

Coyote Creek downstream of
LBWRP Outfall

Coyote Creek immediately upstream of San Gabriel River Estuary

A photograph showing a large concrete dam or outfall structure. The top part of the dam is a smooth, light-colored concrete wall. Below this, there is a series of horizontal concrete slabs that create a stepped or spillway effect. Water is flowing over these slabs, creating a turbulent, white-water area. The foreground is a concrete walkway or platform. In the background, there are trees and a fence line under an overcast sky. The text "LBWRP Outfall to Coyote Creek" is overlaid in a red box at the bottom center of the image.

LBWRP Outfall to Coyote Creek

LBWRP Discharge to Coyote Creek (at low flow condition)
