

The East Bay Municipal Utility District (EBMUD), submits the following written statement for the Informational Proceeding to Develop Flow Criteria for the Delta Ecosystem:

EBMUD understands that, as set forth in the SWRCB's Notice, the focus of this proceeding will be on Delta outflow conditions and the criteria necessary to protect estuarine habitat for anadromous fish and other estuarine species. EBMUD has extensive information regarding tributary matters and the measures that it has instituted to protect fish and the environment. However, because this proceeding is limited to an evaluation of Delta outflow, with the goal of establishing criteria to inform future proceedings, EBMUD has chosen not to submit testimony or supporting documents at this time.
