Subject: release water into Delta via the Bay-Delta Plan

I live in the SF Bay Area, and support the improvement of the health of the Delta and the Bay. Please maximize the amount of water let into the delta via the rivers that flow into it, and minimize the amount of water shipped out of it. Please lead the way to better use of the water that farmers and others use. The Delta is too valuable to the life of fish and animals (including humans) to not protect and improve.

Thank you,

Joe Margevicius
