Subject: Stop the Water Grab

The Water Resources Board is grabbing our water to save the fish and as a lifelong resident of the Central Valley I seriously object to the methodology used to save the fish at great expense to the people of the valley– What about the food we grow here to feed the State and the country? Our farms feed not only the local area but those in the rest of the state – people do not live on fish alone! Stop the grab – listen to the science about the fish and for God sakes make a plan that treats all the people of the state as having an equal right to live and prosper. No food is NOT an option.
