## ENVIRONMENTAL INFORMATION FOR PETITIONS

Per 18199 (A026192)  
Per 21185 (A028609)

This form is required for all petitions.

Before the State Water Resources Control Board (State Water Board) can approve a petition, the State Water Board must consider the information contained in an environmental document prepared in compliance with the California Environmental Quality Act (CEQA). This form is not a CEQA document. If a CEQA document has not yet been prepared, a determination must be made of who is responsible for its preparation. As the petitioner, you are responsible for all costs associated with the environmental evaluation and preparation of the required CEQA documents. Please answer the following questions to the best of your ability and submit any studies that have been conducted regarding the environmental evaluation of your project. If you need more space to completely answer the questions, please number and attach additional sheets.

### DESCRIPTION OF PROPOSED CHANGES OR WORK REMAINING TO BE COMPLETED

For a petition for change, provide a description of the proposed changes to your project including, but not limited to, type of construction activity, structures existing or to be built, area to be graded or excavated, increase in water diversion and use (up to the amount authorized by the permit), changes in land use, and project operational changes, including changes in how the water will be used. For a petition for extension of time, provide a description of what work has been completed and what remains to be done. Include in your description any of the above elements that will occur during the requested extension period.

This Petition seeks to change a bypass condition contained in each of the referenced Licenses and Permits held by June Lake Public Utility District (JLPUD). The original bypass amount was agreed to by JLPUD as an accommodation for dismissal of a protest related to fish and wildlife in Rush Creek and Mono Lake. However, this requirement was not based on specific identified needs for these resources, and is not required to protect them. If the condition remains unchanged, in many dry years JLPUD will be precluded from diverting water from its Fern Creek diversion which provides the potable water to municipal customers within the Down-Canyon service area. JLPUD proposes that its minimum bypass amount be reduced to 25 gallons per minute. See attachment 1 for further explanation and information on the requested change.
