Subject: Notification of Exceedence

Dear Mr. Howard,

Pursuant to our January 24, 2013, letter "Protocol to Provide Earlier Notification to the State Water Resources Control Board and Partner Fisheries Agencies," this email serves as notification that the 30-day running average EC value at Old River at Tracy Road Bridge exceeded 0.7 mmhos/cm on Saturday, April 30, 2016. The 30-day average value was 1.1 mmhos/cm on that day.

Water quality information can be found on the Department of Water Resources' website at the following link: <http://www.dwr.water.ca.gov/swp/operationscontrol/deltaops.cfm>

A formal notification letter will be forthcoming. Please let me know if you have any questions.

Sincerely,

Liz Kiteck
