Subject: Updated Water Production & R-GPCD Data for Vista Irrigation District
Attachments: VID Updated Water Production & R-GPCD Data.pdf

Dear Mr. Gomberg,

In a recent Sacramento Bee article, it was stated that water agencies may subtract water loss from their water production figures. This is not clearly stated in the guidance issued by the State Water Resources Control Board (SWRCB) nor in the reporting tool. In fact, reporting water loss is "optional" in the reporting tool. Now that we have become aware that water loss can be subtracted from total water production, we would like to submit updated water production and residential gallons per capita per day data (attached).

Please revise our data as shown in the attached table. If the revised data is used, it would lower our conservation standard from 24% to 20%. If you have any questions, please feel free to contact me. Thank you for your consideration.

Regards,

*Roy Coox
