Subject: NO LOW FLOW!!!!

This is our lively hood out here in the Russian River Area! The river is a place families and friends have been looking forward to vacationing to for many many years. Jobs will be lost and regular human beings will have to relocate to find work. We are people too just like you with families who have established our lives out here in the Russian River resort area. Realistically is it the right thing to do to take away a whole areas river and tourism to water Santa Rosa's lawns, I guess the small people don't count. The more people that are aware that this is happening can come together and try to fight it like we have been for years. Change to a better future, make a change, adjust ones life style and be more aware, don't keep going down the same AMERICAN WAY pathway to ruining our earth. This is not only going to impact our river but all the life in it and plant life around it.
