Comments:

I believe we have all learned a lot these last few months living under the current water restrictions. It is time we use what we have learned and fine tune the water restrictions.

I suggest a one-for-one credit for recycling waste water, desalination, and the developing of new water sources outside of the state (California). In other words the state targets should be based on use of state only resources.

Thank you for the opportunity to comment on the Emergency Regulations for Statewide Urban Water Conservation.

Glenn Hayen
