The people of California are responsible for the best way of making California a viable place to live! The thinking that California can go back in time to be like it was 30 or 40 years ago is crazy thinking! To do what the wackos want is impossible to do if the people want to live and prosper in California.

If the wackos continue to make all the decisions there way of thinking California will be a welfare state for sure!! The businesses that can are leaving California, agriculture is being killed because there water is being taken away and going to the ocean!

If there isn't common sense brought back to the governing of California soon, there will not be a GOLDEN STATE it will become a poor WELFARE STATE!

The water board (which is appointed) needs to reconsider its decision of taking the people's water to the OCEAN!
