in how the water will be used. For a petition for extension of time, provide a description of what work has been completed and what remains to be done. Include in your description any of the above elements that will occur during the requested extension period.

This project will expand the Place of Use (water service area) for the City of Crescent City potable water conveyance system. The primary intent of the expansion is to make the Place of Use more consistent with the Urban Services Area adopted by both Crescent City and Del Norte County. Moreover, the city has historically provided water within the portions of the Urban Services Area not contained within the Place of Use, and most of the water supply infrastructure is already in place. The expansion will allow the city to continue to provide water to properties in the unincorporated Crescent City urban area, and to provide new water service in accordance with the build-outs projected by both the Crescent City General Plan and the Del Norte County General Plan.
