

ENVIRONMENTAL INFORMATION FOR PETITIONS

This form is required for all petitions.

Before the State Water Resources Control Board (State Water Board) can approve a petition, the State Water Board must consider the information contained in an environmental document prepared in compliance with the California Environmental Quality Act (CEQA). This form is not a CEQA document. If a CEQA document has not yet been prepared, a determination must be made of who is responsible for its preparation. As the petitioner, you are responsible for all costs associated with the environmental evaluation and preparation of the required CEQA documents. Please answer the following questions to the best of your ability and submit any studies that have been conducted regarding the environmental evaluation of your project. If you need more space to completely answer the questions, please number and attach additional sheets.

DESCRIPTION OF PROPOSED CHANGES OR WORK REMAINING TO BE COMPLETED

For a petition for change, provide a description of the proposed changes to your project including, but not limited to, type of construction activity, structures existing or to be built, area to be graded or excavated, increase in water diversion and use (up to the amount authorized by the permit), changes in land use, and project operational changes, including changes in how the water will be used. For a petition for extension of time, provide a description of what work has been completed and what remains to be done. Include in your description any of the above elements that will occur during the requested extension period.

Phase 2 includes the acquisition of approximately 150 acres of land to irrigate, grading and drainage of the crop fields and storage pond, field irrigation piping design, a pump station to transport water to the storage pond, modify the aeration system, and updates to the electrical and controls.

After treatment, the secondary treated and disinfected water will be directed into a new pump station located adjacent to the existing chlorine contact basin. The station will transport water into a new storage pond. The purchased adjacent land will be used for a 161 MG storage basin and irrigation to crops.

According to NPDES Permit Number CA0078930, monitoring data from July 2007 to November 2011, the average monthly discharge is 0.3 MGD, with a highest daily discharge of 1.0 MGD.
