

Map edited by using black marker pen to highlight all roads that are proposed to be prohibited to use by California Waterfix construction vehicles larger than a 1 ton pickup truck. MWD/DWR would need to develop off road routes off HWY 5 or 99 for construction traffic. Waterways marked with darker blue would also be prohibited from use by large barges or other construction vessels between the months of April through mid-October. Construction helicopters could not operate dusk to dawn and could not fly over any Delta communities or recreation facilities
