Subject: Scott River Curtailments in Effect for All Surface Water Diverseters (List A2) as of 12:00 pm (noon) on July 2, 2022
Date: Friday, July 1, 2022 2:07:47 PM
Attachments: [Scott_Curtailment_Addendum_32_List_A2_1_July_2022.pdf](#)

This is a message from the State Water Resources Control Board.

To: Scott River Water Right Holders in the Attached List A2 (sent to water right holders for which the Board has email addresses and to the Scott-Shasta Drought E-mail List)

Based on current and projected flows at the United States Geological Survey (USGS) [Fort Jones gage](#) and water demand estimates, **all surface water diversions in the Scott River watershed (List A2 attached to this email) must cease diversions as of 12:00 p.m. (noon) by July 2, 2022.** Diversions that are under an approved petition, or that meet an exception to curtailment as described in the [Emergency Regulation](#) (diversion is non-consumptive under section 875.1, for human health and safety under section 875.2, or for minimum livestock requirements under section 875.3) and have filed the appropriate forms with the State Water Board may continue diversion to the extent permissible under the human health and safety and minimum livestock provisions. Water right holders shall maintain records of any such continued diversions and provide such records to the State Water Board upon request. The State Water Board will continue to monitor flow forecasts and watershed conditions regularly to determine if further adjustments to curtailments are appropriate.

This is Addendum 32 to: Order for Reported Water Rights in the Scott River Watershed issued September 9, 2021, Order WR 2021-0083-DWR, and Order WR 2021-0084-DWR (Curtailment Orders). This Addendum 32 continues suspension of the listed curtailment orders for only the groundwater water rights in the Scott River watershed (Order WR 2021-0083-DWR and Order WR 2021-0084-DWR). For surface-water diverseters, suspension of the curtailment order (Order for Reported Water Rights in the Scott River Watershed, issued September 9, 2021) has ended, and the curtailment is back in effect. Please note that this and previous addenda also include those who were later sent one of the above orders.

As background, from January 5 to July 1, 2022, the State Water Board temporarily suspended curtailments in the Scott River watershed. During this period, flows generally met or exceeded the drought emergency minimum flow requirements. The most recent temporary suspensions of curtailments expires at 12:00 p.m. on July 2, 2022. Flows at the [Fort Jones gage](#) were 76.2 cubic feet per second (cfs) as of 11:30 am on July 1, 2022, and these flows are anticipated to drop below the 50 cfs minimum flow requirement for July during the weekend without curtailments. The lack of recent or forecast significant precipitation, current flow and snowpack conditions, and anticipated water demand (80 cfs based on the average surface water use reported in recent dry water years of 2017-2018 and 2019-2020) necessitate reinstatement of curtailments for all surface water rights (List A2). There is uncertainty

regarding how much of this curtailed flow will show up at the gage given disconnection in the tailings reach and tributaries throughout the Scott River watershed, contributions from groundwater local cooperative solutions, and losses in the system. Therefore, the State Water Board will monitor hydrologic condition of the watershed closely to either suspend curtailment for a subset of the most senior surface water rights based on the priorities described in the Emergency Regulation section 875.5(a) or reinstate curtailment for more senior (groundwater) diverters, as necessary.

To stay informed on future updates related to curtailments and the ongoing Emergency Regulation effort in the Scott River and Shasta River watersheds, please:

1. Monitor your email if you have subscribed to the [“Scott-Shasta Drought”](#) email list under “Water Rights”; and/or
2. Visit our [Scott River and Shasta River Drought Response website](https://www.waterboards.ca.gov/drought/scott_shasta_rivers/) (https://www.waterboards.ca.gov/drought/scott_shasta_rivers/). If an email list notice is issued on the weekend or holiday, the website will not be updated until the following business day due to limitations on implementing such updates.

If you have questions regarding this email, please contact staff at: ScottShastaDrought@waterboards.ca.gov or leave a message at our dedicated Scott River and Shasta River Drought phone line at: (916) 327-3113.

**List A2:
List of Currently Curtailed Parties Associated with the Order Imposing Water Right Curtailment and Reporting Requirements for Reported Water Rights in the Scott River Watershed issued on September 9, 2021**

Per Addendum 32 of the Curtailment Orders issued for the Scott River watershed, all surface water rights (as outlined in this table) are curtailed, starting at 12:00 p.m. on Saturday, July 2, 2022.

¹ *The Curtailment Group number in this table is based on the order of priority outlined in Emergency Regulation section 875.5(a)(1). Group 1 is curtailed first and suspended last (i.e., most junior water right priority), Group 8 is curtailed last and suspended first. Please note that water rights of Group 2 refer to the Surplus Rights only, not the other water rights of the owner, and that they are listed with reference to curtailment number and ownership as listed in the Scott River Decree. This list should be understood to include the successors and assigns of the owners at that time. Group 2 Surplus Rights are generally unavailable in drought years, and are only available when all other rights under the Scott River Decree have been fully satisfied.*
