Ms. Barbara Evoy Chief, Division of Water Rights State Water Resources Control Board Attn: Mr. Richard Satkowski P.O. Box 2000 Sacramento, CA 95812-2000

Subject: Petition for Change - Application 18733 (Permit 16584) - Hidden Dam/Hensley Lake -

Fresno River - Madera County

Dear Ms. Evoy:

Please find enclosed a Petition for Change of the Bureau of Reclamation's Application 18733 (Permit 16584). Pursuant to California Water Code Section 1700, this Petition requests the addition of twenty-seven (27) points of rediversion (PORDs). This Petition is in response to the State Water Resources Control Board's (SWRCB) Report of Inspection for Licensing dated July 12, 2010, and Compliance Review Letter dated September 2, 2010, directing Reclamation to amend Permit 16584 for consistency with existing project development and operations by adding twenty-six (26) points of re-diversion, eleven (11) on the Fresno River and fifteen (15) on Cottonwood Creek. In addition, Madera Irrigation District (MID) has requested to add Lake Madera as a PORD on the Fresno River. Currently, and historically, MID has used Lake Madera as a regulating reservoir to take high Fresno River flows which are subsequently returned to the Fresno River. Lake Madera was acquired by MID from the state of California on September 30, 1981 and is within the District service area. The inclusion of Lake Madera does not have the potential to impair the water supply of other legal users and water of instream beneficial uses.

Historically, all 27 PORDs have been in use prior to the Permits requirement of complete construction on or before December 1, 1980, with the earliest PORDs being in place before 1961. Documentation supporting the historical use of these PORDs has been provided to the SWRCB by MID in its letter dated August 5, 2010.

In the SWRCB's Report of Inspection for Licensing, SWRCB staff identified permit application-related information indicating that the 11 Fresno River PORDs were intended to be part of the permitted project (Compliance Letter at p.5.). In view of this, even though this Petition includes these PORDs, it is Reclamation's understanding that the SWRCB will not require public noticing

Received DEC 50 of the Change Petition to add the 12 Fresno River PORDs including Lake Madera, in accordance with California Code of Regulations, Title 23, Section 795.

No changes in the currently permitted amounts of water appropriated or rates of diversion are proposed in this petition. The sole purpose of this Petition is to identify the 27 PORDs which, with the exception of Lake Madera and PORD No. 13, are nothing more than farm turnouts used to deliver MID Project water via the Fresno River and Cottonwood Creek, which are part of MID's distribution system.

Reclamation has included, with this petition, pursuant to California Public Resources Code Section 10005, a check (No. 1010) in the amount of \$850.00, payable to the Department of Fish and Game. Reclamation understands that the administrative filing fee required to process its application is covered by the water right fees program to the extent that sufficient funds are available. Any administrative costs incurred as a result of processing Reclamation's application that exceed the funds available, under the water right fees program, will be covered under the existing contract between Reclamation and the Board for services rendered by Board staff.

If you have any questions regarding this package, please contact Ms. Janice Webb of our Water Rights staff at 916-978-5289 or e-mail jwebb@usbr.gov.

Sincerely,

Richard J. Woodley

Regional Resources Manager

ENVIRONMENTAL INFORMATION FOR PETITIONS*

* Required for all petitions, including change petitions, time extension petitions, wastewater change petitions and instream flow dedication petitions.

Before the State Water Resources Control Board (State Water Board) can approve a petition, the State Water Board must consider the information contained in an environmental document prepared in compliance with the California Environmental Quality Act (CEQA). This form is not a CEQA document. If a CEQA document has not yet been prepared, a determination must be made of who is responsible for its preparation. As the petitioner, you are responsible for all costs associated with the environmental evaluation and preparation of the required CEQA documents. Please answer the following questions to the best of your ability and submit any studies that have been conducted regarding the environmental evaluation of your project. If you need more space to completely answer the questions, please number and attach additional sheets.

For a petition to change, provide a description of the proposed changes to your project including, but not limited to, type of construction activity, structures existing or to be built, area to be graded or excavated, increase in water diversion and use (up to the amount authorized by the permit), changes in land use, as project operational changes, including changes in how the water will be used. For a petition for extension of time, provide a description of what work has been completed and what remains to be done. Include it your description any of the above elements that will occur during the requested extension period.			
See attachment to Petition for Change.

PETITION FOR CHANGE

(WATER CODE 1700)

Point of Diversion, Point of Rediversion, X Place of Use, Purpose of Use, Split Application 18733 Permit 16584 License
If the change petition is being submitted for the purpose of requesting to split the water right between two or more owners, see page 2.
I (we) hereby petition for change(s) noted above and shown on the accompanying map and described as follows:
Point of Diversion or Rediversion: (Give coordinate distances in California Coordinates, NAD 83, or other ties as allowed by CCR, tit. 23, section 715. Also provide the 40-acre subdivision in which the present and proposed points of diversion lie.) Present: Point Of Diversion - Hidden Dam, Point Of Rediversion - Franchi Dam Proposed: See attachment.
Place of use (If irrigation, then state number of acres to be irrigated within each 40-acre tract.) Present: No change to current permitted place of use Proposed:
Purpose of Use Present: No change to permitted purpose of use. Proposed:
GIVE REASON FOR PROPOSED CHANGE: To conform Permit No. 16584 to actual Project for Licensing purposes.
WILL THE OLD POINT OF DIVERSION OR PLACE OF USE BE ABANDONED: (yes or no) NO
WATER WILL BE USED FOR IrrigationPURPOSES.
I(we) have access to the proposed point of diversion or control the proposed place of use by virtue of? Ownership, lease, verbal or written agreement If by lease or agreement, state the name and address of party(s) from whom access has been obtained.
Are there any persons taking water from the stream between the old point of return flow and the new point of return flow? (yes or no) Give name and address of any person(s) taking water from the stream between the present point of diversion or rediversion and the proposed point of diversion or rediversion, as well as any other person(s) known to you who may be affected by the proposed change.
A copy of the petition must be provided to the California Department of Fish and Game (DFG). Indicate the date that the petition was provided to DFG and provide a copy of the transmittal letter to DFG: March 1, 2011

All petitioners must sign at the bottom of page 2.

Fill out this section only if you are requesting to split a water right among multiple owners. REQUEST FOR DIVISION OF LICENSE/PERMIT Not Applicable.

NOTE: All petitions must be accompanied by the filing fee (see fee schedule at www.waterrights.ca.gov) made payable to the State Water Resources Control Board and an \$850 fee made payable to the Department of Fish and Game must accompany a change petition. Separate petitions are required for each water right.

BACKGROUND:

The United States Bureau of Reclamation (Reclamation) filed Application 18733 on May 22, 1959, and the State Water Resources Control Board (SWRCB) issued Permit 16584 to Reclamation on April, 3, 1971, pursuant to Decision 1407. The permit authorizes Reclamation to store up to 74,000 acre-feet at Hensley Lake on the Fresno River for irrigation, domestic, and recreational uses. The season of storage is from December 1 of each year to April 30 of the succeeding year. The storage season may be extended to include the months of November and May provided that (1) Reclamation releases equivalent exchange water from the Madera Canal to satisfy prior rights, and (2) a minimum pool of 5,000 acre-feet is maintained.

Hensley Lake is formed by Hidden Dam, which is operated by the U.S. Army Corps of Engineers. The Madera Irrigation District (MID) diverts Permit water subject to a long-term water service contract with Reclamation for the entire yield of Hensley Lake storage and manages the project on behalf of Reclamation. In addition to the natural runoff, the Fresno River also receives water from three sources outside of the watershed: (1) North Fork Willow Creek (via the Soquel ditch) which is tributary to the San Joaquin River, (2) Big Creek, which is tributary to the Merced River, and (3) the San Joaquin River via the Madera Canal and Chowchilla Bypass. MID's Big Creek and North Fork Willow Creek imports are made pursuant to two decrees: (1) a 1905 Decree by the Mariposa County Superior Court, which provides for MID's import of Big Creek water and (2) a 1916 Decree by the Madera County Superior Court, which provides MID with a priority of up to 200 cubic feet per second (cfs) of the Fresno River including imports over the Downstream Riparians from Franchi Dam.

DESCRIPTION OF PROPOSED CHANGES:

The purpose of this petition is to comply with the SWRCB's Report of Inspection for Licensing (Report) dated July 12, 2010, and Compliance Review letter dated September 2, 2010, directing Reclamation to amend Permit 16584 for consistency with existing project development and operations by adding twenty-seven (26) points of re-diversion (PORDs), eleven (11) on the Fresno River and fifteen (15) on Cottonwood Creek as further discussed below. In addition, as explained below, Lake Madera, an MID regulating reservoir, has been included as a PORD. PORDs to be added are described in Exhibit 1 and shown on Map No. 214-202-85, dated February 28, 2011, filed with this petition.

Currently, the Franchi Diversion Dam (Franchi Dam) built in the late 1800's (rebuilt in 1964) is the primary means of re-diverting water stored at Hidden Dam. Franchi Dam on the Fresno River near Hwy 145 and Santa Fe Railroad crossing at River Mile 22 is the main PORD used to convey project water to MID customers. The Franchi Dam location is described as California Coordinate System, Zone 3, NAD 83 Datum, N. 1,817,200' & E. 6,700,170' being within the SW¼ of SE¼ of Section 8, T11S, R18E, MDB&M. The Franchi Dam is indicated on the water right application place of use map as "Madera I.D. Diversion Dam" and omission of the Franchi Dam PORD in the issued Permit appears to have been an administrative oversight. SWRCB staff recommends that the Franchi Dam PORD be added to and included in the proffered license as an administrative correction. (Report at p.3.)

The Franchi Dam diverts commingled water into MID's Main Canal 1 and Main Canal 2. At times, Main Canal 2 discharges into Cottonwood Creek and the water is taken back out at 15 PORDs along the Creek. This 13-mile reach of Cottonwood Creek has been used as an extension of the MID water conveyance and distribution system. Historically, these 15 PORDs have been in use prior to the Permits requirement of complete construction on or before December 1, 1980. Documentation supporting the historical use has been provided to the SWRCB by MID in its letter dated August 5, 2010.

SWRCB staff identified permit application-related information indicating that the 11 Fresno River PORDs were intended to be part of the permitted project. (Compliance Letter at p.5.) In view of this, even though this petition includes these PORDs, the SWRCB will not require public noticing of the change petition to add the 11 Fresno River PORDs.

In addition to the twenty-six (26) PORDs indentified in the SWRCB's Report of Inspection for Licensing, MID has requested to add Lake Madera as a PORD. Currently, and historically, MID has used Lake Madera as a regulating reservoir to take high Fresno River flows which are subsequently returned to the Fresno River. Lake Madera was acquired by the district from the state of California on September 30, 1981 and is currently within the District service area. The inclusion of Lake Madera as a PORD will not have the potential to impair the water supply of other legal users or instream beneficial uses. Accordingly, as provided by the California Code of Regulations, Title 23, section 795, the Lake Madera PORD is not required to be publicly noticed.

Exhibit 1

The 15 Cottonwood Creek Points of Re-diversion to be added are:

PORD # 1A (Singh Ranch pump) located at N. 1,786,790' & E. 6,696,530' being within NE¼ of SE¼ of Section 7, T12S, R18E.

PORD # 1B (Campos Land Co. et al pump) located at N. 1,785,190' & E. 6,686,170' being within SE'4 of SE'4 of Section 11, T12S, R17E.

PORD # 1C (High & Mighty Farms pump) located at N. 1,785,070' & E. 6,680,860' being within SE¼ of SE¼ of Section 10, T12S, R17E.

PORD # 2 (Cavaletto pump) located at N. 1,785,680' & E. 6,672,340' being within SE'4 of SW'4 of Section 9, T12S, R17E.

PORD # 2A (Prosperi pump) located at N. 1,784,310' & E. 6,670,860' being within NW'4 of NW'4 of Section 16, T12S, R17E.

PORD # 2B (La Vina Ranch pump) located at N. 1,781,710' & E. 6,667,680' being within NW'4 of SE'4 of Section 17, T12S, R17E.

PORD # 2C (La Vina Ranch pump) located at N. 1,781,700' & E. 6,667,750' being within NW1/4

of SE1/4 of Section 17, T12S, R17E.

PORD #3 (La Vina Ranch pump) located at N. 1,780,410' & E. 6,665,030' being within SW'/4 of SW'/4 of Section 17, T12S, R17E.

PORD # 4 (La Vina Ranch pump) located at N. 1,780,380' & E. 6,664,960' being within SE¹/₄ of SE¹/₄ of Section 18, T12S, R17E.

PORD # 10S (Nolo Farms II, LLC pump) located at N. 1,777,750' & E. 6,661,040' being withinSW' of NW' of Section 19, T12S, R17E.

PORD # 11 (CWC Lateral Diversion Dam) located at N. 1,784,040' & E. 6,670,370' being within NW¹/₄ of NW¹/₄ of Section 16, T12S, R17E.

PORD # 12 (South Lateral Diversion Dam) located at N. 1,780,140' & E. 6,665,130' being within SW'₄ of SW'₄ of Section 17, T12S, R17E.

PORD # 13 (Galeener Ditch Div. Dam) located at N. 1,784,340' & E. 6,677,240' being within NE¹/₄ of NW¹/₄ of Section 15, T12S, R17E.
