**Subject:** states water grab

I live in Stanislaus County. I am totally against the proposed increase in the flows in the Stanislaus, Tuolumne, and Merced rivers. It will have a huge impact in our communities. The Central Valley Agriculture is a billions dollar industry.. the salmon is only a millions dollar industry. You are not helping the Salmon by doing this!

It is not just a farm issue, it is about the overall health and welfare of our community. It will also have a huge impact on the cities in the bay area but they just don't realize it yet.

I think this is a water grab to send more water to Southern California!

Please listen to the people and avoid years of lawsuits.

Kathy Wall
